

C O N T E N T S

Preface	v
List of Participants	xi
1 Quantization of General Relativity - Chairman: Abdus Salam	
1.1 An Introduction to Covariant Quantization of Gravitation P. Van Nieuwenhuizen	1
1.2 The Chronos Principle and Field Interactions D. Christodoulou	27
1.3 General Relativity à la String: a Progress Report T. Regge and C. Teitelboim	77
1.4 Geometric Quantization and General Relativity J.-M.Souriau	89
Communications by: C. Aragone, L. Halpern, A. Inomata, M. Pilati and C. Teitelboim, W. Szczyrba, J. Tarski	101
2 Space-time Structures - Chairman: H. Sato	
2.1 Space-time Singularities R. Penrose	173
2.2 H Space - The Manifold of Complex Asymptotically Shear-Free Light Cones E. Newman	183
2.3 Conformal Structure - Spacelike Infinity B. Schmidt	189
2.4 Maximal Surfaces in Closed and Open Space-times D. Brill	193
Communications by: P. Hajicek, C. Lopez, E.W.Mielke, T. Nakamura and H. Sato, A. Quale, A. Tomimatsu and H. Sato	207
3 Singularities in General Relativity - Chairman: J. Ehlers	
3.1 On the General Solution of Einstein Equations Near the Cosmological Singularity E.M. Lifshitz	229
3.2 Spatially Homogeneous Universes A. Taub	231
3.3 The Vacuum Black Hole Uniqueness Theorem B. Carter	243
3.4 On Gravitation in Microphysics P. von der Heyde and F.W. Hehl	255
Communications by: N.D. Hari Dass and V. Radhakrishnan, B. Lukács and Z. Pérfjes, A.R. Prasanna, D. Wilkins	279
Round Table on Perturbation Techniques - Chairman: F. Zerilli Participants: S.L. Detweiler, M.D. Johnston, M. Peterson and R. Ruffini, J. Weinstein	303
4 Relativistic Magnetohydrodynamics - Chairman: S. Chandrasekhar	
4.1 Shock Waves in Relativistic Magnetohydrodynamics A. Lichnerowicz	335
4.2 On Relativistic Magnetohydrodynamics Processes in the Fields of Black Holes R. Ruffini	349
4.3 Magnetohydrodynamics Near a Black Hole J.R. Wilson	393

4.4	Coupling of High Frequency Gravitational and Electromagnetic Waves		
	Y. Choquet-Bruhat	415
	Communications by: R.S. Hanni, W. Kundt, H. Quintana	429
5	Particle Creation in Strong Gravitational Fields - Chairman: B. Bertotti		
5.1	Quantum Processes Near Black Holes		
	G.W. Gibbons	449
5.2	Klein Paradox and Vacuum Polarization		
	T. Damour	459
5.3	Classical and Quantum States in Black Hole Physics		
	N. Deruelle	483
5.4	Quantum Effects in Cosmology and Black and White Hole Physics		
	A.A. Starobinsky	499
	Communications by: P.C. Aichelburg, P.C.W. Davies, L.R. Davis, U.H. Gerlach, H. Rumpf, W.G. Unruh, W.T. Zaumen	503
6	Experimental Results on Gravitational Theories - Chairman: W. Fairbank		
6.1	Theoretical Significance of Present Day Gravity Experiments		
	K. Nordtvedt, Jr.	539
6.2	Gravitation, Relativity and Precise Experimentation		
	C.W.F. Everitt	545
6.3	Observational Cosmology		
	R.B. Partridge	617
	Communications by: F.I. Cooperstock and G.J.G. Junevicius, F. Occhionero	649
	Author Index	661
	Subject Index	663
