

PART B

PARALLEL SESSIONS

EXACT SOLUTIONS — Chairmen: J. Goldberg and R. Jantzen

Solitary and Non Solitary Waves on a Friedmann-Robertson-Walker Background P.S.C. ALENCAR and P.S. LETELIER	885
Asymptotic Simplicity for Post-Minkowskian Space-Times L. BLANCHET	895
Exact Axially Symmetric Stationary Solutions of the Einstein-Scalar Gravitational Field Equations W. BRUCKMAN	905
The Validity of Huygens' Principle on Type N Space-Times J. CARMINATI and R.G. McLENAGHAN	911
Ernst Potential and Multipole Moments W. DIETZ	917
Equatorial Geodesics in Magnetic Universes E.P. ESTEBAN	927
Collision of Two Plane Gravitational Waves V. FERRARI and J. IBÁÑEZ	931
The Cartan Ideal, Prolongation, and the Painleve Property of the Einstein Field Equations M. GÜRSSES and A.H. BILGE	939
Integrable Systems for Einstein Vacuum Equations B.K. HARRISON	949
Conformally Symmetric Spheres in General Relativity L. HERRERA	957
Asymptotically Anti-De Sitter Universes in $d = 3, 4$ and Higher Dimensions M. HENNEAUX	959
The Double Kerr Solution: A Survey C. HOENSELAERS	967
General Relativistic Singularity Free Description of Matter I. KHAN and A. QADIR	977

The SU(2,1) Invariance of the Einstein-Maxwell Equations D. KRAMER	983
A Spatially Periodic Generalization of the FLRW Cosmological Models A. KRASIŃSKI.	989
On a Fourth-Order Equation of Axisymmetric Stationary Vacuum Spacetimes K. LORENCZ and A. SEBESTYEN	997
Stationary Vacuum Space-Times in Ernst Coordinates Z. PERJES.	1003
The Kerr-Nut Metric with all Mass Multipole Moments H. QUEVEDO	1015
Rotating Spacetimes of Gödel-Type M.J. REBOUÇAS and A.F.F. TEIXEIRA	1025
Transitively Self-Similar Space-Times K. ROSQUIST and R.T. JANTZEN	1033
Spherically Symmetric Solutions in $R + R^2$ Gravity P. TEYSSANDIER	1041
EARLY COSMOLOGY — <i>Chairman: B.L. Hu</i>	
Path Integral Quantum Cosmology B.K. BERGER	1047
On Stability of Transition Between the De Sitter Universe and a Friedman Radiation Universe M. DEMIANSKI and I.G. DYMNIKOVA	1053
Inflation and Flatness in Hawking's State of the Universe D.N. PAGE	1059
Entropy Production in the Early Universe M. SASAKI	1065
Entropy Production in a Kaluza-Klein Viscous Universe K. TOMITA	1071

QUANTUM GRAVITY — *Chairman: J. Hartle*

On the Quantum Field Theory of Mutually Interacting Particles in Cosmological Gravitational Fields J. AUDRETSCH	1079
Strong Gravity Revisited C.C. BERNIDO	1087
Semiclassical Cosmological Models M. CASTAGNINO, D. HARARI and J.B. PAZ	1095
Canonical Quantisation of Gravity T. CHRISTODOULAKIS	1105
Formation of Black Holes in Quantum Cosmology FANG Li Zhi and LI Miao.	1115
Covariant Schrödinger Formalism and Application to Accelerated Observers K. FREESE, C. HILL and M. MUELLER	1121
The Rindler Condensate: Ground State in an Accelerated Frame U.H. GERLACH	1129
Can Quantum Gravity be Unitary and Causal? P. HAJICEK.	1139
Quantum Simplicial Gravity H.W. HAMBER.	1151
Multitemporal Relativistic Particle Mechanics: A Gauge Theory without Gauge-Fixings L. LUSANNA.	1163
Cone Subdivision Procedure for Regge Lattices: A Renormalization Group Approach to Quantum Gravity M. MARTELLINI and A. MARZUOLI	1173
Stochastic Quantization in General Relativity H. RUMPF.	1183

Exact Solution to Semiclassical Quantum Gravity in Two Dimensions N. SANCHEZ	1197
Wave Function of a Black Hole WU Zhong Chao	1203
 KALUZA-KLEIN THEORIES — <i>Chairman: G. Aragone</i>	
SU(3) $\times$ SU(2) $\times$ U(1) from a CP ² Coset Space N.A. BATAKIS	1211
Observational Multidimensional Cosmology R. BERGAMINI	1215
The Cauchy Problem in Higher Dimensional Gravity and Kaluza-Klein Theories Y. CHOQUET-BRUHAT	1223
Equivalence of Spin and Angular Momentum in a Unified Theory L. HALPERN	1233
Cosmology in Ten-Dimensions Y.D. KIM and Y.S. MYUNG	1247
Attractor Universe in a Kaluza-Klein Cosmology K. MAEDA	1255
Revisiting the Non-Abelian Wong Equations in a Curved Space-Time, as derived from Kaluza-Klein Theories R.P. MONDAINI	1265
Truncations in Kaluza-Klein Theories C.N. POPE	1275
 PRECISION GRAVITATIONAL EXPERIMENTS — <i>Chairman: S. Leschiutta</i>	
Experimental Test of a Prototype Active Cavity Gravitational Wave Detector A. ABRAMOVICI, Z. VAGER and M. WEKSLER	1287

The Influence of Gravitational Radiation on Superconductors J. ANANDAN.	1299
Inertial and Gravitational Experiments with Superfluids: A Progress Report M. BONALDI, M. CERDONIO, P. FALFERI, A. GOLLER, M. MAZZER, A. MIOTELLO, G.A. PRODI, F. SORGE, R. TOMMASINI, L. VANZO, S. VITALE and S. ZERBINI	1309
The Gravity Gradiometer and the Heterodyne Detector of Gravitational Waves A. ČADEŽ and M. KOŽELJ	1319
Performance of an Active Pendulum with Interferometric Sensing A. GIAZOTTO, E. CAMPANI, D. PASSUELLO, and A. STEFANINI	1329
Polarized-Body Experiments and Equivalence Principles W.-T. NI	1335
Experimental Evidence Against a Lorentz Aether Theory (LAT) J. TIOMNO	1347
COMPUTER RELATIVITY – <i>Chairman: R. Stark</i>	
Volterra Series Route to Post-Maxwellian Electrodynamics: EM Resonator Detectors of Gravitational Waves C. BISCARI, D. CUOMO, G. FRANCESCHETTI, G. PANARIELLO, S. PETRACCA, I. PINTO and F. RECANO	1357
Gravitational Radiation from Kerr Black Holes T. NAKAMURA	1365
Three-Plus-One Regge Calculus: Formalism and Applications to Inflationary Universes R.M. WILLIAMS and T. PIRAN	1373

COSMOLOGY AND INOS — *Chairman: A. Ferrari*

Halo Collapse in Spiral Galaxies M.V. ARBOLINO	1387
---	------

Very Early Cosmologies with Irreversibility and the Monopole Dominance B. LUKÁCS	1393
---	------

SUPERGRAVITY — *Chairman: P. van Nieuwenhuizen*

Light Front Dynamics of the Gravitini Superfields C. ARAGONE	1405
--	------

A New Class of Chiral $d = 6$ Supergravity Theories M.A. AWADA and P.K. TOWNSEND	1415
--	------

Spontaneous Breaking of Extended Supergravities L. GIRARDELLO	1425
---	------

The Ultraviolet Divergences of Gravity Theories M.H. GOROFF and A. SAGNOTTI	1437
---	------

Positive Energy Theorem for Eleven-Dimensional Kaluza-Klein Supergravity J. KOWALSKI-GLIKMAN	1445
---	------

The Canonical Structure of the Grassmann Models and Existence of Non-Local Currents J. MAHARANA	1447
--	------

Supergravity Theory in Twelve Dimensions WANG Mian	1459
--	------

RELATIVISTIC SELF-GRAVITATING SYSTEMS —*Chairman: U. Gerlach*

Adiabatic Accretion of Rotating Matter onto a Black Hole M.A. ABRAMOWICZ, M. LIVIO and J. LU	1467
--	------

Spherically Symmetric Stellar Dynamics J. BATT	1473
Behaviour of the Ratio $\frac{a}{M}$ for Rotating Bodies during Accretion and Gravitational Collapse F. DE FELICE and YU Yunqiang.	1477
On Systems of Self-Gravitating Bosons and Fermions Undergoing Quantum Condensation G. INGROSSO and R. RUFFINI	1485
Relativistic Stellar Dynamics and Dense Galactic Nuclei H.E. KANDRUP	1491
On Self-Gravitating Classical Systems with a Phase Space Cutoff M. MERAFINA and R. RUFFINI	1501
The Stability of Inhomogeneous Spheroids with Anisotropic Pressure F. PACHECO, G. PUCACCO and R. RUFFINI	1511
Phase-Space Dynamics of Bianchi IX Cosmological Models I. DAMIÃO SOARES.	1523
RELATIVISTIC EFFECTS IN ASTROPHYSICS — <i>Chairman: F. Bertola</i>	
Cosmological Shock Waves A.M. ANILE and G. MOSCHETTI	1531
Gravitational Lensing and Flux Conservation A. BLANCHARD and G. LACROIX	1537
Hydrodynamics of Radiation Driven Flows M. CALVANI, L. NOBILI and R. TUROLLA	1543
Gravitational Lens Models S.M. CHITRE	1549
Multiple Images of our Galaxy in Closed, Multiply Connected Cosmologies H.V. FAGUNDES	1559

Post-Newtonian Dynamics, Gravitational Radiation, and the Binary Pulsar M.P. HAUGAN	1565
The Dynamical Quadrupole Moment of the Sun P.R. GOODE	1573
The Sun's Gravitational Quadrupole Moment Inferred from the Fine Structure of the Acoustic and Gravity Normal Mode Spectra of the Sun H.A. HILL, R.D. ROSENWALD and G.F. RABAEY	1581
Phonons in a Relativistic Perfect Fluid S. MATARRESE	1591
A Relativistic Explanation of the Pulsar Drift A. QADIR and M. RAFIQUE	1597
Time Variation of the Triple Quasar PG 1115 + 08 : Confirmation of the Gravitational Mirage Hypothesis J. SCHNEIDER, C. VANDERRIEST, G. WLERICK, G. LELIEVRE, H. SOL, D. HORVILLE and L. RENARD	1607
 CLASSICAL RELATIVITY – <i>Chairman: W. Stoeger</i>	
A Method of Solving the Geodesic Deviation Equations S.L. BAŻAŃSKI	1615
A Conformal Extension of Pseudo-Newtonian Forces and Potentials A.H. BOKHARI and A. QADIR	1623
A Gravitating Source in an Evolving Universe A.H. BOKHARI and A. QADIR	1635
On Kijowski's Unconstrained Degrees of Freedom of the Gravitational Field P.T. CHRUSCIEL	1643

The New Gravitational Radiation Energy Loss Formula F.I. COOPERSTOCK and P.H. LIM	1651
The Slow-Motion Formalism for the Numerical Study of Non-Radial G-Mode Pulsations in Relativistic Stars L.S. FINN	1657
Null Cone Canonical Formalism J.N. GOLDBERG	1665
On Positivity of Gravitational Energy J. KIJOWSKI	1681
Angular Momentum on Future Null Infinity O.M. MORESCHI	1687
Extremum Theorems for Angular Momentum in General Relativity E. NAHMAD-ACHAR	1695
A New Derivation of the Quadrupole Formula for Gravitational Radiation S. PERSIDES	1701
Testing the Local $SO(3,1)$ Invariance of Gravity at the Planetary Level V. DE SABBATA and M. GASPERINI	1709
Spin Dynamics in General Relativity M.M. SOM, M.L. BEDRAN and E.P. VASCONCELLOS-VAIDYA	1715
A Note on the Behaviour of the Curvature Tensor near Space-Time Singularities L.B. SZABADOS	1719
THEORETICAL FRAMEWORK FOR GRAVITY	
Translation of Absolute Evolution Laws of a Continuous System in One Comoving Physical Frame of Reference — Some Exact Solutions G. CARICATO	1725

Theoretical Properties of Gravitational Fields Derived from Properties of Light R.A. VERA	1743
New Theory of Gravitation H. YILMAZ	1753
HISTORY OF GENERAL RELATIVITY –	
<i>Chairman: M. de Maria</i>	
Waves in Five Dimensions and Quantum Physics in O. Klein's Paper of 1926 S. BERGIA, G. D'ANGELO and V. MONZONI	1795
Einstein's Path Toward the Generally Covariant Formulation of Gravitational Field Equations: The Contribution of Tullio Levi-Civita C. CATTANI and M. DE MARIA	1805
On the History of the Schwarzschild Singularity : 1915–1923 J. EISENSTAEDT	1827
Relativity and Atomic Theory Before Quantum Mechanics H. KRAGH	1829
Einstein's Discovery of the Field Equations of General Relativity: Some Milestones J. NORTON	1837
The Reception of Relativity in Spain (1908–1923) A. ROCA	1849
What a Physicist Can Learn From the Discovery of General Relativity J. STACHEL	1857
