

# Contents

<i>SCIENTIFIC COMMITTEE AND CONTRIBUTORS</i>	<i>iii</i>
<i>CONTENTS OF VOLUME I</i>	<i>xi</i>
12 <i>Relativity and Mathematical Physics</i> André Lichnerowicz	403
13 <i>Triumphs and Limitations of Einstein's Theory of Relativity and Gravitation</i> C. Møller	473
14 <i>Inertia and Cosmology in Einstein's Relativity</i> J. V. Narlikar	493
15 <i>Einstein and the Role of Symmetry in Modern Physics</i> Luigi Radicati di Brozolo	523
16 <i>Relativity and Beyond</i> Erasmus Recami	537

17	<i>On Gravitationally Collapsed Objects</i>	599
	<b>Remo Ruffini</b>	
18	<i>Gravitational Collapse and Exact Solutions of Einstein Equations</i>	659
	<b>Humitaka Sato</b>	
19	<i>Black Holes and Fluctuations of Quantum Particles: An Einstein Synthesis</i>	681
	<b>Dennis W. Sciama</b>	
20	<i>Experimental Tests of the General Theory of Relativity</i>	725
	<b>Irwin I. Shapiro</b>	
21	<i>Neutrinos, Supernovae, and Related Astrophysics</i>	745
	<b>Maurice M. Shapiro and Rein Silberberg</b>	
22	<i>On the Problem of Physical Meaning of Quantization of Gravitational Fields</i>	783
	<b>Hans-Jürgen Treder</b>	
23	<i>The Quantum and the Universe</i>	807
	<b>John Archibald Wheeler</b>
