

## CONTENTS

Preface	v
1. Gravitational Antennas and the Search for Gravitational Radiation <i>J Weber</i>	1
2. The Structure of the Terrestrial Planets and Tidal Friction Theory <i>R A Lyttleton</i>	79
3. Nonstatic Massless Scalar Field in the Theory of Gravitation <i>V S Dorodnykh</i>	136
4. Particle Creation in Early Universe <i>S N Pandey</i>	139
5. A Model-Theory for Tachyons in Two Dimensions <i>E Recami &amp; W A Rodrigues Jr.</i>	151
6. Physical Symmetry Groups and Associated Bundles in Field Theory <i>A Crumeyrolle</i>	204
7. Gravitational Collapse and Rotation: A Quandary for the Black-Holes <i>F de Felice</i>	224
8. Quantum Equivalence Principle <i>A V Osipova</i>	236
9. Eddington's Numbers and Quantum Gravity <i>H H von Borzeszkowski &amp; H-J Treder</i>	245
10. Principle-Theoretic Approach of Kondo and Construction-Theoretic Formalism of Gauge Theories <i>L C Jain</i>	271
11. The Hubble Diagram for Brightest Cluster Galaxies and the Cosmological Constant <i>V E Yakimov</i>	283
12. Estimation of the Gravitational Radiation (GR) from the Pulsar PSR 1937+214 <i>R Qin &amp; D Mao</i>	292

13.	Dominance of $B^{10}$ or $C^{12}$ Nuclear Production during Gravitational Collapse in the Stellar Interior <i>K L Narayana</i>	298
14.	Physical Processes of Gravitons and Gravy Quarks in the Interior of Cosmod and Supergravity Cosmic Stellar Entities <i>K L Narayana</i>	315
15.	Tachyonic Dyons <i>B S Rajput</i>	326
16.	On the Correlation between Six-Dimensional and Four-Dimensional Coordinate Transformations <i>M T Teli</i>	375
17.	A Nonsingular Vacuum Model for Pre-inflationary Universe <i>K A Bronnikov &amp; V N Melnikov</i>	386
18.	On the Electromagnetic and Gravitational Radiation in General Relativity <i>Z Ahsan</i>	395
19.	The Consistency of Theory of Developed Newtonian Gravitation (TDNG) Partially alias TETG in respect of the Attenuation <i>I A Adamuti</i>	401
20.	Model Systems of Fields in the Theory of Gravitation and the Problems of Cosmology <i>V N Melnikov &amp; K P Stanukovich</i>	418
21.	Does a Free Tachyon Exist? <i>T Chang</i>	431
22.	Some Structural Considerations on the Theory of Gravitational Field in Finsler Spaces - II <i>S Ikeda</i>	437
	Index	453
