

CONTENTS

Editor's Foreword	vii
Preface	ix
Chapter 1 Classical Introduction	1
1-1 Nonlinear Susceptibilities	1
1-2 Classical Atomic Models of Nonlinearity	3
The Free Electron Gas	3
The Anharmonic Oscillator	5
Magnetic Gyroscopes	8
1-3 Phenomenological Interpretation of the Nonlinear Polarization	9
1-4 Synopsis	17
References	18
Chapter 2 Quantum Theory of Nonlinear Susceptibilities	20
2-1 The Liouville Equation for the Density Matrix	20
2-2 Random Perturbations and Damping	21
2-3 Response to Periodic Perturbations	26
2-4 Lowest Order Nonlinear Conductivity	31
2-5 Raman-Type Nonlinearities	37
2-6 Higher Order Resonance Effects	44
2-7 Kramers-Kronig Relations	45
2-8 Quantization of the Fields	46
Nonlinear Absorption and Scattering Processes	47
Scattering Cross Sections and Nonlinear Susceptibilities	52

Coherent Quantum States. Limitation of the Semiclassical Treatment	55
Quantum Theory of Damping	56
References	60
Chapter 3 Maxwell's Equations in Nonlinear Media	62
3-1 Energy Considerations	63
3-2 Local Fields in Optically Dense Media	68
3-3 Coupled Wave Equations in Nonlinear Media	70
3-4 A Particular Solution for Arbitrary Nonlinear Response	72
References	73
Chapter 4 Wave Propagation in Nonlinear Media	74
4-1 Parametric Generation and Boundary Conditions	74
Anisotropic Media	84
4-2 Coupling Between Two Waves: Harmonic Generation	85
4-3 Interactions with Vibrational Waves	90
Acoustic Nonlinearities	90
Brillouin Scattering	93
4-4 Parametric Down Conversion and Oscillation	96
4-5 Stimulated Raman Effect	102
4-6 Coupling Between Stokes and Antistokes Waves	110
References	119
Chapter 5 Experimental Results	121
5-1 Experimental Verification of the Laws of Nonlinear Transmission and Reflection	121
Geometrical Considerations	122
Reflected Harmonic Waves	124
Generation of Sum and Difference Frequencies	127
5-2 Absolute Determination of a Nonlinear Susceptibility	129
5-3 Multimode Structure and Fluctuation Phenomena	131
5-4 Nonlinear Susceptibilities of Piezoelectric Crystals	134
Temperature Dependence and Dispersion of the Nonlinear Susceptibility in KDP	137
Nonlinear Susceptibilities of Semiconductors	139
5-5 Electric Quadrupole Effects	142
5-6 Third-Harmonic Generation	144
5-7 Multiple Photon Absorption	146
5-8 Intensity Dependent Index of Refraction	147
5-9 Stimulated Raman Effect	149

CONTENTS	xiii
5-10 Higher Order Stokes and Antistokes Radiation	153
5-11 Raman Type Susceptibilities	159
References	163
Chapter 6 Conclusion	166
6-1 Nonlinearities in Lasers	167
6-2 Other Geometries	168
6-3 Conclusion	169
References	169
Appendices	170
