

## Contents

List of Contributors . . . . .	v
Preface . . . . .	vii
<b>Chapter 1 THE PHOTOGRAPHIC PROCESS: H. BAINES . . . . .</b>	<b>1</b>
I. Introduction . . . . .	1
II. The Photographic Emulsion . . . . .	2
A. Silver Halides . . . . .	2
B. The Sensitive Emulsion . . . . .	2
C. Manufacture of Photographic Materials . . . . .	3
III. The Latent Image . . . . .	5
A. Mechanism of Latent Image Formation . . . . .	6
B. Reciprocity Failure, Intermittency and Herschel Effects . . . . .	7
C. Latent Image Distribution . . . . .	9
IV. Processing . . . . .	9
A. The Developer . . . . .	9
B. Fixation and Stabilization . . . . .	12
V. The Image . . . . .	14
A. Image Structure . . . . .	14
VI. Sensitometry . . . . .	21
A. The Characteristic Curve . . . . .	21
References . . . . .	26
<b>Chapter 2 SENSITIVE MATERIALS: M. G. FISHER . . . . .</b>	<b>27</b>
I. Film Speeds . . . . .	27
A. Negative Films . . . . .	27
B. Reversal Films . . . . .	28
C. Comparison of Film Speed Ratings . . . . .	28
II. Black and White Emulsions . . . . .	30
A. General Characteristics of Black and White Films . . . . .	30
B. Principal Types of Film . . . . .	34
C. Special Types of Film . . . . .	35
D. Particular Applications of Films . . . . .	37
E. Sensitive Papers . . . . .	38
F. Storage of Photographic Materials . . . . .	40
III. Filters for Black and White Materials . . . . .	40
A. Colour Filters . . . . .	40
B. Filter Factors . . . . .	42
C. Special Filters . . . . .	43

IV. Colour Photography . . . . .	45
A. Three Colour System . . . . .	45
B. Construction of Colour Films . . . . .	47
V. Light Sources and Filters for Colour Films . . . . .	50
A. Light Sources . . . . .	50
B. Filters for Colour Films . . . . .	53
C. Effect of Camera Lenses . . . . .	54
VI. Colour Films . . . . .	55
A. Reversal Colour Films . . . . .	55
B. Negative Colour Films . . . . .	58
C. Special Characteristics of Colour Films . . . . .	61
D. Control of Quality . . . . .	62
References . . . . .	64
<b>Chapter 3 PHOTOGRAPHIC OPTICS: PETER ROLLS . . . . .</b>	<b>67</b>
I. Introduction . . . . .	69
II. Properties of Light . . . . .	69
A. The Electromagnetic Spectrum . . . . .	69
B. Reflection . . . . .	71
C. Refraction . . . . .	73
D. Diffraction . . . . .	75
E. Polarization . . . . .	76
F. Interference . . . . .	78
G. Geometrical Factors Affecting Illumination Intensity . . . . .	79
III. Properties of Optical Materials . . . . .	81
A. Dispersion . . . . .	81
B. Absorption . . . . .	82
IV. Properties of Lenses . . . . .	83
A. Image Formation . . . . .	83
B. Focal Length . . . . .	86
C. Aperture . . . . .	93
D. Covering Power . . . . .	100
E. Aberrations . . . . .	103
F. Flare . . . . .	109
G. Lens Response . . . . .	113
V. Practical Applications of Lenses . . . . .	117
A. Problems Involving Determination of Camera Extension . . . . .	117
B. Magnification . . . . .	118
C. Depth of Field and Depth of Focus . . . . .	120
D. Perspective . . . . .	127
VI. Lens Types . . . . .	130
A. Long Focus Lens . . . . .	130
B. Telephoto Lens . . . . .	130
C. Wide Angle Lens . . . . .	131
D. Fish Eye Lens . . . . .	131
E. Retrofocus Lens . . . . .	132
F. Convertible Lens . . . . .	133
G. Zoom Lens . . . . .	133

H. Special Ultraviolet and Infra-red Lenses . . . . .	134
I. Mirror Lens . . . . .	134
J. Enlarger Lens . . . . .	135
K. Lenses for Photomacrography . . . . .	136
L. Process Lens . . . . .	137
VII. Optical Accessories . . . . .	137
A. Supplementary Lenses . . . . .	137
B. Extension Tubes . . . . .	142
C. Filters . . . . .	143
D. Lens Hoods . . . . .	148
VIII. Selection of a Lens . . . . .	149
A. General Purpose Lenses . . . . .	149
B. Special Requirements . . . . .	150
C. Camera . . . . .	151
IX. Testing Lenses . . . . .	151
A. General . . . . .	151
B. Flare . . . . .	151
C. Distortion . . . . .	152
D. Chromatic Aberration . . . . .	152
E. Spherical Aberration and Coma . . . . .	152
F. Resolution . . . . .	152
G. Covering Power . . . . .	153
H. Accessories . . . . .	153
I. Focal Length . . . . .	153
J. <i>F</i> /no . . . . .	154
X. Care of Lenses . . . . .	154
A. Cleaning . . . . .	154
B. Tropical Conditions . . . . .	154
C. Arctic Conditions . . . . .	154
XI. Optical Systems . . . . .	155
A. Simple Methods of Transillumination . . . . .	155
B. Shadowgraphs . . . . .	156
C. Schlieren Methods . . . . .	159
D. Pinhole Cameras . . . . .	161
E. Interferometers . . . . .	162
F. Dark Field Illumination . . . . .	164
G. Endoscopes . . . . .	165
H. Fibre Optics . . . . .	167
References . . . . .	172
<b>Chapter 4 LIGHTING EQUIPMENT: L. H. VERBEEK . . . . .</b>	<b>175</b>
I. Light . . . . .	175
A. Introduction . . . . .	175
B. Sensitivity of the Eye . . . . .	176
C. Definitions and Photometric Units . . . . .	177
II. Light Sources . . . . .	180
A. Incandescence . . . . .	180
B. Incandescent Lamp Characteristics . . . . .	186
C. Gas Discharges . . . . .	188
D. The Carbon Arc . . . . .	191

E. Specific Discharge Lamp Types . . . . .	192
F. Combustion Light (Flash Bulbs) . . . . .	200
III. Selected Light Sources for Photography . . . . .	203
A. Incandescent Lamps . . . . .	203
B. Gas Discharge Lamps . . . . .	216
C. Flash Bulbs . . . . .	218
D. Guide Numbers . . . . .	220
IV. Equipment . . . . .	221
A. Electrical Equipment . . . . .	221
B. Optical Equipment . . . . .	222
C. Flash Equipment . . . . .	225
D. Exposure Meter and Flash Meter . . . . .	229
References . . . . .	230
<b>Chapter 5 PROCESSING: R. A. KOLVOORD . . . . .</b>	<b>233</b>
I. Introduction . . . . .	234
II. The Darkroom . . . . .	234
A. Design of the Darkroom . . . . .	234
B. Darkroom Installations . . . . .	240
C. Darkroom Equipment . . . . .	246
III. Photographic Chemicals and their Functions . . . . .	251
A. The Developer . . . . .	251
B. The Stop Bath . . . . .	253
C. The Fixing Bath . . . . .	254
D. Special Purpose Chemicals . . . . .	254
E. Storage of Solutions and Chemicals . . . . .	255
IV. Negative Processing . . . . .	256
A. Reduction to Metallic Silver . . . . .	256
B. Fixation . . . . .	258
C. Washing . . . . .	260
D. Drying . . . . .	262
E. Special Processing Techniques . . . . .	262
F. Postdevelopment Treatment . . . . .	263
V. Photographic Printing . . . . .	265
A. Printing Papers . . . . .	265
B. Contact Printing . . . . .	266
C. Enlarging . . . . .	267
D. Rapid Print Processing . . . . .	268
VI. Print Finishing . . . . .	268
A. Mounting Photographs . . . . .	268
B. Spotting Prints . . . . .	270
VII. Photographs for Publication . . . . .	270
References . . . . .	271
<b>Chapter 6 PHOTOGAMMETRY: K. B. ATKINSON and</b>	
I. NEWTON . . . . .	273
I. Definition . . . . .	273
II. Possible Applications . . . . .	275
A. General Remarks . . . . .	275

B. Two Specific Applications of Photogrammetry . . . . .	275
C. Specific Fields of Application . . . . .	277
III. Some Basic Principles . . . . .	279
A. Camera Constants . . . . .	279
B. Single Photograph . . . . .	279
C. Pairs of Photographs . . . . .	280
IV. Basic Requirements . . . . .	287
A. Camera . . . . .	287
B. Materials . . . . .	289
C. Control of Photography . . . . .	289
V. Recording Methods for Stereopairs of Photographs . . . . .	290
A. Using a Single Camera . . . . .	290
B. Using a Synchronized Pair of Cameras . . . . .	291
C. Special Stereocameras . . . . .	292
D. Stereo-attachments . . . . .	292
VI. Analysis of Stereopairs . . . . .	292
VII. Photo-interpretation . . . . .	294
VIII. List of Major Manufacturers . . . . .	294
References . . . . .	295

**Chapter 7 INFRA-RED RECORDING: H. LOU GIBSON . . . . . 299**

I. Introduction . . . . .	300
II. Definitions . . . . .	300
III. Major Properties . . . . .	300
A. Differential Spectral Absorption, Reflection or Trans- mission . . . . .	300
B. Penetration of Radiation . . . . .	303
C. Luminescence . . . . .	304
D. Invisible Radiation . . . . .	304
E. Temperature Co-relation . . . . .	307
F. Interpretation . . . . .	307
IV. Applications . . . . .	307
A. Venography . . . . .	307
B. Superficial Lesions . . . . .	308
C. Gross Specimens . . . . .	309
D. Ophthalmology . . . . .	309
E. Animal Behaviour and Records . . . . .	310
F. Botany . . . . .	312
G. Palaeontology . . . . .	321
H. Pearls . . . . .	323
I. Protein Suspensions . . . . .	323
V. Methods of Recording . . . . .	323
A. Equipment . . . . .	323
B. Sensitive Material . . . . .	329
C. Negative Processing . . . . .	331
D. Positive Print Preparation . . . . .	332
E. Recording Techniques . . . . .	338
F. Evaluation of the Negative Image . . . . .	352
G. Infra-Red Colour Recording . . . . .	352

H. Combined Infra-Red Recording and Colour Photography . . . . .	353
I. Combined Infra-Red Recording and Radiography . . . . .	354
J. Direct Thermography . . . . .	354
References . . . . .	356

## Chapter 8 ULTRAVIOLET and FLUORESCENCE

RECORDING: PETER HANSELL . . . . .	363
I. Introduction . . . . .	363
A. Basic Properties . . . . .	364
B. Basic Techniques . . . . .	364
II. Ultraviolet Radiation Sources . . . . .	365
A. Metal and Carbon Arcs . . . . .	366
B. Mercury Vapour Arcs . . . . .	367
C. Electronic Flash . . . . .	368
D. Flash Bulbs . . . . .	370
E. Special Units . . . . .	370
F. Biological Effects—A Warning . . . . .	371
III. Screens and Filters . . . . .	371
A. Ultraviolet Transmitting Screens . . . . .	371
B. Ultraviolet Absorbing Filters . . . . .	373
IV. Sensitive Materials . . . . .	374
A. Monochrome . . . . .	374
B. Colour . . . . .	375
C. The Polaroid-Land System . . . . .	375
V. Ultraviolet Photography . . . . .	375
A. Method One . . . . .	375
B. Method Two . . . . .	377
VI. Fluorescence Photography . . . . .	377
VII. Special Applications . . . . .	380
A. Chromatography . . . . .	380
B. Microscopy . . . . .	380
C. Miscellaneous Applications . . . . .	382
References . . . . .	382

## Chapter 9 UNDERWATER PHOTOGRAPHY:

HANS ULRICH RICHTER . . . . .	385
I. Light Transmission . . . . .	385
A. Incident Light . . . . .	386
B. Spectral Transmission . . . . .	387
C. Visibility . . . . .	388
II. Optics . . . . .	390
A. Apparent and Real Focusing Distance . . . . .	390
B. Angle of View . . . . .	391
C. Exposing Light Path . . . . .	393
III. Photography into Open Water . . . . .	394
IV. True Underwater Photography . . . . .	396
A. Equipment . . . . .	396

CONTENTS

xv

B. Conventional Lenses . . . . .	398
C. Special Underwater Lenses . . . . .	398
D. Close-up Lenses . . . . .	400
E. Artificial Light Sources . . . . .	400
F. Filters . . . . .	405
G. Exposure . . . . .	408
H. Black and White and Colour Film . . . . .	410
I. Processing . . . . .	411
V. Tank Photography . . . . .	412
A. Equipment . . . . .	412
B. Artificial Light . . . . .	413
C. Filters . . . . .	416
D. Exposure . . . . .	417
E. Black and White and Colour Film . . . . .	417
References . . . . .	418

**Chapter 10 CLOSE-UP and PHOTOMACROGRAPHY OF LIVE SUBJECTS: H. H. HEUNERT . . . . .**

I. Introduction . . . . .	421
II. Definition of Close-up and Photomacrography . . . . .	421
III. Equipment . . . . .	422
A. Cameras . . . . .	422
B. Lenses . . . . .	424
C. Exposure Determination . . . . .	430
D. Light Sources for Illumination of Small Fields . . . . .	433
E. Accessories for Photomacrography . . . . .	434
IV. The Practice of Close-up Photography and Photomacrography . . . . .	435
A. Lighting Techniques . . . . .	435
B. Special Photographic Techniques . . . . .	442
References . . . . .	449

**Chapter 11 PHOTOGRAPHY OF SPECIMENS:**

W. L. M. MARTINSEN . . . . .	451
I. Photomacrography . . . . .	451
A. Definition . . . . .	451
B. Equipment . . . . .	451
C. Transparent Subjects . . . . .	453
D. Opaque Subjects . . . . .	455
E. Lighting . . . . .	458
II. Gross Specimen Photography . . . . .	462
A. Equipment . . . . .	462
B. Lighting . . . . .	462
C. Background . . . . .	465
D. Recording . . . . .	467
E. Special Methods . . . . .	469
F. Invisible Radiation . . . . .	479
References . . . . .	480

<b>Chapter 12</b>	<b>QUANTITATIVE PHOTOMICROGRAPHY:</b>	
	A. S. G. CURTIS . . . . .	483
	I. Introduction . . . . .	483
	II. Types of Research Problem in which Photomicrography may be Useful . . . . .	485
	A. Introduction . . . . .	485
	B. Photomicrography vs Photomultiplier Methods . . . . .	488
	III. The Quantitative Method: The Limits of Accuracy . . . . .	488
	A. General . . . . .	488
	B. Larger Scale Geometric Errors . . . . .	492
	C. Testing Methods . . . . .	494
	IV. The Quantitative Method: Technique . . . . .	498
	A. Geometrical Methods . . . . .	498
	B. The Quantitative Method: Optical Measurements . . . . .	504
	References . . . . .	509

<b>Chapter 13</b>	<b>PHOTOGRAPHIC COPYING: R. OLLERENSHAW</b>	513
	Introduction . . . . .	514

#### OPAQUE ORIGINALS

I.	Equipment and Optics . . . . .	515
	A. The Camera . . . . .	515
	B. Lenses . . . . .	517
	C. Lighting . . . . .	518
	D. Alternative Equipment for the Occasional User . . . . .	519
	E. Copyholding Equipment . . . . .	521
II.	Preparation of Material to be Copied . . . . .	521
	A. Existing Material . . . . .	521
	B. Preparation of Material Especially for Copy . . . . .	522
III.	Exposure . . . . .	523
	A. Effect of Magnification . . . . .	523
	B. Meter Setting . . . . .	523
	C. Change of Illuminant . . . . .	523
IV.	Selection of Material and Procedure for Line Copy . . . . .	525
	A. Black and White Line Copy . . . . .	525
	B. Coloured Line Copy . . . . .	526
V.	Selection of Material and Procedure for Continuous Tone Copy . . . . .	527
	A. Monochrome Continuous Tone Copy . . . . .	527
	B. Coloured Continuous Tone Copy . . . . .	529
VI.	Trace Recordings on Paper . . . . .	529
	A. Spark Records . . . . .	529
	B. "Print Out" Recording Papers . . . . .	529
	C. Smoked Drum Traces . . . . .	530
	D. Pen Traces on Paper . . . . .	530
VII.	Invisible Radiation in Copying . . . . .	530
VIII.	Copying in Colour . . . . .	530
	A. General . . . . .	530
	B. Limitations of Colour Materials . . . . .	530

C. Illumination . . . . .	531
D. Monochrome Originals . . . . .	531
TRANSPARENT AND TRANSLUCENT ORIGINALS	
IX. Equipment and Optics . . . . .	532
A. Cameras and Lenses . . . . .	532
B. Lighting . . . . .	532
C. Copyholding Equipment . . . . .	532
X. Exposure . . . . .	532
XI. Selection of Material and Procedure for Monochrome Copy . . . . .	533
XII. Reproduction of Radiographs . . . . .	533
A. General . . . . .	533
B. Equipment . . . . .	534
C. Selection of Material and Procedure for Radiographs . . . . .	534
D. Control of Contrast . . . . .	534
E. Printing from the Intermediate Transparency . . . . .	538
F. Reproduction by Reversal . . . . .	539
G. Reproducing Radiographs on Colour Film . . . . .	539
XIII. Fluorescent Screens and Traces . . . . .	540
XIV. Conversion of Monochrome Slides . . . . .	540
XV. Duplication of Colour Transparencies . . . . .	540
A. General . . . . .	540
B. Photography of the Projected Image . . . . .	541
C. Photography of the Transilluminated Transparency . . . . .	541
D. Limitations of Direct Colour Copying . . . . .	542
XVI. Monochrome Reproduction of Colour Transparencies . . . . .	543
A. Preparation of a Negative . . . . .	543
B. The Polaroid Process . . . . .	543
XVII. Lantern Slides . . . . .	544
A. Format and Standards . . . . .	544
B. Printing Lantern Slides . . . . .	544
C. Line Diagram Slides . . . . .	545
D. Design of Non-pictorial Slides . . . . .	546
E. Mounting Lantern Slides . . . . .	548
F. Marking Lantern Slides . . . . .	548
G. Storage of Lantern Slides . . . . .	549
References . . . . .	550

#### Chapter 14 CLOSED-CIRCUIT TELEVISION:

B. SHACKEL AND G. R. WATSON . . . . .	553
I. Introduction . . . . .	554
II. The Uses of Television . . . . .	555
III. Examples of Application . . . . .	556
IV. How Television Works . . . . .	560
A. Standard Electronic System . . . . .	560
B. Flying Spot Scanner System . . . . .	562
V. How Television Works—Basic Principles . . . . .	563
A. The Camera Tube . . . . .	563
B. Scanning . . . . .	565
C. The Television Waveform . . . . .	568

D. Synchronizing Pulses . . . . .	568
E. Distribution Methods . . . . .	569
F. The Television Viewing Unit . . . . .	570
VI. Performance of the System as a Whole . . . . .	573
A. Resolution . . . . .	573
B. Bandwidth . . . . .	574
C. Noise . . . . .	576
D. Hum . . . . .	577
E. Linearity (Picture Geometry) . . . . .	578
F. Sensitivity . . . . .	579
G. Spectral Characteristics . . . . .	580
VII. Camera Tubes and Similar Devices . . . . .	581
A. Grey Scale and Light Transfer Characteristics (Gamma Law) . . . . .	581
B. Vidicons . . . . .	582
C. The Plumbicon . . . . .	582
D. The Image Orthicon . . . . .	583
E. The C.P.S. Emitron . . . . .	584
F. Image Intensifiers and Image Converters . . . . .	584
VIII. Lenses for Television Cameras . . . . .	589
A. Difference Between Photography and Television . . . . .	589
B. Focal Lengths for Various Tubes and Viewing Angles . . . . .	589
C. Viewing Angle and Object Movement . . . . .	590
IX. Special Purpose Systems . . . . .	591
A. Ultraviolet Microscopy . . . . .	591
B. Infra-red Camera . . . . .	591
C. X-ray Display . . . . .	592
D. Electronic Shutter . . . . .	593
E. Colour Television . . . . .	594
X. Recording Television . . . . .	595
A. Still Photography . . . . .	595
B. Ciné Photography . . . . .	595
C. Magnetic Tape Recording . . . . .	596
D. Single Field Magnetic Recorders . . . . .	596
E. Electrostatic Storage . . . . .	597
XI. Specifications and Evaluation . . . . .	597
A. Types of Camera Channels Available . . . . .	598
B. Specifications . . . . .	600
C. Assessment of Camera Channel . . . . .	603
XII. Conclusion . . . . .	604
