

## *Contents*

Preface	ix
Chapter 1 Introduction	1
Chapter 2 Basic Foundations	7
2.1 Fundamentals of Optical Fibers	7
2.1.1 Refraction and Total Internal Reflection	7
2.1.2 The Step-Index Fiber	8
2.1.3 The Graded-Index Fiber	10
2.1.4 Light Acceptance and Optical Power Distribution	13
2.1.5 The Single-Mode Fiber	16
2.1.6 Optical Losses and Their Causes	16
2.1.7 Fabrication Processes for Optical Fibers	19
2.2 Fundamentals of Fiber Optic Measuring Techniques	23
2.2.1 Photodetectors for Measuring Purposes	23
2.2.2 Measurement of Attenuation	24
2.2.3 Measurement of Backscattering	26
2.2.4 Measurement of Bandwidth	28
2.2.5 Other Measuring Techniques	31
Chapter 3 Foundations of Systems Theory	39
3.1 Time Function and Frequency Spectrum	39
3.1.1 The Fourier Transform	39
3.1.2 Moments of the Time Function	49
3.1.3 Moment Expansion of the Spectral Function	52
3.2 The Transfer Function of a Linear System	55
3.2.1 Transmission of Pulses	55
3.2.2 Interpretation of Pulse Measurements	60
Chapter 4 Propagation of Light Waves	65
4.1 Propagation of Light Waves in Glass	65
4.1.1 The Plane Light Wave	65
4.1.2 Wavelength Dependence of the Refractive Index of Glasses	66

4.1.3	Material Dispersion	72
4.2	Wave Propagation in Optical Fibers	79
4.2.1	Laterally Bounded Light Waves and Gaussian Beams	79
4.2.2	Wave Equation and Modes of the Optical Fiber	85
4.2.3	The Group Delay of Modes	96
Chapter 5	Single-Mode Fibers	109
5.1	Characterization of Single-Mode Fibers	109
5.1.1	Fundamental Mode and Second-Mode Cutoff	109
5.1.2	Measurement of the Refractive-Index Profile and Cutoff Wavelength	116
5.1.3	The Mode-Field Radius	128
5.1.4	The Equivalent Step-Index Profile	139
5.2	Operating Characteristics of Single-Mode Fibers	146
5.2.1	Attenuation and Attenuation Measurement	147
5.2.2	Group Delay and Transmission Bandwidth	157
5.2.3	Influence on Bandwidth of Various Effects	166
Chapter 6	Multimode Fibers	177
6.1	Extended Ray Optics for Multimode Fibers	177
6.1.1	Mode Calculations Using the WKB Approximation	178
6.1.2	Number of Modes and Leaky Modes	185
6.1.3	Modes in Phase Space	189
6.1.4	Special Considerations for Multimode Measurements	200
6.2	Operating Characteristics of Multimode Fibers	206
6.2.1	Group Delay in Multimode Fibers	206
6.2.2	Transit Time Differences and Profile Optimization	211
6.2.3	The Bandwidth of Long Fibers	223
6.2.4	Chains of Dissimilar Fibers	230
Chapter 7	Optical Fiber Transmission Systems	241
7.1	Mathematical Model of a Transmission System	241
7.1.1	Mathematical Description of the System Elements	242
7.1.2	Combined Effect of the System Elements	248
7.2	Optical Transmitters	252
7.2.1	Light-Emitting Diodes	253
7.2.2	Laser Diodes	263
7.2.3	Fluctuation Phenomena in Optical Transmitters	276
7.3	Optical Receivers	288
7.3.1	Photodetectors	289
7.3.2	Noise in Receivers	292
7.3.3	Heterodyne Detection	305
7.4	Potential and Limitations of Transmission Systems	311
Appendix:	BASIC Programs for Optical Fibers	317
	Program 1: Pulse Analysis	318
	Program 2: Function Fitting	321

Program 3: Fundamental Mode of Step-Index Fiber	323
Program 4: Wave Equation of Fundamental Mode	324
Program 5: Second Mode Cutoff	327
Program 6: Equivalent Step-Index Profile	328
Program 7: Multimode Dispersion	329
Program 8: WKB Dispersion Calculation	332
Program 9: Mode Mixing	332
Program 10: Fiber Concatenation	335
Program 11: Extrapolation of $B(L)$	337
Program 12: Transmission System	338
List of Symbols	345
Bibliography	351
References	351
Select Bibliography	368
Index	373
