

Contents

chapter 1. Review of Electromagnetic Theory	1
1.1. Maxwell's Equations, 1.	
1.2. Wave Equations, 2.	
1.3. Plane Waves, 4.	
1.4. Reflection and Transmission at a Boundary, 7.	
1.5. Radiation from a Dipole Source, 8.	
Additional Reading, 11.	
Problems, 12.	
chapter 2. Normal Modes of Matter	14
2.1. Degrees of Freedom, 14.	
2.2. Normal Coordinates, 15.	
2.3. Normal Modes, 18.	
2.3.1. Local Modes, 19.	
2.3.2. Collective Modes, 21.	
Additional Reading, 26.	
Problems, 27.	
chapter 3. The Interaction of Light with Matter (2)¹	29
3.1. Dipole Active Modes, 30.	
3.2. Dipole Active Modes Interacting with Electromagnetic Fields, 32.	
3.2.1. Doppler Broadening, 35.	
3.2.2. Absorption Lines, 36.	
3.3. Raman Active Modes, 37.	
3.4. Electromagnetic Field-Raman Active Mode Interaction, 39.	
3.5. Doppler-Free Two-Photon Interaction, 41.	
Additional Reading, 44.	
Problems, 44.	

¹ Indicates chapter needed as background.

chapter 4. Electrodynamics in Dilute Media (1,3.1,3.2)	49
4.1. Absorption of Radiation, 49.	
4.2. Scattering Cross Section, 55.	
4.3. Dispersion in the Refractive Index, 56.	
4.3.1. Projections, 56.	
4.3.2. Refractive Index, 60.	
4.4. Optical Spectra, 64.	
4.5 Limits of Validity, 65.	
Additional Reading, 65.	
Problems, 66.	
chapter 5. Macroscopic Electrodynamics (1,3.1,3.2)	69
5.1. Wave Propagation in Dense Matter, 69.	
5.2. Local Fields, 73.	
5.3. Sellmeier Formulae, 75.	
5.4. Poynting Vector, 76.	
5.5. Dipole Averages in Dense Matter, 77.	
5.5.1. Gas Molecules with Permanent Dipole Moments, 77.	
5.5.2. Molecular Diffusion Effects in Dense Gases and Liquids, 78.	
Additional Reading, 80.	
Problems, 80.	
chapter 6. Optical Activity (1,3.1,3.2,B)	82
6.1. Effect of Magnetization on Polarization, 82.	
6.2. Physical Basis of Optical Activity, 84.	
6.3. Electromagnetic Propagation in Optically Active Media, 86.	
Additional Reading, 90.	
Problems, 90.	
chapter 7. Crystal Optics (5.1,5.4)	93
7.1. Physics of Crystal Optics, 93.	
7.2. Crystal Classes and Principal Axes, 96.	
7.3. Optical Propagation in Crystals, 99.	
7.4. Terminology, 105.	
7.5. Device Applications, 108.	
7.6. Optical Activity and Dichroism in Crystals, 110.	
Additional Reading, 110.	
Problems, 111.	
chapter 8. Electro-Optics (7)	114
8.1. The Pockels Effect, 115.	
8.2. The Kerr Effect, 121.	
8.2.1. Electronic Kerr Effect, 121.	
8.2.2. Kerr Effect in Liquids, 122.	
8.3. The Pockels Effect in Crystals with Tetrahedral Structures, 128.	
8.4. Electro-Optic Devices, 131.	
8.5. Limitations of the Electro-Optic Effect, 138.	
Additional Reading, 139.	
Problems, 139.	

<p>chapter 9. Magneto-Optics (6)</p> <p>9.1. Faraday and Zeeman Effect, 141.</p> <p>9.2. Practical Applications, 144.</p> <p>9.3. Faraday Isolators, 145. Additional Reading, 147. Problems, 147.</p>	<p>141</p>
<p>chapter 10. Electrodynamics of Weak Polarizations (4, 7.3)</p> <p>10.1. Slowly Varying Amplitude and Phase Approximation, 148.</p> <p>10.2. A Simple Example: Absorption, 152.</p> <p>10.3. Another Example: Faraday Effect, 153.</p> <p>10.4. Radiation from a Phased Array of Dipoles, 154.</p> <p>10.5. Phased Array of Susceptibility: Bragg Reflection, 156. Additional Reading, 158. Problems, 158.</p>	<p>148</p>
<p>chapter 11. Bulk Acousto-Optics (10,2.3.2)</p> <p>11.1. Weak Polarization, 163. 11.1.1. Acoustic Strain Fields, 165. 11.1.2. Electrostrictive Coupling--Longitudinal Waves, 168. 11.1.3. Elasto-Optic Effect, 170.</p> <p>11.2. Deflected Optical Fields, 171. 11.2.1. General Treatment--Scattering Regimes, 172. 11.2.2. Raman-Nath Regime, 176. 11.2.3. Bragg Regime, 177. 11.2.4. Manley-Rowe Relations, 180.</p> <p>11.3. Acousto-Optic Devices, 181. 11.3.1. Acousto-Optic Modulators, Deflectors and Scanners, 181. 11.3.2. Devices in Laser Cavities, 183. 11.3.3. Acousto-Optic Spectrum Analyzer, 184. Additional Reading, 185. Problems, 185.</p>	<p>163</p>
<p>chapter 12 Scattering (4,10)</p> <p>12.1. Formal Development of the Scattering Problem, 189. 12.1.1. The Scattered Fields, 189. 12.1.2. Scattered Light Spectrum, 191. 12.1.3. Statistical Fluctuations, 193. 12.1.4. Polarization Properties, 195.</p> <p>12.2. Rayleigh Scattering, 197. 12.2.1. Weak Susceptibility, 197. 12.2.2. Frequency Spectrum, 199. 12.2.3. Depolarization Ratios, 199.</p> <p>12.3. Raman Scattering (3.3,8.2.2), 202. 12.3.1. Weak Susceptibilities, 206. 12.3.2. Frequency Spectrum, 206. 12.3.2.1. Vibrational Raman Scattering, 206. 12.3.2.2. Rotational Raman Scattering, 208.</p> <p>12.4. Brillouin Scattering (11), 209. 12.4.1. Weak Polarization, 209. 12.4.2. Statistical Fluctuations, 210.</p>	<p>187</p>

- 12.4.3. Frequency Spectrum of Scattered Light, 213.
- 12.5. Characteristics of the Optical Scattering Spectra, 214.
 Additional Reading, 215.
 Problems, 216.

appendix A. Useful Formulae

219

- A.1. Vectors and Tensors, 219.
- A.2. Identities (1), 221.
 - A.2.1. Vector Identities, 221.
 - A.2.2. Vector Calculus, 221.
 - A.2.3. Vector Integrals, 222.
 - A.2.4. Dyad Identities and Calculus, 222.
- A.3. Notation (2), 222.
 - A.3.1. Conventions for Subscripts, 223.
 - A.3.2. Coordinate Notation, 223.
- A.4. Amplitude Notation (1,10), 224.
- A.5. Relationships Involving Plane Waves (1), 225.
- A.6. Slowly Varying Fields (10), 226.
- A.7. Harmonic Oscillators (2,3), 227.
- A.8. Dipoles and Forces (3), 227.
 - A.8.1. Dipole Active Modes, 228.
 - A.8.2. Notation of Optical Phenomenology, 228.
 - A.8.3. Raman Active Modes, 229.
 Additional Reading, 230.
 Problems, 230.

appendix B. Multipole Fields and Radiation Patterns (1)

233

- B.1. Vector and Scalar Potentials, 233.
- B.2. Electric Dipole and Quadrapole, 234.
- B.3. Magnetic Dipole, 238.
- B.4. Harmonic Decomposition of Sources and Fields, 240.
- B.5. Multipolar Expansion, 241.
- B.6. Magnetic Dipole Radiation, 242.
- B.7. Electric Quadrapole Radiation, 243.
- B.8. Comparison of Multipolar Radiation, 245.
 Additional Reading, 246.
 Problems, 246.
