Foreword	ix
Metrology and Optical Measurement	
A laser scanning camera for range data acquisition <i>G T Reid, S J Marshall, R C Rixon and H Stewart</i>	S1
Range measurement using dynamic fringe projection <i>M M Shaw, J T Atkinson, D M Harvey, C A Hobson and M J Lalor</i>	S4
TV holography in adverse environments <i>J T Malmø and O J Løkberg</i>	S8
Analysis of high-frequency vibrations using TV holography <i>S Ellingsrud and O J Løkberg</i>	S11
Photothermal deflection applied to thermal diffusivity measurements of ceramic (ferrite) materials <i>M Bertolotti, L Fabbri, C Sibilìa, A Ferrari, N Sparvieri and G Suber</i>	S14
The thermal non-linearity of semiconductor-doped glasses <i>M Bertolotti, A Ferrari, G Gnappi, A Montenero, C Sibilìa and G Suber</i>	S17
A miniature, battery operated laser Doppler anemometer <i>R G W Brown, J G Burnett and N Hackney</i>	S20
Laser Machining and Materials Processing	
Recent advances in laser processing of microelectronic materials and devices <i>I W Boyd</i>	S23
Imaging, Propagation and Scattering Through Random Media	
Polarisation effects in weak localisation of light <i>M P van Albada, M B van der Mark and A Lagendijk</i>	S28
Enhanced backscattering through a deep random phase screen <i>E Jakeman, P R Tapster and A R Weeks</i>	S32
A simple model for the structure constant of temperature fluctuations in the lower atmosphere <i>V Thiermann and A Kohnle</i>	S37
Optical measurement of the inner scale of turbulence <i>E Azoulay, V Thiermann, A Jetter, A Kohnle and Z Azar</i>	S41
Laboratory simulation of the scattering of a laser beam in a turbid atmosphere <i>P Bruscalioni, G Zaccanti and M Olivieri</i>	S45
Diffraction-limited astronomical infrared imaging through the turbulent atmosphere <i>J C Christou, J D Freeman, D W McCarthy Jr, F Roddier and J M Beckers</i>	S49
A Brillouin scattering study of sound velocity in single-component liquids up to 800 bar <i>H Bohidar, T Jøssang and J Feder</i>	S53
An imaging system based on temporal coherence differences <i>C J Duffy and D Hickman</i>	S56
Laser Spectroscopy	
Two- and three-photon ionisation transitions in caesium vapour <i>C M Houston, S L T Drysdale, R Jennings, A P Land, K W D Ledingham, R P Singhal, M H C Smyth, D T Stewart and M Towrie</i>	S59
Collisions between Sr Rydberg atoms of intermediate and high principal quantum numbers and noble gases at thermal energies <i>K-D Heber, P J West and E Matthias</i>	S63

Optical Materials and Coatings

Diamond turning of mirrors and infrared optical components <i>K Smith, R Winger, A H Lettington and P F T C Stillwell</i>	S67
A performance model for cooled IR filters <i>J S Seeley, G J Hawkins and R Hunneman</i>	S71
Adhesion of MOCVD TiO ₂ thin films <i>I Kandasamy and D T Gawne</i>	S75
Chalcogenide gratings produced by the metal photodissolution effect <i>A Zakery, C W Slinger, P J S Ewen, A P Firth and A E Owen</i>	S78
Kinetic study of growth of Cd(S, Se) microcrystals in a glass matrix <i>Fuyu Yan, J M Parker and B J Ainslie</i>	S82
Laser-induced damage mechanisms in model optical materials <i>C M MacDonald, S P McGeoch, A A McInnes, C H Nelson and A D Wilson</i>	S85
The measurement and specification of coating defects <i>L R Baker and J D Briers</i>	S88
Antireflection coatings for plastic optics <i>J Allen and A Tregunna</i>	S92

Holography

Geometrical and chromatic aberrations of an off-axis holographic mirror <i>C Liégeois and P Twardowski</i>	S96
Evaluation of a technique for the design and manufacture of an off-axis holographic lens in dichromated gelatin <i>H D Tholl, F Böttger and C G Stojanoff</i>	S99
Optimisation and fabrication of grating beamsplitters <i>J Turunen, A Vasara, J Westerholm, G Jin and A Salin</i>	S102
Spatial filtering in multiplex holography <i>P R Hobson and J Hong</i>	S106
Depth pseudo-colouring by two-step multimasked holograms <i>G Molesini, F Quercioli and B N Gupta</i>	S110

Optical Design and Instrumentation

The Infrared Space Observatory Camera: its optical design <i>E Atad-Ettinger and R Wade</i>	S113
--	------

Quantum Optics

Modelling of cross-talk between bistable elements forming arrays on an InSb etalon <i>H Richardson, E Abraham and C Godsalve</i>	S117
Arrays of non-linear thin-film microcavities <i>C Godsalve and E Abraham</i>	S121
The effect of DC field coupling on the photoelectron spectrum from double auto-ionising levels <i>W Leonski, R Tanaś and S Kielich</i>	S125
Interrupted fluorescence, quantum jumps and wavefunction collapse: II <i>D T Pegg and P L Knight</i>	S128
Photon-counting statistics of squeezed states in collective resonance fluorescence <i>Z Ficek, R Tanaś and S Kielich</i>	S131

Integrated and Fibre Optics

Refractive index gratings in optical fibres <i>P Papadopoulos and R J Potton</i>	S134
Mode count in planar graded-index waveguides <i>Ll Torner, F Canal and L de March</i>	S137
Microbending sensor for high-numerical-aperture fibres and its interrogation using short light pulses <i>A M Campbell and F Kvasnik</i>	S140
Fibre optic sensor multiplexing by FMAMCW <i>R Gallay, P Sandoz and Ph Robert</i>	S144

Realistic design of a WDM duplexer made from Ti:LiNbO ₃ optical filters <i>M De Sario, A D'Orazio and V Lanave</i>	S147
Influence of non-white phase noise on the performance of an optical heterodyne receiver <i>S Betti, G De Marchis, E Iannone and A Martellucci</i>	S150
Digital Optics	
Optical computing with liquid crystal devices <i>L E M Brackenbury and K B Mason</i>	S153
An amorphous silicon/chiral smectic spatial light modulator <i>D Williams, S G Latham, C M J Powles, M A Powell, R C Chittick, A P Sparks and N Collings</i>	S156
Beam ratio in multiple-exposure volume holograms <i>K Bazargan, X Y Chen, S Hart, G Mendes and S Xu</i>	S160
Multiple switching and fast effects in non-linear prism coupling to sharp-cut filter glass waveguides <i>G Assanto, C T Seaton and G I Stegeman</i>	S164
New Lasers	
cw multi-line operation of a hollow cathode, segmented element He–Cd ⁺ laser <i>H H Telle, I D Hopkin, P Ramalingam, H K Fun and C Grey Morgan</i>	S167
Gain as an optical diagnostic in the ENEA free-electron laser <i>F Ciocci, G Dattoli, A De Angelis, A Dipace, E Fiorentino, G P Gallerano, T Hermesen, T Letardi, A Marino, A Renieri, E Sabia, A Torre, D A Jaroszynski, C R Pidgeon and M F Kimmitt</i>	S171
Medical Applications of Electro-optics	
The use of optical matched filtering for the detection of cervical cancer <i>S C J Parker</i>	S174
Optical Bistability and Laser Instabilities	
A comparison between Fabry–Perot and travelling wave laser amplifiers in an 8 Gbps repeatered optical system using a time domain model <i>A J Lowery</i>	S177
Dynamics of a detuned, optically pumped far-infrared laser <i>J Pujol, F Laguarda, R Corbalán and R Vilaseca</i>	S180
Non-linear total reflection at a lyotropic liquid crystal/glass interface <i>M Bertolotti, E Fazio, A Ferrari and C Sibilía</i>	S184
Optical Pattern Recognition	
The use of bleached holographic filters in optical pattern recognition <i>M S I Valera and F Kvasnik</i>	S187
