Contents

Preface ... vii
Glossary ... xiii

CHAPTER 1. **Historical Introduction** ... 1

References ... 3

CHAPTER 2. **Geometrical Optics of Fibers** ... 5

1. Total Internal Reflection and Attenuated Total Internal Reflection ... 5
2. Meridional Ray Analysis ... 7
3. Skew Ray Analysis ... 26

References ... 34

CHAPTER 3. **Wave Propagation along Dielectric Cylinders** ... 36

1. Physical Optics of Large Fibers ... 37
2. Waveguide Mode Propagation ... 49
3. Mode Patterns ... 58
4. Evanescent Boundary Wave Propagation ... 65
5. Optical Waveguide Coupling ... 73

References ... 80

CHAPTER 4. **Image Transmission by Fiber Optics** ... 81

1. Static Scanning ... 82
2. Dynamic Scanning ... 88
3. Filtering of Fiber Graininess ... 100
4. Image Assessment ... 101

References ... 109

CHAPTER 5. **Fiber Optics Technology** ... 110

1. Introduction ... 110
2. Fiber Production ... 110
3. Fused Plates ... 121
4. Fiber Optics Cones ... 126
5. Flexible Fiberscope ... 128
6. Infrared Fiber Optics ... 134
7. Image Dissectors ... 137

References ... 139

CHAPTER 6. **Fiber Testing** **141**

1. Cylindricity and Surface Structure 141
2. Fiber Homogeneity 150
3. Refractive Index of Fibers 155
4. Fiber Transmission 160
5. Fiber Scattering 164
6. Other Measurements 168

References 170

CHAPTER 7. **Fiber Optics in Medicine** **171**

1. Fiber Endoscopy 171
2. Hypodermic Probe 185
3. *In Vivo* Spectrophotometry 188
4. Laser-Fiber Optics in Medicine 197

References 205

CHAPTER 8. **Fiber Optics in Photoelectronics** **206**

1. Photometric Efficiency on Lambertian Excitation 209
2. Diffuse Modulation Transfer Function 213
3. Resolution Loss on Coupling 216
4. Interstitial Opaque Coating (EMA) 218
5. Photocathode Poisoning 218
6. Vacuum Tightness 219
7. Cathode Ray Tubes 219
8. Image Intensifiers 223

Supplement: Image Transfer Using Thin Membranes 229

References 232

CHAPTER 9. **Fiber Optics in Photography** **233**

1. Field Flattener 233
2. Conical Condenser 238
3. Distortion Corrector 240
4. Focon Resolution and Effective Photographic Speed 241
5. Optical Design Improvement Using Field Flattener and Conical Condenser ... 245
6. Focon-Performance Characteristics 246

References 254

CHAPTER 10. **Fiber Optics in High-Speed Photography** **255**

1. Fiber Optics Image Dissectors 256
2. Rotating Drum Camera with Rectangular-to-Strip Conversion Image Dissector 258
3. Other Designs 260
4. Infrared, Ultraviolet, and X-Ray High-Speed Photography 265
5. High-Speed Camera Using Image Tube and Fiber Optics Image Dissector ... 268

References 269

CHAPTER 11. **Infrared Fiber Optics** **271**

1. Infrared Fiber Optics Materials 271
2. Infrared Fiber Optics Components 274
3. Spectral Characteristics of Infrared Fiber Optics 275

References 288

CHAPTER 12. **Active Fibers** **289**

1. Fiber Laser 289
2. Fiber Laser Amplifier 291
3. Fiber Laser Trigger 293
4. Coupled Fiber Lasers 295
5. Luminescent Fibers 298
6. Other Active Fibers 302

References 304

CHAPTER 13. **Other Applications** **305**

1. Fiber Optics in Nature 305
2. Ultraviolet Fiber Optics 308
3. Imaging Conduits 311
4. Image Inverter 312
5. Image Dissector 313
6. Coder-Decoder 317
7. Audiofrequency Information Processing 318
8. Proximal Scanning 321
9. Plastic Fibers 325

References 326

CHAPTER 14. **Radiation Characteristics of Fibers** **327**

1. Straight Fibers 327
2. Curved Fibers 331
3. Dielectric Waveguide Radiation Characteristics 334
4. Fiber Diffraction Mosaic 351

References 351

APPENDIX A. **Image Transmission Characteristics of Fiber Bundles** ... **352**
Hitoshi Ohzu

Introduction 352
Image Transmission Characteristics 353
Light Flares in a Fiber Bundle 365
Image Quality Measurement 369
Conclusions 371
References 371

APPENDIX B. **The Retina as a Fiber Optics Bundle** **372**
J. M. Enoch

Introduction 372
Anatomy 373
The Optical Properties of Single Mammalian Photoreceptors 376
Functional Roles Played by These Properties 380
Future Research 393
References 395

APPENDIX C. **Space Variant Imagery in Fiber Optics** **397**
M. Vanwormhoudt and W. De Kinder

Introduction 397
Linearity 397
General Properties of the Kernel 398
Evaluation of the Kernel Function 400
Edge Response Evaluation $\mathscr{E}(x, X_0)$ 400
Line Spread Function $\mathscr{L}(x, X_0)$ 403
Modulation Transfer Function 405
Discussion of Results 406
Conclusion 409
References 409

FIBER OPTICS BIBLIOGRAPHY **410**

Author Index 419
Subject Index 423
