CONTRIBUTORS	ix
FOREWORD	xi
PREFACE	xiii
CONTENTS OF OTHER VOLUMES	xvii

CHAPTER 1

Basic Algorithms for Optical Engineering

George W. Hopkins

I. INTRODUCTION	1
II. THICK LENS PROGRAM	2
III. RADIATION SLIDE RULE PROGRAM	9
IV. RAY TRACING PROGRAM	16
V. FINAL COMMENTS	31
REFERENCES	31

CHAPTER 2

Diffraction Gratings, Ruled and Holographic

Erwin G. Loewen

I. DIFFRACTION BEHAVIOR OF GRATINGS	33
II. OPTICAL METHODS FOR GRATING PRODUCTION	49
III. CONCAVE GRATINGS	54
IV. ABERRATION CONTROL OF CONCAVE GRATINGS	57
REFERENCES	70

CHAPTER 3

Recording and Reading of Information on Optical Disks

G. Bouwhuis and J. J. M. Braat

I. INTRODUCTION	73
II. DESCRIPTION OF THE THREE OPTICAL SYSTEMS FOR INFORMATION STORAGE ON DISKS	74
III. SCANNING SPOT MICROSCOPY FOR RECORDING AND READING OF OPTICAL DISKS	81
IV. TRACKING SYSTEMS	101
V. FINAL REMARKS	107
REFERENCES	108

CHAPTER 4

The Perfect Point Spread Function

David E. Stoltzmann

I. INTRODUCTION	111
II. COMPUTATION OF THE POINT SPREAD FUNCTION	113
III. COMPUTATION OF THE ENCIRCLED ENERGY FUNCTION	120
IV. POINT SPREAD FUNCTION MINIMA AND MAXIMA; EXAMPLE: PSF MAXIMA	121
V. RESOLUTION CRITERIA BASED ON THE POINT SPREAD FUNCTION	126
VI. TWO-POINT RESOLUTION FOR INCOHERENT SOURCES	126
VII. TWO-POINT RESOLUTION FOR COHERENT SOURCES	131
VIII. CONCLUSION	148
REFERENCES	148

CHAPTER 5

Multiple Aperture Telescope Diffraction Images*Aden B. Meinel, Marjorie P. Meinel, and Neville J. Woolf*

I. INTRODUCTION	150
II. ATLAS OF DIFFRACTION IMAGES	152
III. QUANTITATIVE ANALYSIS OF PATTERNS	185
REFERENCES	200

CHAPTER 6

Displays and Simulators*Neil Mohon*

I. INTRODUCTION	204
II. REAL IMAGE DISPLAYS	208
III. VIRTUAL IMAGE DISPLAYS	234
IV. IMAGE GENERATORS	257

CHAPTER 7

Ophthalmic Optics*J. Warren Blaker*

I. INTRODUCTION	283
II. THE EYE AND THE NATURE OF REFRACTIVE ERROR	284
III. SPECTACLE CORRECTION	290
IV. CONTACT LENSES	293
V. APHAKIA	298
VI. LOW VISION	303
VII. POSTSCRIPT	306
REFERENCES	306

CHAPTER 8

**Canonical and Real-Space Coordinates Used in the Theory of
Image Formation***H. H. Hopkins*

PREFACE	308
INTRODUCTION	308
I. THE GEOMETRICAL NATURE OF IMAGE FORMATION	311
II. CANONICAL COORDINATES: AXIAL PENCILS	313
III. CANONICAL COORDINATES: EXTRA-AXIAL PENCILS	315
IV. CANONICAL RELATIONS	322
V. CANONICAL COORDINATES AND THE PHYSICAL THEORY OF IMAGE FORMATION	324
VI. RELATIONS BETWEEN CANONICAL AND REAL-SPACE COORDINATES	331
VII. OBJECT-IMAGE RELATIONSHIPS: POINT AND GRATING MAGNIFICATIONS	342
VIII. SPECIAL CASES: OBJECT AT INFINITY	349
IX. THE CASE OF A COLLIMATOR WITH A LENS UNDER TEST	361
X. PHOTOMETRIC SIGNIFICANCE OF THE PUPIL SCALE RATIOS	362
APPENDIX: SUMMARY OF NOTATION AND FORMULAE	363
INDEX	371
