

CONTENTS

VOLUME 1: CURRENT AND VOLTAGE MEASUREMENTS

OVERVIEW OF APPLICATIONS AND NEEDS

Overview of Applications and Needs	1
M. F. Rose, A. K. Hyder, M. Kristiansen	

VOLTAGE AND CURRENT MEASUREMENTS

Electro-Optical Measurement Techniques	5
R. Hebner	
Electro-Optical and Magneto-Optical Studies of Cold Cathode Electron Beam Gun Discharges	27
M. Hugenschmidt	
Fiber Optic Magnetic Field and Current Sensors	41
G. Chandler	
An Electro-Optical Technique for Measuring High Frequency Free-Space Electric Fields	57
J. Chang and C. N. Vittitoe	
Electromagnetic Sensors and Measurement Techniques	73
C. E. Baum	
Ultrafast Electrical Voltage and Current Monitors	145
W. Pfeiffer	
High Speed Electric Field and Voltage Measurements	175
M. S. DiCapua	
High Speed Magnetic Field and Current Measurements	223
M. S. DiCapua	

Nuclear Reaction Diagnostics for Intense Particle Beam Measurements	263
R. J. Leeper	

Particle Analyzer Diagnostics for Intense Particle Beam Measurements	317
R. J. Leeper, J. R. Lee, L. Wissell, D. J. Johnson, and W. A. Stygar	

DATA ACQUISITION

Software Correction of Measured Pulse Data	351
N. J. Nahman	
Fiber Optic Links for Data Acquisition, Communication, and Control	419
G. Chandler	
A High Speed Multi-Channel Data Recorder	437
J. Chang, J. Foesch, and C. Martinez	
An Iterative Deconvolution Algorithm for the Reconstruction of High-Voltage Impulses Distorted by the Measuring System	445
K. Schon	
Test Methods for the Dynamic Performance of Fast Digital Recorders	453
K. Schon	

GROUNDING AND SHIELDING

Electromagnetic Topology for the Analysis and Design of Complex Electromagnetic Systems	467
C. E. Baum	
Basic Principles of Grounding and Shielding with Respect to Equivalent Circuits	549
J. Wiesinger	
System Design: Practical Shielding and Gounding Techniques Based on Electromagnetic Topology	567
W. Graf	
A Systematic, Practical Approach to the Design of Shielded Enclosures for Data Acquisition and Control	585
G. Chandler
