

OPTICAL COATINGS

Contents

Author Index	iv
Seminar Committee	v
Preface	vii
Douglas H. Harrison, Gary W. DeBell	
Interference Coatings—Practical Considerations	1
Douglas H. Harrison, Spectra-Physics	
Interference Coatings—How They Work	29
Verne R. Costich, Coherent Radiation	
Reflectance and Transmission Measurements	37
Philip Baumeister, The Institute of Optics, University of Rochester	
Effects and Measurement of Scattering and Absorption of Thin Films	43
Jay M. Eastman, Spectra-Physics	
Visible Anti-Reflection Coatings and Their Use	69
Gary W. DeBell, Spectra-Physics	
Visible and Ultraviolet Bandpass Filters	87
Edgar E. Barr, Barr Associates	
Infrared Coatings for 2-15 μm	119
Robert H. Miller, Graeme Hennessey, Valpey Corporation	
Polarizing Beamsplitters and Combiners	143
R. Russell Austin, Perkin-Elmer Corporation	
Interference Filters for Colorimetric Applications	153
Richard I. Seddon, Optical Coating Laboratory, Inc.	
Visual Circular Variable Filters	163
Dennis Kitchens, Optical Coating Laboratory, Inc.	
Interference Filters with Irregular Spectral Transmittance Characteristics	171
J. A. Dobrowolski, National Research Council of Canada	
How to Realize a 100 Å Bandpass Filter in an f/1 Optical System	183
Martin Baker, Martin Marietta Aerospace	
Miles of Coatings for Solar Applications	191
Dean B. McKenney, Helio Associates, Inc.	
Coatings—Quality Assurance Standards and Specifications	199
Roger A. West, Hughes Aircraft Company	
Optical Coating Needs of the Aerospace Industry	209
James E. Rogers, Hughes Aircraft Company	
Optical Interference in Partially-Fluorinated Thin Films of Parylene C	215
John N. Pike, Union Carbide Corporation	
Moisture Resistant and Anti-Reflection Optical Coatings Produced by Plasma Polymerization of Organic Compounds	229
John R. Hollahan, Tegal Corp.; Theodore Wydeven, Catherine C. Johnson, NASA Ames Research Center	
Thin Film Bibliography	239

OPTICAL COATINGS

Author Index

Austin, R. Russell (Perkin-Elmer Corporation)	143
<i>Polarizing Beamsplitters and Combiners</i>	
Baker, Martin (Martin Marietta Aerospace)	183
<i>How to Realize a 100 Å Bandpass Filter in an f/1 Optical System</i>	
Barr, Edgar E. (Barr Associates)	87
<i>Visible and Ultraviolet Bandpass Filters</i>	
Baumeister, Philip (The Institute of Optics, University of Rochester)	37
<i>Reflectance and Transmission Measurements</i>	
Costich, Verne R. (Coherent Radiation)	29
<i>Interference Coatings—How They Work</i>	
DeBell, Gary W. (Spectra-Physics)	vii, 69
<i>Preface</i>	
<i>Visible Anti-Reflection Coatings and Their Use</i>	
Dobrowolski, J. A. (National Research Council of Canada)	171
<i>Interference Filters with Irregular Spectral Transmittance Characteristics</i>	
Eastman, Jay M. (Spectra-Physics)	43
<i>Effects and Measurement of Scattering and Absorption of Thin Films</i>	
Harrison, Douglas H. (Spectra-Physics)	vii, 1
<i>Preface</i>	
<i>Interference Coatings—Practical Considerations</i>	
Hennessey, Graeme (Valpey Corporation)	119
<i>Infrared Coatings for 2-15 μm</i>	
Hollahan, John R. (Tegal Corp.)	229
<i>Moisture Resistant and Anti-Reflection Optical Coatings Produced by Plasma Polymerization of Organic Compounds</i>	
Johnson, Catherine C. (NASA Ames Research Center)	229
<i>Moisture Resistant and Anti-Reflection Optical Coatings Produced by Plasma Polymerization of Organic Compounds</i>	
Kitchens, Dennis (Optical Coating Laboratory, Inc.)	163
<i>Visual Circular Variable Filters</i>	
McKenney, Dean B. (Helio Associates, Inc.)	191
<i>Miles of Coatings for Solar Applications</i>	
Miller, Robert H. (Valpey Corporation)	119
<i>Infrared Coatings for 2-15 μm</i>	
Pike, John N. (Union Carbide Corporation)	215
<i>Optical Interference in Partially-Fluorinated Thin Films of Parylene C</i>	
Rogers, James E. (Hughes Aircraft Company)	209
<i>Optical Coating Needs of the Aerospace Industry</i>	
Seddon, Richard I. (Optical Coating Laboratory, Inc.)	153
<i>Interference Filters for Colorimetric Applications</i>	
West, Roger A. (Hughes Aircraft Company)	199
<i>Coatings—Quality Assurance Standards and Specifications</i>	
Wydeven, Theodore (NASA Ames Research Center)	229
<i>Moisture Resistant and Anti-Reflection Optical Coatings Produced by Plasma Polymerization of Organic Compounds</i>
