

Contents

Introduction	1
1. Geometric Optics	5
2. Characteristics of Light	60
3. Fourier Transforms	95
4. The Fourier Transform by Diffraction of Light	156
5. Optical Spectrum Analysis	237
6. Characteristics of Photographic Film	302
7. Optical Filtering and Correlation	324
8. Analysis of Optical Data Processing Systems	358
9. Zone Plates	387
10. Holography	453
11. Holographic Techniques	502
12. Properties and Techniques for Photographic Reproductions	549
Appendices	585
References	702
Index	707
