

Contents

1. Historical Introduction	1
2. Basic Arrangements for Holography	13
2.0 Introduction	13
2.1 Basic Description of Holography	13
2.2 Arrangements for Recording Plane Holograms	24
2.3 Arrangements for Recording Volume Holograms	27
3. General Theory of Plane Holograms	33
3.0 Introduction	33
3.1 Notation	33
3.2 Analysis	35
3.2.1 Fresnel Holograms	35
3.2.2 Fraunhofer Holograms	42
3.3 Phase Holograms	48
3.3.1 Introduction	48
3.3.2 Analysis	48
4. General Theory of Volume Holograms	54
4.0 Introduction	54
4.1 Fringes in Three Dimensions	55
4.2 Diffraction from a Three-Dimensional Grating	58
4.2.1 The Three-Dimensional Grating Equation	58
	ix

x Contents

4.2.2	The Pupil Function $(x, z)G$	61
4.2.3	The Bragg Condition	63
4.2.4	Wavelength Change	67
4.2.5	Orientation Sensitivity	69
4.2.6	Wavelength Sensitivity	73
4.3	Reflection Holograms	76
5.	Factors Affecting Image Resolution	83
5.0	Introduction	83
5.1	Reference and Illuminating Beam Source Size	83
5.2	Reference and Illuminating Beam Bandwidth	91
5.3	Effect of the Recording Medium	95
5.3.1	Introduction	95
5.3.2	Fourier Transform Holograms	95
5.3.3	Fresnel Holograms	99
5.4	Third-Order Aberrations	109
5.4.1	Introduction	109
5.4.2	Analysis	109
5.4.2.1	Magnification	110
5.4.2.2	Third-Order Aberrations	112
6.	Practical Considerations	118
6.0	Light Sources for Holography	118
6.0.1	The Gas Laser	118
6.0.1.1	Temporal Coherence	118
6.0.1.2	Spatial Coherence	126
6.0.2	The Solid State Laser	127
6.0.3	Line Source	133
6.1	Recording Media for Holography	135
6.1.1	Resolution and Bandwidth Requirements	135
6.1.1.1	Recording the Signal	135
6.1.1.2	Recording the Field of View	137
a.	Fourier Transform Holograms	137
b.	Fresnel Holograms	138

	Contents	xi
c. Lensless Fourier Transform Holograms		139
6.1.2 The Transfer Characteristic of the Recording Medium		140
6.1.2.1 Introduction		140
6.1.2.2 Analysis		141
6.1.2.3 The Transfer Curve		145
a. Amplitude Transmittance vs. Exposure Curve		146
b. Amplitude Transmittance vs. Log-Exposure Curve		150
c. Density vs. Log-Exposure Curve		151
6.1.2.4 Experiments		153
a. Introduction		153
b. Amplitude Transmittance		153
c. Ratio of First- to Zero-Order Flux as a Function of Density		154
d. Beam Balance Ratio		154
e. Object Size		156
6.2 Object Motion		158
6.2.1 Introduction		158
6.2.2 The Hologram as a Temporal Filter		159
6.2.3 Linear Motion of the Object		160
6.2.4 Effect of Linear Object Motion on the Image		164
6.2.5 Oscillatory Motion of the Object		165
6.2.6 Effect of Oscillatory Object Motion on the Image		167
6.2.7 Effect of Motion of the Recording Medium		168
7. Color Holography		173
7.0 Introduction		173
7.1 Analysis		175
7.2 Colorimetry		182
8. Applications for Holography		185
8.0 Introduction		185
8.1 Holographic Interferometry		186

xii Contents

8.1.1	Introduction	186
8.1.2	Single-Exposure Holographic Interferometry	187
8.1.3	Double-Exposure Holographic Interferometry	193
8.1.4	Time-Average Holographic Interferometry	197
8.1.5	Contour Generation	199
8.2	Correcting Aberrated Wavefronts with Holograms	202
8.3	Matched Filtering and Character Recognition	206
8.4	Holographic Microscopy	211
8.5	Imagery through Diffusing Media	214
8.6	Three-Dimensional Observation	216
8.7	Information Storage	217
8.7.1	Introduction	217
8.7.2	Coherent and Incoherent Superposition	217
8.7.3	Storage Capacity	220
8.8	Ultrasonic Holography	226
Appendix	Fourier Transforms with Lenses	229
A.0	Introduction	229
A.1	Analysis	229
