<b>Chapter 1. Coherent Optics, Holography, and Holographic Interferometry</b>	<b>1</b>
1.1 Introduction	1
1.2 Light, Interference, and Coherence	1
1.3 Diffraction and Spatial Filtering	15
1.4 Laser Speckle	30
1.5 Holography	36
1.6 Holographic Interferometry	57
References	64
<b>Chapter 2. Opaque Objects: Measurement of Displacement and Deformation</b>	<b>67</b>
2.1 Introduction	67
2.2 Equations for Fringe Interpretation	68
2.3 Accuracy of Measurements	77
2.4 The Holodiagram	90
2.5 Alternative Methods of Fringe Readout	97
References	104
<b>Chapter 3. Opaque Objects: Formation and Localization of Fringes</b>	<b>107</b>
3.1 Introduction	107
3.2 Analysis of Fringe Localization	108
3.3 Fringe Localization with Collimated Illumination	111
3.4 Fringe Localization with Spherical Wave Illumination	122
3.5 Examples of Fringe Formation and Localization	123
3.6 Other Approaches to Fringe Formation and Localization	142
References	143

<b>Chapter 4. Opaque Objects: Measurement of Strain, Stress, Bending Moments, and Vibration; Applications</b>	<b>146</b>
4.1 Introduction	146
4.2 Measurement of Strain, Stress, and Bending Moments	147
4.3 Measurement of Mechanical Vibrations	177
4.3.1 Sinusoidal Vibrations	178
4.3.2 Separable Motions	183
4.3.3 Multiple Modes and Nonseparable Motions	187
4.3.4 Real-Time and Stroboscopic Interferometry	197
4.3.5 Temporally Modulated Holography	210
4.4 Applications	217
4.4.1 Nondestructive Testing	217
4.4.2 Medical and Dental Research	231
4.4.3 Solid Mechanics	233
References	245
 <b>Chapter 5. Transparent Objects: Fringe Formation and Localization</b>	 <b>254</b>
5.1 Introduction	254
5.2 Phase Objects and Refraction in Transparent Media	255
5.3 Holography and Interferometry with Phase Objects	264
5.4 Fringe Localization in Diffuse-Illumination Interferometry	284
5.5 Nonlinear Holographic Interferometry	295
References	308
 <b>Chapter 6. Transparent Objects: Fringe Interpretation, Special Techniques, and Applications</b>	 <b>311</b>
6.1 Introduction	311
6.2 Fringe Interpretation	311
6.2.1 Inversion Techniques	315
6.2.2 Errors Due to Refraction	329
6.3 Special Techniques: Multiple-Beam, Multiple-Wavelength, and Multiple-Pass Interferometry	334
6.4 Applications	344
6.4.1 Aerodynamics and Flow Visualization	344
6.4.2 Plasma Diagnostics	353
6.4.3 Heat and Mass Transfer	363
6.4.4 Stress Analysis	373
References	377

<b>Chapter 7. Related Measurement Techniques</b>	<b>387</b>
7.1 Introduction	387
7.2 Holographic Contour Generation	387
7.3 Speckle Photography and Speckle Interferometry	396
7.3.1 Speckle Photography	396
7.3.2 Speckle Interferometry	413
7.4 Projected Fringe Techniques	428
7.5 Techniques Incorporating Television Systems	435
7.6 Holographic Photoelasticity	438
References	452
