

Contents

| | |
|--|----|
| 1. <i>Continuous X-Rays</i> | 1 |
| 1.1 Invariance of Charge | 1 |
| 1.2 Electric Field Measured in a Moving Frame of Reference | 3 |
| 1.3 Field of a Point Charge Moving with Uniform Velocity | 4 |
| 1.4 Radiation from an Accelerated or Decelerated Charged Particle | 6 |
| 1.5 Transverse Radiation Field due to the Acceleration of an Electron to Low Velocity ($\beta < 1/3$) | 8 |
| 1.6 Maxwell's Equations | 10 |
| 1.7 Coulomb Potential | 11 |
| 1.8 Retarded Potentials | 13 |
| 1.9 Lienard-Wiechert Potentials | 16 |
| 1.10 Radiation from an Accelerated Charge | 17 |
| 1.11 Radiation at Low Velocities | 21 |
| 1.12 Polarization of Continuous X-Rays | 23 |
| 1.13 The Case of $\dot{\mathbf{v}}$ Parallel to \mathbf{v} | 25 |
| 1.14 Sommerfeld's Theory for the Spatial Distribution of Continuous X-Rays | 26 |
| 1.15 Frequency Spectrum of Continuous X-Rays | 29 |
| 1.16 Experimental Spectral and Spatial Distributions | 31 |
| 1.17 Shortcomings of Classical Theory | 34 |
| 1.18 Semiclassical Quantum Theory of Kramers | 35 |
| 1.19 Quantum Mechanical Considerations | 49 |
| 2. <i>Characteristic X-Rays</i> | 53 |
| 2.1 Line Emission | 53 |
| 2.2 Moseley Law | 56 |
| 2.3 Classical Oscillator Model | 59 |
| 2.4 Quantum Theory | 61 |
| 2.5 Ionization Function | 63 |
| 2.6 X-Ray Terms | 65 |
| 2.7 Energies of Atomic X-Ray Levels and Energy-Level Diagram | 69 |

| | | |
|------|---|-----|
| 2.8 | Electric-Dipole Selection Rules | 78 |
| 2.9 | Relative Intensities of Emission Lines in a Multiplet | 80 |
| 2.10 | Screening and Spin Doublets | 82 |
| 2.11 | Γ -Sum and Permanence Rules Applied to the X-Ray Doublet | 94 |
| | 2.11.1 Russell-Saunders (LS) Coupling | 94 |
| | 2.11.2 <i>jj</i> Coupling | 95 |
| 2.12 | Quantum Theory of Spontaneous Emission of X-Ray Lines and Multipoles | 100 |
| | 2.12.1 Spontaneous Electric-Dipole Transition | 102 |
| | 2.12.2 Spontaneous Higher-Multipole Transitions | 103 |
| 2.13 | Parity Selection Rules and Forbidden Lines | 104 |
| 2.14 | Absorption Discontinuities | 108 |
| 2.15 | Comparison of Optical and X-Ray Spectra | 116 |
| 2.16 | Nomenclature of X-Ray Lines | 117 |
| 3. | <i>Interaction of X-Rays with Matter</i> | 121 |
| 3.1 | Free, Damped, Oscillator | 121 |
| 3.2 | Form and Width of Lines | 123 |
| 3.3 | Forced, Damped, Oscillator | 126 |
| 3.4 | Complex Dielectric Constant | 127 |
| 3.5 | Refractive Index | 130 |
| 3.6 | Correction of the Bragg Equation | 133 |
| 3.7 | Measurement of Refractive Index | 136 |
| | 3.7.1 The Method of Critical Angle of Reflection | 136 |
| | 3.7.2 The Method of Symmetrical Reflection | 137 |
| | 3.7.3 The Method of Unsymmetrical Reflection | 138 |
| | 3.7.4 The Method of Refraction in a Prism | 140 |
| 3.8 | Absorption of X-Rays and Dispersion Theory | 141 |
| | 3.8.1 Absorption by an Undamped Oscillator | 141 |
| | 3.8.2 Absorption by a Damped Oscillator | 145 |
| 3.9 | Kramers-Kallmann-Mark Theory of Refractive Index | 149 |
| 3.10 | Oscillator Strength and Quantum Theory of Dispersion | 153 |
| 3.11 | Quantum Theory of Line Shape and Photoabsorption Curve Shape . | 162 |
| 3.12 | Absorption Coefficients | 169 |
| | 3.12.1 Quantum Theory of Photoabsorption | 173 |
| | 3.12.2 Various Attenuation Processes | 175 |
| 3.13 | Absorption-Jump Ratios | 176 |
| 3.14 | Total Reflection | 177 |

| | |
|--|-----|
| 4. <i>Secondary Spectra and Satellites</i> | 181 |
| 4.1 Photoelectric Effect | 181 |
| 4.2 Quantum Theory of the Photoelectric Effect | 182 |
| 4.2.1 Born Approximation | 182 |
| 4.2.2 Dipole Approximation | 186 |
| 4.2.3 Shake-Up Structure | 186 |
| 4.3 Magnetic Spectra of Photoelectrons | 187 |
| 4.4 Auger Effect and Its Consequences in X-Ray Spectra | 190 |
| 4.4.1 Auger Effect and Widths of X-Ray Emission Lines and Absorption Edges | 192 |
| 4.4.2 Auger Effect and the Intensities of X-Ray Emission Lines | 193 |
| 4.5 Basic Theory of Auger Effect | 194 |
| 4.5.1 The Nonrelativistic Theory Based on Direct Interaction of Two Electrons | 194 |
| 4.5.2 Possible Auger Transitions of the Coster- Kronig Type ($X_i \rightarrow X_f Y$) | 197 |
| 4.5.3 Auger Transitions and Widths of L and M Levels | 200 |
| 4.5.4 Auger Transitions and Relative Intensities of L-Series Lines | 201 |
| 4.6 Detection of Auger Electrons | 202 |
| 4.7 Satellites | 204 |
| 4.7.1 Low-Energy Satellites | 211 |
| 4.8 Fluorescence | 213 |
| 4.9 Measurement of Fluorescence Yield | 216 |
| 4.10 Autoionization and Internal Conversions | 219 |
| 4.11 Muonic X-Rays | 221 |
| 5. <i>Scattering of X-Rays</i> | 223 |
| 5.1 Classical Theory of Thomson and Rayleigh (Coherent) Scattering | 223 |
| 5.2 Incoherent (Compton) Scattering | 227 |
| 5.3 Scattering by Bound Electrons | 232 |
| 5.3.1 Quantum-Mechanical Approach | 235 |
| 5.4 Scattering by Crystals (Laue Equations) | 235 |
| 5.5 X-Ray Raman and Plasmon Scattering | 237 |

| | |
|---|-----|
| 6. <i>Chemical Shifts and Fine Structure</i> | 241 |
| 6.1 Solid-State Effects and Bonding | 241 |
| 6.1.1 Metallic Bond | 241 |
| 6.1.2 Ionic and Covalent Bonds | 243 |
| 6.1.3 Hybridized Orbitals | 245 |
| 6.1.4 Coordination | 248 |
| 6.1.5 Ionic Character of Covalent Bonds | 249 |
| 6.2 Chemical Shifts of Emission Lines | 258 |
| 6.3 Width and Fine Structure of Emission Lines | 266 |
| 6.4 Absorption Spectroscopy | 270 |
| 6.5 Nature of the Main Absorption Edge and the White Line | 276 |
| 6.6 Chemical Shifts of Absorption Edges | 285 |
| 6.7 Extended Fine Structure of Absorption Edges | 288 |
| 6.7.1 Kronig's Theory for Diatomic Molecules | 289 |
| 6.7.2 Kronig's (lro) Theory for Crystalline Matter | 292 |
| 6.7.3 Hayasi's Modification of Kronig's (lro) Theory | 296 |
| 6.7.4 Short-Range-Order (sro) Theories | 297 |
| 6.7.5 Other Theories | 304 |
| 6.8 Isochromats | 308 |
| 7. <i>Soft X-Ray Spectroscopy</i> | 311 |
| 7.1 Conventional Sources | 312 |
| 7.2 Synchrotron as a Source | 314 |
| 7.3 Vacuum Spectrograph | 315 |
| 7.4 Detectors | 317 |
| 7.5 Emission Spectra | 317 |
| 7.6 Absorption-Spectra Recording | 326 |
| 7.7 Interpretation of Absorption Spectra | 327 |
| 8. <i>Experimental Methods</i> | 331 |
| 8.1 X-Ray Tubes | 331 |
| 8.2 Line-Focus Filament | 333 |
| 8.3 High-Tension Circuits | 334 |
| 8.4 Wavelength Units | 336 |
| 8.5 Plane-Crystal Spectrograph | 338 |
| 8.6 Curved-Crystal Spectrograph | 341 |

| | | |
|------------|---|-----|
| 8.7 | Double-Crystal Spectrometer | 346 |
| 8.7.1 | The Case of Zero Dispersion (Minus Position) | 349 |
| 8.7.2 | The Case of Nonzero Dispersion (Plus Setting) | 352 |
| 8.8 | Use of Ruled Gratings | 353 |
| 8.9 | Detectors | 354 |
| 8.9.1 | Photographic Films | 354 |
| 8.9.2 | Ionization Detectors | 355 |
| 8.9.3 | Solid-State Detectors | 356 |
| 8.9.4 | Pulse-Height Discriminator | 357 |
| 8.9.5 | Intensity Measurement | 357 |
| Appendix A | Rutherford Scattering for Attractive Field | 359 |
| A.1 | Equation of Hyperbola | 359 |
| A.2 | Rutherford Scattering | 360 |
| Appendix B | Bohr's Formula for Energy Loss | 362 |
| Appendix C | X-Ray Atomic Energy Levels | 365 |
| Appendix D | Electron Distribution among the Levels of Free Atoms .. | 366 |
| Appendix E | Curves Representing Values of Electron Energies | 369 |
| Appendix F | Quantization of the Electromagnetic Field | 370 |
| Appendix G | Dipole Sum Rule | 374 |
| Appendix H | Calculation of the Photoabsorption Coefficient | 375 |
| Appendix I | Screening Effect, According to Slater | 378 |
| Appendix J | Electronegativity Scale | 381 |
| | Wavelength Tables | 383 |
| | References | 387 |
| | Author Index | 401 |
| | Subject Index | 411 |
