SPECTROSCOPY WITHOUT LASERS, D.A. RAMSAY

Introduction	1
Electronic Spectra	3
Comparison of Classical and Laser Techniques	5
Philosophical Remarks	7

INFRARED LASERS FOR SPECTROSCOPY, W. URBAN

Survey of Lasers, Suitable for Spectroscopy in the Medium Infrared	9
The Colour Centre Laser	21
The Carbon Monoxide Laser	29

TUNABLE FAR INFRARED LASER SPECTROSCOPY, K.M. EVENSON, D.A. JENNINGS, AND M.D. VANEK

Introduction	43
Second Order Spectrometer	44
Third Order Spectrometer	44
Experimental Technique	47
Results	47
Conclusion	48

GENERATION OF COHERENT TUNABLE RADIATION, R. WALLENSTEIN

Introduction	53
Dye Lasers	53
Generation of Tunable UV and IR	54
Tunable VUV and XUV Radiation Generated by Frequency Mixing in Gases	55
Third-Order Frequency Conversion	55
Fifth-Order Frequency Mixing	57
Applications	58

TUNABLE COHERENT SOURCES FOR VACUUM ULTRAVIOLET SPECTROSCOPY,
B.P. STOICHEFF

Introduction	63
Stimulated Raman Scattering	64
Harmonic Generation and Frequency Mixing	67
Applications in Spectroscopy	75
Conclusions	86

THE FREE ELECTRON LASER, OFFSPRING OF SYNCHROTRON RADIATION,
S. LEACH

Introduction	89
Synchrotron Radiation	92
Insertion Devices	98
Harmonic Generation	111
Free Electron Laser	118
Electron Accelerators	134
Free Electron Laser Facilities	135
Summary of FEL Properties and Applications	141

LASER DOPPLER-FREE TECHNIQUES IN SPECTROSCOPY, B. CAGNAC

In Radiofrequency Domain	153
In Optical Domain	162
Applications of Two-Photon Spectroscopy	176

ATOMIC LASER SPECTROSCOPY, P.E.G. BAIRD

Laser Spectroscopy of Fundamental Systems	187
Atomic Beams, Laser Cooling, Atomic Traps and Rydberg Atoms	204
Optical Rotation Produced by Atoms	217

LASER RAMAN SPECTROSCOPY, L.D. BARRON

Introduction	241
Theory of Linear Raman Processes	248
Some New Aspects of Linear Gas Phase Raman Spectroscopy	258
Theory of Nonlinear Raman Processes	263
Coherent Raman Spectroscopy	269

TECHNIQUES IN MOLECULAR LASER SPECTROSCOPY, R.N. DIXON

Introduction	281
Laser Stark Spectroscopy	282
Laser Magnetic Resonance	291
Laser Induced Fluorescence	295
Double Resonance Spectroscopy	301

MULTIPHOTON IONIZATION SPECTROSCOPY WITH PHOTOELECTRON
AND MASS SPECTRAL ANALYSIS, S.D. COLSON

Introduction	309
Multiphoton Ionization Photoelectron Spectroscopy	311
Multiphoton Ionization Mass Spectroscopy	314
Preparation of Free Radicals in Molecular Beams	314
Applications of Laser Ionization Mass and Photoelectron Spectroscopy	316
Summary	323

MULTIPHOTON IONIZATION MASS SPECTROMETRY OF BIOMOLECULES,
J. GROTEMEYER AND E.W. SCHLAG

Introduction	325
Method	326
Results	331
Conclusion	342

UNIMOLECULAR DECAY OF ENERGY-SELECTED POLYATOMIC MOLECULAR
IONS BY RESONANCE-ENHANCED MULTIPHOTON IONIZATION IN A
REFLECTRON MASS SPECTROMETER, A. KIERMEIER, H. KÜHLEWIND,
H.J. NEUSSER, AND E.W. SCHLAG

Introduction	345
Photoelectron Kinetic Energy Analysis	346
Unimolecular Ion Decay in a Reflectron Time-of-Flight Mass Spectrometer	347
Conclusion	351

INFRARED SPECTROSCOPY OF MOLECULAR IONS, T. OKA

Production of Molecular Ions	353
Infrared Spectroscopy of Molecular Ions using Frequency Tunable Laser Sources	365

DYNAMICS OF THE PHOTODISSOCIATION OF SMALL MOLECULES,
P. ANDRESEN

Introduction	379
Experimental Techniques to Analyse Product Motion	380
Photodissociation of H ₂ O in the First Absorption Band	384
Weak and Strong Final State Interaction	394
Conclusions	417

LASER SPECTROSCOPY OF CHEMICAL INTERMEDIATES IN SUPERSONIC
FREE JET EXPANSIONS, S.C. FOSTER, R.A. KENNEDY, AND
T.A. MILLER

Introduction	421
Supersonic Free Jet Expansions	423
Spectroscopy of Ions	430
Neutral Free Radicals	438
Summary	447

THE INFRARED SPECTROSCOPY OF THE H_3^+ AND HD^+ MOLECULAR IONS
AT THEIR DISSOCIATION LIMITS, A. CARRINGTON, I.R. McNAB,
AND C.A. MONTGOMERIE

The Spectroscopy of H_3^+	451
The Spectroscopy of HD^+	456

THE INTERPRETATION OF VIBRATIONAL OVERTONE SPECTRA OBSERVED
BY FOURIER TRANSFORM AND LASER PHOTOACOUSTIC SPECTROSCOPY,
I.M. MILLS

Experimental Techniques	461
Anharmonicity in a Diatomic Molecule	462
A Simple Classical Model	464
A Simple Quantum Mechanical Model	466
Vibrational Band Intensities	475
Effects of Fermi Resonance, and Results on Dichloromethane	476
Nickel Tetracarbonyl	482
Discussion	482

INTERSTELLAR MASERS AND STAR FORMATION IN THE GALAXY,
G. WINNEWISSER

Introduction	491
Historical Notes	492
Interstellar Molecular Spectroscopy	495
Interstellar Masers	498
Future Perspectives	507

Index	509
-------	-----
