PREFACE	xv
ACKNOWLEDGMENTS	xvii

## CHAPTER ONE

### *Fourier Transform Spectroscopy*

INTRODUCTION	1
GENERAL ADVANTAGES OF FOURIER TRANSFORM SPECTROMETERS	1
SPECIFIC ADVANTAGES AND DISADVANTAGES OF INTERFEROMETERS	2
TWO-BEAM INTERFEROMETERS, THE ULTIMATE IN SPECTROMETERS	5
QUALITY FACTORS	7
SPECTRAL RANGES	9
APPLICATIONS OF FOURIER TRANSFORM SPECTROSCOPY	10
CONCLUSIONS	14
REFERENCES	15

## CHAPTER TWO

### *Historical Sketch and Crucial Ideas*

INTRODUCTION	16
MICHELSON AND HIS INTERFEROMETER	17
INTERFEROMETERS	18
FUNDAMENTALS OF FOURIER TRANSFORM SPECTROSCOPY	19
JACQUINOT ADVANTAGE	19
FELLGETT ADVANTAGE	23
STRONG'S GROUP	25
OTHER PIONEERING FOURIER TRANSFORM SPECTROSCOPISTS	26
CONCLUSIONS	30
REFERENCES	30

## CHAPTER THREE

*Fourier Analysis and Interferometry*

INTRODUCTION	33
DERIVATION OF THE BASIC INTEGRAL FOR FOURIER TRANSFORM SPECTROSCOPY	34
SHORT DERIVATION OF THE BASIC INTEGRAL FOR FOURIER TRANSFORM SPECTROSCOPY	39
COMPUTING SPECTRA	40
COHERENCE IN THE INTERFEROMETER	41
APPLICABILITY OF THE BASIC INTEGRAL EQUATION OF FOURIER TRANSFORM SPECTROSCOPY	42
PROVING THAT THE INTERFEROGRAM IS THE AUTOCORRELATION FUNCTION OF THE ELECTRIC FIELD	42
CONCLUSIONS	44
REFERENCES	44

## CHAPTER FOUR

*Sample Calculations of Spectra from Interferograms*

INTRODUCTION	45
ACADEMIC EXAMPLE OF THE USE OF EQ. (3-25)	45
PRACTICAL EXAMPLE OF THE USE OF EQ. (3-25): THE DOUBLET PROBLEM	47
CONCLUSIONS	49
REFERENCES	50

## CHAPTER FIVE

*Apodization—Mathematical Filtering*

INTRODUCTION	51
INTERFEROGRAM PRODUCED BY A MONOCHROMATIC SOURCE	52
COMPUTED SPECTRUM FROM INTERFEROGRAMS USING FINITE SCANS	54
APODIZATION AND RESOLUTION	56
INSTRUMENT LINE SHAPE AND CONVOLUTIONS	58
MATHEMATICAL FILTERING	59
CONCLUSIONS	61
REFERENCES	62

## CHAPTER SIX

*Resolution*

INTRODUCTION	63
INSTRUMENT BROADENING OF LINE (WITHOUT AND WITH APODIZATION)	63
SEPARATION OF RESONANCES WITH APODIZATION	64

## CONTENTS

ix

SEPARATION OF RESONANCES WITHOUT APODIZATION	65
COMPARISON OF LINE BROADENING AND THE SEPARATION OF RESONANCES	66
COUNTING FRINGES AND RESOLUTION	66
CONCLUSIONS AND GENERAL COMMENTS	67
REFERENCES	68

## CHAPTER SEVEN

### *Sampling Intervals*

INTRODUCTION	69
WHY SAMPLE?	69
SHAH FUNCTION	70
RELATING THE SAMPLED AND THE COMPLETE SPECTRA	72
EXPERIMENTAL COMMENTS	75
CONCLUSIONS	76
REFERENCE	77

## CHAPTER EIGHT

### *Asymmetric Interferometers and Amplitude Spectroscopy*

INTRODUCTION	78
GENERAL THEORY AND REFLECTION STUDIES: SOLIDS—SINGLE SURFACE	81
COMPLEX INVERSE FOURIER TRANSFORM OF THE INTERFEROGRAM	88
TRANSMISSION STUDIES: SOLIDS—SINGLE PASS (NO CHANNEL SPECTRA)	88
PHASE ERRORS OF $\pm 2\pi$ (INTEGER)	92
SHIFTING THE COMPUTATION ORIGIN TO THE GRAND MAXIMUM POSITION	94
TRANSMISSION STUDIES: SOLIDS—SINGLE PASS (WITH CHANNEL SPECTRA)	96
TRANSMISSION STUDIES: GASES—SINGLE PASS (BELL'S INTERFEROMETER)	97
TRANSMISSION STUDIES: GASES—DOUBLE PASS (ORDINARY MICHELSON INTERFEROMETER)	98
INTERFEROGRAMS FOR TRANSMISSION STUDIES	99
TRANSMISSION STUDIES: LIMITS ON SAMPLE THICKNESS	100
TRANSMISSION STUDIES: SOLID—TWO PASSES	101
TRANSMISSION STUDIES: LIQUIDS—DOUBLE PASS	102
ACCURATE LOW-TRANSMITTANCE MEASUREMENTS	105
CONCLUSIONS	106
REFERENCES	106

## CHAPTER NINE

### *Beamsplitters*

INTRODUCTION	108
SELF-SUPPORTING DIELECTRIC BEAMSPLITTERS	109
POLARIZATION IN DIELECTRIC-SHEET BEAMSPLITTERS	118

DIELECTRIC BEAMSPLITTERS ON SUBSTRATES	120
PHASE ERRORS DUE TO ABSORPTION	124
WIRE-GRID BEAMSPLITTERS	125
CONCLUSIONS	127
REFERENCES	128

## CHAPTER TEN

### *Spectral Filtering*

INTRODUCTION	129
SPECTRAL FILTERS FOR BELOW $400\text{ cm}^{-1}$	130
SPECTRAL FILTERS FOR BELOW $5000\text{ cm}^{-1}$	136
SPECTRAL FILTERS FOR BELOW $16,000\text{ cm}^{-1}$	137
SPECTRAL FILTERING WITH CHOPPERS	138
SPECTRAL FILTERING BY ELECTRONIC MEANS	138
CONCLUSIONS	139
REFERENCES	139

## CHAPTER ELEVEN

### *Field of View*

INTRODUCTION	141
INTERFEROGRAM DUE TO AN EXTENDED SOURCE	142
GENERAL TREATMENT	145
APPLYING THE GENERAL TREATMENT TO THE EXTENDED SOURCE PROBLEM	147
DISCUSSION OF THE INSTRUMENTAL PROFILE	148
INTERFERENCE FRINGES AND AN EXTENDED SOURCE	150
CONCLUSIONS	151
REFERENCES	152

## CHAPTER TWELVE

### *Phase Error and Sampling Problems*

INTRODUCTION	153
SAMPLING PHASE ERRORS	154
SAMPLING PHASE ERRORS AND TWO-SIDED INTERFEROGRAMS	157
GENERAL PHASE ERRORS	159
ORIGIN SHIFTS CORRECTED BY CURVE FITTING	166
CONCLUSIONS	167
REFERENCES	168

## CHAPTER THIRTEEN

*Procedures for Choosing Experimental Parameters*

INTRODUCTION	169
EXPERIMENTAL PARAMETERS	170
CONCLUSIONS	178
REFERENCES	179

## CHAPTER FOURTEEN

*Sample Interferograms and Spectra*

INTRODUCTION	180
REPRODUCIBILITY OF SCANS AND SIGNAL AVERAGING	181
READING INTERFEROGRAMS	183
TRANSMISSION STUDIES OF SOLIDS	188
TRANSMISSION STUDIES OF LIQUIDS	189
TRANSMISSION STUDIES OF GASES	191
REFLECTION STUDIES	192
EMISSION STUDIES	192
PLANETARY ATMOSPHERES AND ASTRONOMY	195
CONCLUSIONS	198
REFERENCES	198

## CHAPTER FIFTEEN

*Lamellar Grating Interferometers*

INTRODUCTION	200
PLANE, LAMELLAR GRATING INTERFEROMETERS AND EFFICIENCY OF THE BEAMSPLITTER	201
DIFFRACTION THEORY AND LAMELLAR GRATINGS	206
HIGH-ORDER DIFFRACTION PROBLEMS, $\sigma_c$ , AND EFFICIENCY FOR $\sigma \geq \sigma_c$	210
CAVITY EFFECT, $\sigma_L$ , AND RESOLUTION	213
SHADOWING	215
WAVENUMBER SHIFT DUE TO OFF-AXIS OPTICAL SYSTEM	215
SAMPLE SPECTRA FROM PLANE, LAMELLAR GRATING INTERFEROMETERS	217
SPHERICAL, LAMELLAR GRATING INTERFEROMETERS	220
EFFECTS OF NONCOLLIMATION ON THE COMPUTED SPECTRUM	222
SAMPLE SPECTRA FROM A SPHERICAL, LAMELLAR GRATING INTERFEROMETER	226
CONCLUSIONS	229
REFERENCES	229

## CHAPTER SIXTEEN

*Computation Techniques*

INTRODUCTION	231
CONVENTIONAL COMPUTATION TECHNIQUES	232
CONVENTIONAL VERSUS COOLEY–TUKEY COMPUTATIONS	234
CONCLUSIONS	236
REFERENCES	236

## CHAPTER SEVENTEEN

*The Cooley–Tukey Algorithm**Ralph W. Alexander and Robert J. Bell*

INTRODUCTION	237
INTRODUCTION TO THE BINARY NUMBER SYSTEM	238
PREPARING FOR THE COOLEY–TUKEY ALGORITHM	239
COOLEY–TUKEY ALGORITHM FOR $N = 8$	240
GENERALIZATION FOR $N = 2^n$	250
SPECIAL CASE OF $S(j)$ REAL	251
SPECIAL CASE OF $S(j)$ REAL AND EVEN	254
SPECIAL CASE OF A REAL, ODD FUNCTION	256
CONCLUSIONS	257
REFERENCES	257

## CHAPTER EIGHTEEN

*Minicomputers and Real-Time Fourier Analysis**Ralph W. Alexander*

INTRODUCTION	258
REAL-TIME FOURIER ANALYSIS OF A ONE-SIDED INTERFEROGRAM	259
INITIALIZATION	260
PARABOLIC FIT	260
COMPUTATION OF THE FOURIER TRANSFORM	261
CALCULATION OF $S(j) \cos[2\pi\sigma_k(j\Delta\delta + \varepsilon)]$	261
EXAMPLE: COMMERCIAL REAL-TIME SYSTEMS	264
CHOICE OF A COMPUTER	264
CONCLUSION	265
REFERENCES	265

## CHAPTER NINETEEN

*Commercial Instruments*

INTRODUCTION	266
RIIC OR BECKMAN INSTRUMENTS, INC. (3–500 $\text{cm}^{-1}$ )	267
DIGILAB, INC. (5–10,000 $\text{cm}^{-1}$ )	273
GRUBBS-PARSONS (10–675 $\text{cm}^{-1}$ )	278
CODERG (10–800 $\text{cm}^{-1}$ )	280
IDEALAB (10–10,000 $\text{cm}^{-1}$ )	282
POLYTEC GmbH (10–1000 $\text{cm}^{-1}$ )	283
CONCLUSIONS	285
REFERENCES	286

## APPENDIX A

*Optical Alignment of a Michelson Interferometer*

INTRODUCTION	287
COARSE ADJUSTMENT	288
INTERMEDIATE AND FINE ADJUSTMENT	289

## APPENDIX B

*Computer Programs**Ralph W. Alexander and Harold V. Romero*

PROGRAM USING COOLEY–TUKEY ALGORITHM	291
TABLE OF SYMBOLS	298
PROGRAM FOR REAL-TIME ANALYSIS	299

## APPENDIX C

*Mirror Tilt, the Cat's-Eye Retroreflector*

INTRODUCTION	305
CAT'S-EYE RETROREFLECTOR (CONVEX SECONDARY)	306
CAT'S-EYE RETROREFLECTOR (CONCAVE SECONDARY)	309
REFERENCES	317

## APPENDIX D

<i>Rapid-Scan Fourier Transform Spectroscopy</i>	318
