Contents

PRE	FACE		÷	V
CHAPTER	1			
	ULAR ENERGY STATES AND POSSIBLE ISITION MECHANISMS			
1.1	Energy states, energy transfer, and relaxation .			1
1.2	Electronic energy states			3
1.3	Nuclear motion in electronic states			6
1.4	Classification of electronic states			ç
1.5	Vibrational states			12
1.6	Rotational states			13
1.7	Anharmonic vibrators and non-rigid rotators .	,		14
1.8	The effect of electric and magnetic fields			15
1.9	Nuclear magnetic states			16
1.10	Energy separations and transition mechanisms .			18
CHAPTER	2			
THE AI	SORPTION AND EMISSION OF RADIAT	ION		
2.1	The basic processes and the Einstein coefficients.			20
2.2	Perturbation theory and the matrix elements .			22
2.3	Application to electronic transitions			24
2.4	Application to nuclear motion			26
2.5	Intensity of absorption and radiative lifetime .			27
2.6	Excitation of nuclear spin states in a magnetic field	£		29
2.7	A second-order phenomenon: the Raman effect .			30
CHAPTER	3			
	RON IMPACT			
3.1	Methods of studying electron-molecule interaction	.S	•	32
3.2	Concepts for electron-molecule interactions .		•	34
3.3	Generalizations about electron-atom interactions .		•	37
3.4	Electronic excitation of molecules			40
	Vibrational excitation		•	42
3.6	Rotational excitation		•	43
*	vii			

viii DY	NAMIC ASPECTS OF MOLECULAR ENERGY	STAT	ES					
CHAPTER 4								
MOLECULAR COLLISIONS								
4.1	Collision as a perturbation			45				
4.2	•	•	•	43 47				
4.3	Direct electronic energy transfer	•	•	48				
4.4	Resonance and near-resonance energy transfer	•	•	49				
4.5	Vibrational energy transfer		•	49 52				
	Rotational energy transfer.		•	52 52				
4.6	Electronic-vibrational energy transfer .	•	٠					
4.7	Vibrational-rotational energy transfer	•	•	53				
4.8	Spin-lattice relaxation	•	•	54				
Снартев	: 5							
CHEMI	CAL REACTION AND RELATED TOPIC	C						
		5		~ 0				
5.1	Crossing of electronic energy curves	•	•	58				
5.2	Electronic excitation in reaction		٠	61				
5.3	Photosensitization and fluorescence quenching	•		63				
5.4	Vibrational excitation in reaction			63				
5.5	Rotational excitation in reaction			67				
Снартев	. 6							
HOW TRANSITIONS TAKE PLACE								
6.1	Preferred mechanisms for electronic transitions	•	•	69				
6.2	Lasers		•	71				
6.3	Preferred mechanisms for vibrational transitions			72				
6.4	Preferred mechanisms for rotational transitions		•	74				
6.5	Nuclear magnetic resonance transitions .	•		75				
6.6 Saturation of absorption and negative spin temperatures								
6.7	Conclusions for chemistry	•	•.	78
