CHAPTER 1. RADIOMETRY	1
1-1 Introduction	1
1-2 Thermal Radiation	1
1-3 Solid Angle	7
1-4 Radiative Energy Transfer	9
1-5 Lambertian Radiators	12
1-6 Radiation Noise	14
CHAPTER 2. INTRODUCTION TO DETECTOR PHYSICS AND NOMENCLATURE	23
2-1 Solid-State Physics	23
2-2 Detection Mechanisms	32
2-3 Noise Sources	36
2-3-1 Photon Noise	39
2-3-2 Johnson Noise	39
2-3-3 Shot Noise	40
2-3-4 Generation–Recombination	41
2-3-5 $1/f$ Noise	41
2-3-6 Temperature Noise	42
2-3-7 Microphonics	43
2-3-8 Postdetector Electronic Noise	43
2-4 Figures of Merit	43
2-5 Detector Performance Measurement	52
CHAPTER 3. PHOTOVOLTAIC DETECTION THEORY	63
3-1 Intrinsic Photovoltaic Effect	63
3-2 Photocurrent	67

x Contents

3-3	Responsivity and Quantum Efficiency	70
3-4	Frequency Response	73
3-5	Noise Sources	75
3-6	Figures of Merit	78

CHAPTER 4. PHOTOCONDUCTORS 86

4-1	Introduction	86
4-2	Theory of Photoconductive Detection	87
4-2-1	Background	87
4-2-2	Theory of Photoconductive Detection	91
4-2-3	Photoconductive Gain	97
4-2-4	Responsivity versus Temporal Frequency	98
4-3	Noises	100
4-3-1	1/f Noise	100
4-3-2	Johnson Noise	101
4-3-3	Generation–Recombination Noise	102
4-3-4	Summation of Noise Sources	102
4-4	Figures of Merit for Photoconductors	103
4-4-1	Photon Noise Limited	103
4-4-2	Johnson Noise Limited	106

CHAPTER 5. PHOTOEMISSIVE DETECTOR THEORY 113

5-1	External Photoeffect	113
5-2	Photomultiplier Tubes	116
5-3	Microchannels	122
5-4	Microchannel Plates	123
5-5	Introduction to Imaging System Considerations	127

CHAPTER 6. THERMAL DETECTORS AND THERMOPILES 133

6-1	Introduction	133
6-2	Heat Balance Equation	135
6-3	Photon Noise Limited Performance of Thermal Detectors	138
6-4	Thermocouples	141
6-5	Thermopiles	149

CHAPTER 7. BOLOMETERS	151
7-1 Metal Bolometer	152
7-2 Thermistor	154
7-3 Semiconductor Bolometers	156
7-4 Low Temperature Germanium Bolometer	163
7-5 Composite Bolometer	167
7-6 Interfacing Thermal Detectors	167
CHAPTER 8. PYROELECTRIC DETECTORS	171
8-1 Background	171
8-2 Responsivity of Pyroelectric Detectors	174
8-3 Noise Sources	178
8-3-1 Temperature Noise	178
8-3-2 Johnson Noise	179
8-3-3 Preamplifier Noise	180
8-4 Noise Equivalent Power	182
8-5 Preamplifiers	182
8-6 Conclusions	183
CHAPTER 9. CHARGE TRANSFER DEVICES	186
9-1 Introduction	186
9-2 Concepts of Charge Storage	188
9-3 Charge Transfer Concepts	193
9-3-1 Charge Transfer Mechanisms	197
9-3-2 Charge Transfer Efficiency	199
9-3-3 Surface Interface Traps	204
9-4 Focal Plane Architecture	212
9-4-1 Discussion of Clocking Techniques	218
9-4-2 Front or Back Illumination	223
9-4-3 Monolithic Focal Plane Arrays	225
9-4-4 Hybrid Focal Plane Arrays	226
9-5 Output Readout Techniques	232
9-5-1 Floating Diffusion Amplifier (Destructive)	233
9-5-2 Charge Sensing Amplifier (Nondestructive)	235
9-5-3 Floating Gate Amplifier (Nondestructive)	236
9-5-4 Distributed Floating Gate Amplifier (Nondestructive)	237

xii Contents

9-6	Noise Analysis	237
9-6-1	Photon (Shot) Noise	241
9-6-2	Input Noise	241
9-6-3	Transfer Inefficiency Noise	242
9-6-4	Trapping Noise	243
9-6-5	Floating Diffusion Reset Noise	244
9-6-6	Preamplifier Noise	244
9-6-7	Detector Uniformity Noise	244
9-7	CCD Array Tests	246
9-8	Time Delay Integration (TDI)	254
9-9	Figures of Merit	256
9-10	Imaging Arrays	259
9-10-1	RCA	259
9-10-2	Fairchild	260
9-10-3	Reticon	260
9-10-4	General Electric	262
9-10-5	Texas Instruments (TI)	263
9-10-6	Infrared Arrays	265
APPENDIX A. PHOTOMETRIC UNITS		272
APPENDIX B. PHOTOVOLTAIC SOLAR CELL PERFORMANCE MODEL		275
APPENDIX C. BLACKBODY AND DETECTIVITY TABLES		281
INDEX		289
