

# Contents

1.	The Radiation from the Sun <i>R. Tousey</i>	1
2.	Atomic and Molecular Species <i>R. T. Brinkmann, J. Dowling, Jr., A. E. S. Green, and A. T. Jusick</i>	40
3.	The Present Status of Calculations of Properties of N <sub>2</sub> and O <sub>2</sub> <i>K. Ohno</i>	73
4.	Atmospheric Ozone <i>M. Griggs</i>	83
5.	The Radiance of the Earth in the Middle Ultraviolet <i>A. E. S. Green</i>	118
6.	Second-Order Scattering Contributions to the Earth's Radiance in the Middle Ultraviolet <i>J. Dowling, Jr., and A. E. S. Green</i>	130
7.	A Generalized Chapman Function <i>A. E. S. Green and J. D. Martin</i>	140
8.	The Middle Ultraviolet and Air Pollution <i>A. E. S. Green, D. T. Williams, R. S. Sholtes, and J. Dowling, Jr.</i>	158
9.	Electron Impact Excitation of the Ultraviolet <i>A. E. S. Green and R. S. Stolarski</i>	165
10.	The Ultraviolet Spectroscopy of Planets <i>C. A. Barth</i>	177
11.	Astronomical Ultraviolet Radiation <i>K. L. Hallam</i>	219
12.	Radiation from Flames and Chemical Perturbations of the Atmosphere <i>A. L. Berlad</i>	242
13.	Gasdynamics of Rocket Exhaust Plumes <i>H. Yoshihara</i>	269

<b>14.</b>	Fluid Dynamic Sources of Radiation During Atmospheric Entry <i>B. M. Leadon</i>	286
<b>15.</b>	Ultraviolet Technology <i>J. Hennes and L. Dunkelman</i>	304
