

CONTENTS

INTRODUCTION 1

PART A THEORY AND INSTRUMENTATION 7

CHAPTER 1 THE MICHELSON INTERFEROMETER 9

- I. Introduction 9
- II. Monochromatic Light Sources 10
- III. Polychromatic Sources 14
- IV. Finite Resolution 15
- V. Apodization 21
- VI. Phase Correction 23
- VII. Effect of Beam Divergence through the Interferometer 31
- VIII. Effect of Mirror Misalignment 36
- IX. Effect of a Poor Mirror Drive 38
- X. Slow-Scan and Rapid-Scan Interferometers 40
- XI. Phase Modulation 45
- XII. Refractive Index Measurements 51

CHAPTER 2 SAMPLING THE INTERFEROGRAM 60

- I. Sampling Frequency 60
- II. Dynamic Range 64
- III. Effects of Sampling Errors 76

CHAPTER 3 COMPUTING TECHNIQUES 81

- I. The Conventional Fourier Transform 81
- II. The Fast Fourier Transform (FFT) 84
- III. Zero-Filling 89
- IV. Real-Time Fourier Transforms 91

CHAPTER 4 TWO-BEAM INTERFEROMETERS 96

- I. Drive Systems for Michelson Interferometers 96
 - A. *Introduction* 96

B.	<i>Medium Resolution Far-Infrared Interferometers</i>	96
C.	<i>Medium Resolution Mid-Infrared Interferometers</i>	98
D.	<i>Tilt Compensation for High Resolution Interferometers</i>	105
E.	<i>Conclusion</i>	109
II.	Beamsplitters for Michelson Interferometers	110
III.	Lamellar Grating Interferometers	120
IV.	Other Interferometers for Fourier Spectroscopy	125
A.	<i>Introduction</i>	125
B.	<i>Field-Widened Interferometers</i>	126
C.	<i>Michelson Interferometer with Spherical Mirrors</i>	128
D.	<i>Mobile Interferometers for Remote Spectroscopy</i>	129
E.	<i>Cryogenic Interferometers</i>	132
CHAPTER 5 AUXILIARY OPTICS FOR FTS		137
I.	Absorption and Reflection Spectroscopy	137
II.	Emission Spectroscopy	147
CHAPTER 6 DATA SYSTEMS		152
I.	Computations on a Large Remote Computer	152
II.	Signal-Averagers for Rapid-Scanning Interferometers	153
III.	Analog Wave-Analyzers	155
IV.	Use of Minicomputers	156
V.	“Real-Time” Data Systems for FTS	165
CHAPTER 7 DUAL-BEAM FOURIER TRANSFORM SPECTROSCOPY		171
I.	Reduction of Dynamic Range	171
II.	Reduction of Noise	180
III.	The Polarization Interferometer	184
CHAPTER 8 SIGNAL-TO-NOISE RATIO IN FTS		188
I.	Detector Noise	188
II.	“Trading Rules” in FTS	192
A.	<i>The Constant Throughput Case</i>	193
B.	<i>The Variable Throughput Case</i>	193
III.	Effect of Apodization on Noise Level	196
IV.	Other Sources of Noise in FTS	198
A.	<i>Digitization Noise</i>	198

- B. *Poor Sampling* 199
- C. *Vibration, Microphonics, and Harmonics* 200
- D. *Folding* 201
- E. *Multiplicative Noise* 201
- F. *Summary* 202
- V. Interferometers versus Grating Spectrometers 202
 - A. *Mid-Infrared Spectroscopy* 203
 - B. *Far-Infrared Spectroscopy* 206

PART B APPLICATIONS OF FOURIER TRANSFORM SPECTROSCOPY. 209

CHAPTER 9 FAR-INFRARED SPECTROSCOPY 211

- I. Introduction 211
- II. Internal Bending and Stretching Vibrations 212
- III. Torsional Frequencies 219
- IV. Puckering Modes in Small Rings 221
- V. Pure Rotational Spectra 223
- VI. Collision Induced Spectra 230
- VII. Nonspecific Far-Infrared Absorptions in Liquids 232
- VIII. Weak Intermolecular Interactions 235
- IX. Intermolecular Vibrations of Molecular Crystals 237
- X. Ionic Crystals 238
- XI. Low Temperature Spectroscopy 239

**CHAPTER 10 MID-INFRARED ABSORPTION
SPECTROSCOPY 244**

- I. "Conventional" Infrared Spectroscopy 244
- II. Strongly Scattering or Absorbing Samples 252
- III. The Spectroscopy of Microsamples 257
- IV. The Spectroscopy of Transient Species 264
- V. GC-IR 268
- VI. Trace Gas Analysis 282
- VII. Matrix Isolation Spectroscopy 289

**CHAPTER 11 MID-INFRARED REFLECTANCE
SPECTROSCOPY 294**

- I. Specular and Diffuse Reflectance 294
- II. Attenuated Total Reflectance Spectroscopy 298
- III. Reflectance Techniques for Surface Studies 301

CHAPTER 12 INFRARED EMISSION SPECTROSCOPY 308

- I. Introduction 308
- II. Emission Spectroscopy of Materials in Condensed Phases 311
- III. Emission Spectroscopy of Gases 317
- IV. Far-Infrared Emission Spectroscopy 321
- V. Infrared Chemiluminescence 324
- VI. "Time-Resolved" Emission Spectroscopy 327

**CHAPTER 13 THE FUTURE OF FOURIER TRANSFORM
SPECTROSCOPY 332****INDEX 337**
