<b>Chapter 1</b>		
<b>Precious Metals</b>		
H. Jäger		
1.1	Introduction .....	1
1.2	Emission Spectroscopy .....	5
1.2.1	Analysis of Noble Metals .....	5
1.2.1.1	Sample-Graphite Techniques .....	6
1.2.1.2	Metallic Samples .....	10
1.2.1.3	Comparison of Methods .....	16
1.2.2	Determination of Noble Metals in Other Metals and Materials .....	17
1.2.2.1	Graphite Electrode .....	17
1.2.2.2	Globule Arc .....	21
1.2.2.3	Other Methods .....	21
1.2.3	Determination of Noble Metals in Geologic Samples, Minerals, and Ores .....	22
1.2.3.1	Normal Geochemical Analysis .....	22
1.2.3.2	Methods with Increased Sensitivity .....	23
1.2.3.3	Enrichment Techniques .....	24
1.2.4	New Developments in Spectral Analysis .....	28
1.3	Flame Techniques .....	30
1.3.1	FES, AAS, and AFS .....	30
1.3.1.1	Interferences .....	30
1.3.2	Single Elements in Solution .....	34
1.3.3	Analysis of Noble Metals .....	34
1.3.4	Determination of Noble Metals in Geologic Samples, Minerals, and Ores .....	34
1.3.5	Flameless Techniques .....	38
1.3.5.1	Solid Fuel .....	38
1.3.5.2	Graphite Cuvette .....	38
1.3.5.3	Graphite Rod .....	38

1.4	X-Ray Fluorescence . . . . .	39
1.4.1	Original Form of the Material and Sample Type . . . . .	39
1.4.2	Interferences . . . . .	39
1.4.3	Enrichment Techniques . . . . .	40
1.4.4	Precision, Accuracy, and Detection Limits . . . . .	40
1.4.5	Other Techniques . . . . .	40
1.5	Activation Analysis . . . . .	42
1.5.1	Technique . . . . .	42
1.5.2	Interferences . . . . .	42
1.5.3	Applications . . . . .	43
1.6	References . . . . .	44

## Chapter 2

### Petroleum Industry Analytical Applications of Atomic Spectroscopy

Bruce E. Buell

2.1	Introduction . . . . .	53
2.2	Definition and Scope of Petroleum Industry . . . . .	54
2.3	Crude Oil Importance, Composition, and Origin . . . . .	54
2.3.1	Importance . . . . .	54
2.3.2	Composition . . . . .	55
2.3.3	Crude Oil Fractions and Refining . . . . .	55
2.3.4	Origin of Crude Oils and Metal Content . . . . .	56
2.3.4.1	Theories of Origin . . . . .	56
2.3.4.2	Literature on Biogenic Origins of Crude Oil . . . . .	56
2.3.4.3	Characteristics of Crude Oil That May Relate to Metal Content Origin . . . . .	58
2.4	History of Atomic Spectroscopy Applications . . . . .	60
2.4.1	Emission Spectrographic and Spectrometric Methods . . . . .	60
2.4.2	Flame Spectrometric Methods . . . . .	61
2.4.3	Atomic Absorption Methods . . . . .	61
2.4.4	Atomic Fluorescence Methods . . . . .	62
2.4.5	Current Use of All Techniques . . . . .	62
2.5	Review of Literature . . . . .	62
2.5.1	Reviews . . . . .	62
2.5.2	Growth of Literature . . . . .	63
2.6	Instrumental Techniques . . . . .	63
2.6.1	Emission Spectrographs . . . . .	64
2.6.1.1	Advantages . . . . .	64
2.6.1.2	Excitation and Analysis Techniques . . . . .	64
2.6.2	Emission Spectrometers (ESD) . . . . .	64
2.6.2.1	Instrumentation . . . . .	64

2.6.2.2 Advantages and Disadvantages . . . . .	65
2.6.2.3 Excitation and Analysis Techniques . . . . .	65
2.6.3 Flame Emission Spectrometers (FE) . . . . .	66
2.6.3.1 Instrumentation . . . . .	66
2.6.3.2 Repetitive Wavelength Scanning in the Derivative Mode . . . . .	67
2.6.4 Atomic Absorption (AA) . . . . .	68
2.6.4.1 Instrumentation . . . . .	68
2.6.4.2 Nonflame and Boat in Flame Methods . . . . .	68
2.6.5 Atomic Fluorescence (AF) . . . . .	69
2.6.6 Burner-Nebulizer Systems . . . . .	70
2.6.6.1 History . . . . .	70
2.6.6.2 Atomic Absorption and Partial Consumption-Laminar Flow Burners . . . . .	70
2.6.6.3 Flame Emission and Total Consumption Burners . . . . .	71
2.6.6.4 Organic Solvent Nebulization . . . . .	72
2.6.7 Detection Limits for Various Techniques . . . . .	75
2.6.7.1 Flame AA . . . . .	79
2.6.7.2 Nonflame AA . . . . .	79
2.6.7.3 Atomic Fluorescence . . . . .	79
2.6.7.4 Flame Emission . . . . .	79
2.6.7.5 Plasma Torch . . . . .	79
2.6.7.6 Arc and Spark . . . . .	80
2.6.7.7 Detection Limits for Nonmetallic Elements . . . . .	80
2.6.7.8 Special Techniques to Increase Sensitivity . . . . .	81
2.6.7.9 Comparison of Flame AA and FE Detection Limits . . . . .	82
2.6.8 Additional Readings on Instrumentation Techniques . . . . .	83
2.7 Interferences for AA and FE . . . . .	85
2.7.1 Spectral Interferences . . . . .	85
2.7.1.1 Spectral Line Interferences . . . . .	85
2.7.1.2 Spectral Molecular Interferences . . . . .	87
2.7.2 Physical Interferences . . . . .	88
2.7.3 Chemical Interferences . . . . .	89
2.7.3.1 Hydrocarbon Systems Reduce Chemical Interferences . . . . .	91
2.7.3.2 Compensating for Interferences—La as Releasing Agent . . . . .	92
2.7.3.3 Interferences for the Hg Cold Vapor Method . . . . .	92
2.7.3.4 Interferences in Hydrogen Flames (As, Se, etc.) . . . . .	92
2.7.3.5 Interferences for Nonflame Methods . . . . .	93
2.8 Antipollution . . . . .	94
2.8.1 New Regulations . . . . .	94
2.8.2 Wastewater Disposal and Cleanup . . . . .	94
2.8.3 Analytical Problems . . . . .	94
2.8.3.1 Chromium . . . . .	96

2.8.3.2 Mercury . . . . .	97
2.8.3.3 Cadmium . . . . .	98
2.8.3.4 Lead . . . . .	98
2.8.3.5 Accuracy of Analytical Methods for Water Analysis . . . . .	98
2.8.4 Metal Analysis as a Means of Identifying Crude Oil Spills . . . . .	98
2.8.5 Heavy Metal Analysis Applied to Air Pollution . . . . .	99
2.9 Methods of Analysis Grouped by Product Type . . . . .	99
2.9.1 Water and Oil-Field Brines . . . . .	100
2.9.1.1 Water Produced and Used . . . . .	100
2.9.1.2 Reviews and Books . . . . .	101
2.9.1.3 Variations in Elemental Composition of Waters . . . . .	103
2.9.1.4 Water Analysis—Emission Methods . . . . .	107
2.9.1.5 Water Analysis—Atomic Absorption Methods . . . . .	111
2.9.1.6 Atomic Fluorescence Methods . . . . .	114
2.9.1.7 Flame Emission Methods . . . . .	114
2.9.2 Concentration and Separation Methods . . . . .	116
2.9.2.1 Evaporation . . . . .	117
2.9.2.2 Solvent Extraction . . . . .	118
2.9.2.3 Solid Extractions or Cocrystallization . . . . .	120
2.9.2.4 Ion Exchange . . . . .	121
2.9.2.5 Precipitation Methods . . . . .	121
2.9.3 Crude Oils . . . . .	123
2.9.3.1 Importance of Crude Oil Metal Content . . . . .	123
2.9.3.2 Metallic Elements Found in Crude Oils . . . . .	124
2.9.3.3 Nature of Metal Compounds in Crude Oil . . . . .	127
2.9.3.4 Nature of Metalloorganic Compounds . . . . .	128
2.9.3.5 Metal Porphyrin Compounds . . . . .	128
2.9.3.6 Separation and Measurement of Porphyrin Compounds . . . . .	129
2.9.3.7 Emission Methods for Determining Metals in Crude Oils . . . . .	133
2.9.3.8 Atomic Absorption Methods . . . . .	135
2.9.3.9 Flame Emission Methods . . . . .	137
2.9.3.10 Metal Surveys Using Other Techniques of Analysis . . . . .	139
2.9.3.11 References from Foreign Countries . . . . .	141
2.9.4 Wear Metals and Additives in Used and New Lubricating Oils . . . . .	142
2.9.4.1 History and Applications of Emission Methods . . . . .	142
2.9.4.2 Emission Spectroscopic Techniques . . . . .	144
2.9.4.3 Atomic Absorption Methods . . . . .	149
2.9.4.4 Atomic Fluorescence Methods . . . . .	152
2.9.4.5 Flame Emission Methods . . . . .	152
2.9.4.6 Relative Merits of Most Popular Methods . . . . .	153
2.9.4.7 Particle-Size Influence . . . . .	154
2.9.4.8 Matrix Errors Caused by Oil Composition . . . . .	157

2.9.5 Gasoline and Light Petroleum Distillates (LPD) . . . . .	160
2.9.5.1 Lead in Gasoline . . . . .	160
2.9.5.2 Miscellaneous Elements . . . . .	162
2.9.6 Diesel Fuels, Turbine Fuels, Gas Oils, and Feedstocks for Refinery Processing Units . . . . .	163
2.9.6.1 Emission Spectrographic and Spectrometric Methods .	164
2.9.6.2 Atomic Absorption Methods . . . . .	167
2.9.6.3 Flame Emission Methods . . . . .	169
2.9.6.4 Atomic Fluorescence Methods . . . . .	169
2.9.6.5 Comments on Methods . . . . .	169
2.9.7 Catalysts Used in Petroleum Refining Operations . . . . .	170
2.9.7.1 Emission Methods . . . . .	170
2.9.7.2 Flame Emission Methods . . . . .	172
2.9.7.3 Atomic Absorption Methods . . . . .	172
2.9.8 Miscellaneous Heavy Petroleum Products . . . . .	173
2.9.8.1 Analytical Problems Imposed by Viscosity . . . . .	173
2.9.8.2 Analytical Methods—Emission Spectroscopy . . . . .	174
2.9.8.3 Atomic Absorption and Flame Emission Methods .	175
2.9.8.4 Analysis of Cokes . . . . .	175
2.9.9 Petrochemical and Agricultural Products . . . . .	177
2.9.9.1 Agricultural Petrochemicals . . . . .	177
2.9.9.2 History, Reviews, and Analytical Methods . . . . .	177
2.9.9.3 Atomic Absorption and ESD Methods . . . . .	179
2.9.9.4 Soil Analysis by AA . . . . .	179
2.9.9.5 Fertilizers . . . . .	180
2.9.9.6 Unusual Applications . . . . .	180
2.10 Geochemical Applications . . . . .	180
2.10.1 Geochemistry in Mineral Exploration . . . . .	181
2.10.2 Analytical Methods—Emission Spectroscopy . . . . .	181
2.10.3 Flame Emission Methods . . . . .	182
2.10.4 Atomic Absorption Methods . . . . .	182
2.11 References . . . . .	183

### Chapter 3

#### Analytical Emission Spectroscopy in Biomedical Research

William Niedermeier

3.1 Introduction . . . . .	219
3.2 Spectrometric Methods . . . . .	220
3.2.1 Equipment and Materials . . . . .	221
3.2.2 Methods . . . . .	222
3.2.2.1 Sample Preparation . . . . .	222
3.2.2.2 Preparation of Standards . . . . .	223
3.2.2.3 Spectrometric Procedure . . . . .	223
3.2.3 Discussion . . . . .	224

3.3	Computerized Evaluation of Results . . . . .	227
3.3.1	Mathematical Relationships . . . . .	228
3.3.2	Fit of the Equation to the Data . . . . .	229
3.3.3	Confidence Limits . . . . .	232
3.3.4	Background . . . . .	233
3.3.5	Threshold Values . . . . .	233
3.3.6	Discussion . . . . .	233
3.4	Studies on Trace Metals in Patients with Rheumatoid Arthritis . . . . .	236
3.4.1	Collection of Specimens . . . . .	237
3.4.2	Results . . . . .	239
3.4.3	Discussion . . . . .	242
3.5	Effect of Chrysotherapy on Trace Metals . . . . .	244
3.5.1	Methods . . . . .	245
3.5.2	Results . . . . .	245
3.6	Trace Metals in Dental Caries . . . . .	247
3.6.1	Collection of Samples . . . . .	247
3.6.2	Results . . . . .	248
3.6.3	Discussion . . . . .	249
3.7	Cardiovascular Disease . . . . .	254
3.7.1	Myocardial Infarction . . . . .	255
9.7.1.1	Methods . . . . .	256
9.7.1.2	Results . . . . .	258
9.7.1.3	Discussion . . . . .	262
3.7.2	Atherosclerosis . . . . .	263
3.8	Metals in the Environment . . . . .	266
3.9	Pattern Recognition . . . . .	270
3.9.1	Multivariate Analysis of Variance . . . . .	274
3.9.2	Duncan Analysis . . . . .	276
3.9.3	Cluster Analysis . . . . .	279
3.9.4	Discriminant Analysis . . . . .	280
3.10	References . . . . .	284

#### Chapter 4

#### Application of Spectroscopy to Toxicology and Clinical Chemistry

Eleanor Berman

4.1	Introduction . . . . .	291
4.2	Spectroscopic Applications to Analyses of Organic Substances . . . . .	294
4.2.1	Ultraviolet Spectrophotometry . . . . .	294
4.2.2	Infrared Spectroscopy . . . . .	295
4.2.3	Mass Spectrometry . . . . .	296
4.2.4	Fluorimetry and Phosphorimetry . . . . .	296

4.3 Application of Spectroscopy to Trace Metal Analyses of Biological Materials . . . . .	297
4.3.1 X-Ray Spectroscopy . . . . .	298
4.3.2 Emission and Atomic Absorption Spectroscopy . . . . .	299
4.4 Specific Applications of Emission and Atomic Absorption Spectrophotometry . . . . .	301
4.4.1 Sodium and Potassium . . . . .	301
4.4.2 Calcium . . . . .	303
4.4.3 Magnesium . . . . .	304
4.4.4 Lithium . . . . .	304
4.4.5 Copper . . . . .	305
4.4.6 Iron . . . . .	306
4.4.7 Zinc . . . . .	306
4.4.8 Gold . . . . .	307
4.4.9 Manganese . . . . .	308
4.4.10 Nickel . . . . .	308
4.4.11 Cobalt . . . . .	309
4.4.12 Chromium . . . . .	309
4.5 The Toxic Metals . . . . .	310
4.5.1 Lead . . . . .	310
4.5.2 Cadmium . . . . .	312
4.5.3 Thallium . . . . .	312
4.5.4 Antimony . . . . .	313
4.5.5 Arsenic . . . . .	313
4.5.6 Beryllium . . . . .	313
4.5.7 Mercury . . . . .	314
4.5.8 Selenium . . . . .	314
4.5.9 Miscellaneous Metals . . . . .	315
4.6 Plasma Emission Spectrometry . . . . .	315
4.7 References . . . . .	315
Author Index . . . . .	319
Subject Index . . . . .	341
