Contents

List of Contributors ix
Foreword xi
Preface xiii

1 **Photoluminescence Spectrometry**
Klaus D. Mielenz

A. Photoluminescence 2
B. Terminology and Units 4
C. Analytical Fluorescence Spectrometers 8
D. Fluorescence Colorimetry 19
E. Classification of Fluorescence Spectra 30
F. Technical Spectra 31
G. True Spectra and Yields 42
H. Polarized Fluorescence 58
I. Wavelength and Bandwidth Effects 76
J. Data Presentation 82
References 84

2 **Radiometry: New Developments Relating to Spectrofluorimetry and Photon Yield Measurements**
Edward F. Zalewski

A. Introduction 89
B. Absolute Photon Flux Measurements by Electrical Substitution Radiometry 90
C. Absolute Photon Flux Measurements Based on the Self-Calibration of Silicon Photodiodes 94
D. Recently Developed Lamp and Detector Standards 103
E. Stable Radiation Sources 104

F. Laser Excitation Sources 106
G. New Methods of Measuring Low-Level Diffuse Reflection or Emission 110
References 111

3 Correction of Excitation Spectra
W. H. Melhuish

A. Introduction 115
B. Equipment 117
C. Methods of Measurement 128
D. Standards 132
References 137

4 Correction of Emission Spectra
L. F. Costa, Klaus D. Mielenz, and Franc Grum

A. Fundamental Aspects of Luminescence Emission 139
B. Spectroradiometric Calibration Methods 155
References 173

5 Sample-Induced Errors in Fluorescence Spectrometry
W. H. Melhuish

A. Introduction 175
B. Refractive Index Effects 177
C. Dilute Solutions 182
D. Concentrated Solutions 186
E. Powders, Paints, and Matte Surfaces 188
References 192

6 Measurement of Photon Yields
J. N. Demas

A. Introduction 195
B. Methods of Measuring Photon Yields 196
C. Luminescence Photon Yield Standards 220
D. Quantum Counters 228
E. Corrections for Photon Yield Measurements 233
F. Recommendations for Data Presentation 242
References 244

7 **Data Handling in Fluorescence Spectrometry**

Michael P. Fogarty, Chu Ngi Ho, and Isiah M. Warner

A. Introduction 249
B. Signal Processing 250
C. Time-Dependent Processes 263
D. Qualitative Analysis 279
E. File Searching 295
F. Quantitative Analysis 297
References 312

Index 315
