

## CONTENTS

CHAPTER I.	INTRODUCTION TO INTERFEROMETRIC SPECTROMETERS . .	4
CHAPTER II.	THEORETICAL CONSIDERATIONS. . . . .	7
	1. Relation Between Interferogram and Spectrum. . . . .	7
	2. Negative Frequencies. . . . .	11
	3. Constant Term Associated with Interferogram. . . . .	13
	4. Asymmetric Interferograms - Sine Transforms and Complex Transforms; Shift Theorem . . . .	16
	5. Gaussian Functions and Resolution . . . . .	23
	6. Sampling, Convolution and Aliasing; Scanning Functions and Apodization; Some Consequences of Sampling . . . . .	25
	7. Use of Filters. . . . .	56
	8. One-Sided Interferogram . . . . .	62
	9. Relationship Between Interferometer and Grating . . . . .	79
	10. Interferogram as an Auto-Correlation Function. . . . .	83
CHAPTER III.	OPTICAL CONSIDERATIONS. . . . .	86
	1. General . . . . .	86
	2. Nature of Michelson Fringes . . . . .	88
	3. Field Widening. . . . .	94
	4. Etendue . . . . .	103
CHAPTER IV.	INTERFEROMETER DETAILS. . . . .	104
	1. Sources . . . . .	104
	2. Beam Splitters. . . . .	105
	3. Detectors . . . . .	110
	4. Signal Modulation . . . . .	111
	5. The Moving Mirror . . . . .	113
	6. Sampling the Interferogram. . . . .	122
	7. Dynamic Range and Linearity of Amplifier. . . .	126
	8. Noise . . . . .	128
	9. Noise and the Complex Transform . . . . .	130
	10. Sample Accommodation. . . . .	132
	11. Special Modes of Operation. . . . .	135

	12. Polarization Effects; a Simple Polarizer . . . . .	145
CHAPTER V.	COMPUTATION . . . . .	151
	1. Basic Calculations . . . . .	151
	2. Methods Using Square Wave and Comb Functions . . . . .	155
	3. Fast Fourier Transform . . . . .	163
	4. Parallel Computation . . . . .	175
CHAPTER VI.	COMMERCIAL INSTRUMENTS . . . . .	176
	1. Biorad (Sadtler, Block, and Digilab) . . . . .	176
	2. Nicolet Instrument Corporation . . . . .	178
	3. Bruker-Physik AG (USA, Bruker Instruments, Inc.) . . . . .	188
	4. Grubb Parsons . . . . .	191
	5. Beckman - RIIC . . . . .	192
	6. Coderg . . . . .	195
	7. Polytec . . . . .	197
CHAPTER VII.	MEASUREMENT OF REFRACTIVE INDEX . . . . .	201
	1. Use of Channel Spectra (Broad Band Radiation) . . . . .	202
	2. Methods Involving Monochromatic Radiation . . . . .	204
	3. Sample in Fixed Arm (Broad Band Radiation) . . . . .	207
CHAPTER VIII.	MODIFICATIONS OF THE BASIC MICHELSON OPTICAL SYSTEM . . . . .	216
	1. Change of Angle of Incidence on Beamsplitter from $45^\circ$ . . . . .	216
	2. Instrument with Two Separate Outputs . . . . .	217
	3. Mach - Zehnder Interferometer . . . . .	219
	4. Spherical Mirror Interferometer . . . . .	220
	5. Interferometer for Use with Weak Extended Sources . . . . .	221
	6. Interferometer Suitable for the Measurement of Optical Constants . . . . .	221
CHAPTER IX.	OTHER INTERFEROMETERS AND ALLIED INSTRUMENTS . . . . .	222
	1. Lamellar Grating Interferometer . . . . .	224
	2. Fabry Perot Interferometric Spectrometer . . . . .	229
	3. Girard Grill Spectrometer . . . . .	233
	4. Mock Interferometer . . . . .	237
	5. Michelson with Gratings . . . . .	238

6. Michelson Using Polarized Radiation . . . . .	239	
7. Hadamard - Transform Spectrometer . . . . .	242	
REFERENCES . . . . .	245	
APPENDICES . . . . .	253	
Appendix I	Fourier Transform of a Gaussian Frequency Dis- tribution . . . . .	253
Appendix II	Sampling Error from Two Points Near Central Maximum of Interferogram. . . . .	255
Appendix III	Apodization . . . . .	258
Appendix IV	Expansion of $1/2\sin^2 n\beta/2/\sin^2\beta/2$ . . . . .	259
Appendix V	Mean of m Samples . . . . .	260
Appendix VI	Signal from Michelson Detector . . . . .	262
Appendix VII	Multiple Reflections in a Transparent Layer . . . . .	263
Appendix VIII	Reflection from a Mirror Pair . . . . .	265
Appendix IX	Reflection from a Cube Corner . . . . .	266
Appendix X	Amplitude of a Cosine Wave (Interferogram) in Relation to the Area of the Corresponding Gaussian Frequency Distribution . . . . .	266
Appendix XI	Further Consideration of Zero Error Correction. . . . .	267
Appendix XII	Formation of an Interferogram . . . . .	271
Appendix XIII	Evaluation of the Constant Term . . . . .	272
AUTHOR INDEX . . . . .	275	
SUBJECT INDEX. . . . .	279
