

## CONTENTS

EMISSION AND ATOMIC ABSORPTION SPECTROSCOPY	
1.1	A New Briquetting Technique, C. K. Matocha ..... 1
1.2	Preparation and Spectrochemical Analysis of Lung Tissue for Beryllium, H. L. Hayes, W. J. Bisson, and W. H. Dennen ..... 5
1.3	Dilution Device for Atomic Absorption Analysis, L. R. Crawford, Jr., and T. Greweling ..... 9
1.4	Simple Interchangeable Hollow-Cathode Lamp for Use in Atomic-Absorption Spectrometry, G. I. Goodfellow... 11
1.5	Hollow-Cathode Lamp for Use in Emission and Absorption, R. A. Woodriff, G. V. Wheeler, and W. A. Ryder .... 20
1.6	Versatile Hollow-Cathode Light Source for Spectrochemical Analysis in the Vacuum Ultraviolet, G. Milazzo ..... 22
1.7	Stabilization of Nitrous Oxide/Acetylene Flames, R. J. Julietti, and J. A. E. Wilkinson ..... 29
1.8	Rapid Loading Stallwood Jet, A. W. Fagan and H. M. Klein ..... 30
1.9	Simple Jet for Emission Spectrography, W. H. Dennen and W. H. Blackburn ..... 31
1.10	Versatile Gas-Metering System for Controlled Atmospheres, D. L. Nash ..... 34

1.11	Stable Source for Plate Calibration, M. Slavin .....	36
1.12	New High-Intensity Spectral Source with a Narrow Line Profile, Z. van Gelder .....	39
1.13	Spurious Radiation in Littrow-Mounted Grating Monochromators, A. Watanabe .....	43
1.14	Image-Rotating Device for a Spectrograph Illumination System, C. J. Cremers and E. R. F. Winter .....	48
1.15	Mask for Selecting Orders for Use with the Jarrell-Ash Order Sorter, A. Mykytiuk and S. S. Berman .....	53
1.16	A Device For Making Time Studies, W. H. Dennen .....	56
1.17	Slit-Adjustment Mechanism for a 1.5-m Bausch & Lomb Spectrometer, J. H. J. Coetzee, H. J. Jacobs, and J. Morris .....	61
1.18	Attachment for a Rotating Sector, T. A. Read .....	68
1.19	Modified and More Versatile Direct-Reading Head for a 3.4-m Ebert Spectrograph, J. Morris and J. M. C. Van Staden .....	69
1.20	Test Jig for an Integrating Direct-Reading Spectrograph, H. G. Yuster and R. J. Hemmer .....	78
1.21	Baird Clock Revisited, W. R. Kennedy and R. N. Smith ..	82
1.22	An Improvement to the Weekley-Norris Electronic Computer, W. R. Kennedy .....	86
1.23	Semiconductor Current Regulator for the Spectrographic Arc, H. H. Conover, J. T. Peters, and M. Lalevic .....	89
1.24	Punched Cards as Position Indicators for Spectrographic Plates, J. M. McCrea .....	93
1.25	Derivative Scanning for Wavelength Identification, J. P. Walters and H. V. Malmstadt .....	95
1.26	Device for Measuring Spectral Linewidths, P. R. Barnett	100
<b>INFRARED SPECTROSCOPY</b>		
2.1	Protective Holder for KBr Pressed Disks Containing Reactive Samples, P. A. Staats and H. W. Morgan .....	107

2.2	New Technique for the Preparation of KBr Pellets from Microsamples, H. R. Garner and H. Packer .....	109
2.3	A Technique for the Use of the "Mini-Press" in Micro Infrared Spectroscopy, L. A. Bauman, Jr. ....	113
2.4	Laboratory Preparation of Polyethylene Pellets, W. B. Barish, G. T. Behnke, and K. Nakamoto .....	115
2.5	Preparation and Use of Powdered Silver Chloride as Infrared Matrix, T. M. Spittler and B. Jaselskis .....	119
2.6	Pressed-Film Technique for Obtaining Infrared Spectra of Thermoplastic Materials, J. E. Coakley and H. H. Berry .....	122
2.7	Pressed-Film Technique, D. Camer, M. Martin, and E. Medeck .....	130
2.8	Infrared Cell for Reactive Gases, E. J. Bartoszek, C. J. Mackley, and D. M. Gardner .....	131
2.9	High-Temperature Vacuum Cell for Infrared Studies of Adsorbed Molecules, R. O. Kagel and L. W. Herscher .....	133
2.10	Sample-Inlet System for Studying Adsorption of Low Vapor Pressure Materials on Solid Surfaces, R. O. Kagel .....	136
2.11	Method for Rapid Transfer of GLC Fractions into Infrared Cavity Cells, R. F. Kendall .....	139
2.12	Simple Device for Preparing Polyethylene Liquid Cells for the Far Infrared, J. Lyford, IV, and W. F. Edgell .....	143
2.13	Method for Making Disposable Far Infrared Cells with Fixed and Variable Pathlengths, E. Kinsella and J. Coward .....	148
2.14	Cell Design for the Measurement of Transmission Spectra of Liquids at Very Long Infrared Wavelengths, G. C. Hayward .....	153
2.15	Far Infrared Transmission of Commercially Available Crystals and High-Density Polyethylene, W. G. Fateley, R. E. Witkowski, and G. L. Carlson .....	159
2.16	Low Temperature Far-Infrared Transmission Properties of Polycrystalline and Single-Crystal Silicon, J. R. Durig, S. F. Bush, and F. G. Baglin .....	164

2.17	Internal Reflection Spectroscopy in the Far-Infrared Region, G. L. Carlson and W. G. Fateley .....	167
2.18	Solution for the Sample Contact Problem in ATR, T. Hirschfeld .....	172
2.19	Method for Obtaining Improved Diffuse Reflectance Spectra in the Near Infrared, A. F. Sklensky, J. H. Anderson, Jr., and K. A. Wickersheim .....	175
2.20	Calibration of Infrared Cells, A. M. Burrill .....	184
2.21	Polishing Jig for Infrared-Cell Windows, W. R. Fearheller, Jr., and H. DuFour .....	188
2.22	Restoration of Transmission to Silver Chloride Plates, D. Trimnell .....	190
2.23	High Photometric Accuracy in an Optical Null, Double-Beam Infrared Spectrophotometer, K. E. Stine and R. A. Weagant .....	191
2.24	Technique for Establishing Baseline in Infrared Spectrometry, R. O. Crisler and I. M. Brubaker .....	199
2.25	A Nomograph for the Correction of Spectral Data Recorded in Transmittance, J. H. Gould and J. T. Chen .....	204
2.26	Direct Determination of the Integrated Absorption Intensity from an Infrared Transmission Curve, P. A. H. M. Hol .....	208
2.27	Numerical Method for the Direct Determination of Integrated Absorption Intensities from Transmission Curves, A. L. K. Aljibury .....	212
2.28	Measurement of Apparent Bandwidth Parameters of an Absorption Band, A. M. Kabil and C. H. Boutros .....	214
2.29	Convenient Method for Encoding Infrared Spectra Linear in Wavenumber Using the Sadtler Notation, A. Kramer .....	218
2.30	Card Coding of Spectroscopic Data, D. S. Erley .....	220
<b>MASS SPECTROSCOPY</b>		
3.1	New Method for the Production of Ions from Non-conductors for analysis by Solid-Source Mass Spectrography, P. Deines, T. J. Eskew, and L. F. Herzog .....	225

- 3.2 Improved Source Mounting for Thermal-Source Mass Spectrometer, D. M. Creighton ..... 234
- 3.3 Ultrapurification of Graphite by Preburning for Use in Emission Spectrography and Solids Mass Spectrography, R. K. Skogerboe, A. T. Kashuba, and G. H. Morrison ..... 236

### NUCLEAR MAGNETIC RESONANCE

- 4.1 Microcell for Nuclear Magnetic Resonance Analyses, R. A. Flath, N. Henderson, R. E. Lundin, and R. Teranishi ..... 243
- 4.2 Microcells for Nuclear Magnetic Resonance Spectroscopy, S. C. Slaymaker ..... 247
- 4.3 Microsampling Techniques for Combined Gas Chromatography and High-Resolution Nuclear Magnetic Resonance Spectroscopy, B. Milazzo, L. Petrakis, and P. M. Brown ..... 250
- 4.4 Multi-Cloistered NMR Cell, E. M. Banas ..... 255
- 4.5 Apparatus for the Preparation of Sealed Samples for NMR, W. J. Lanum and F. R. McDonald ..... 257

### RAMAN SPECTROSCOPY

- 5.1 Polarized Raman Scattering from Amorphous Solids in Liquid Media, D. F. Shriver ..... 261
- 5.2 Variable Temperature Raman Cell, D. J. Antion and J. R. Durig ..... 265
- 5.3 Raman Cell for Corrosive Liquids, L. S. Arighi and M. V. Evans ..... 273
- 5.4 A Low-Temperature Cell for Laser Raman Spectroscopy on Condensed Films and Nonvolatile Solids, D. F. Shriver, B. Swanson, and N. Nelson ..... 276
- 5.5 Low-Temperature Sample Cell for a Laser Excited Raman Spectrophotometer, J. B. Bates and W. H. Smith ..... 279
- 5.6 A Laser-Raman Cell for Pressurized Liquids, R. Cavagnat, J. J. Martin and G. Turrell ..... 286
- 5.7 Use of Commercial Ultraviolet Stabilizers as Optical-Filter Solutions in Raman Spectroscopy, J. M. Brown, A. C. Chapman, and D. A. E. Rendell ..... 290

- 5.8 Signal Enhancement Device for Use with Small Area Photocathodes in Raman Spectroscopy, J. E. Griffiths 293

### ULTRAVIOLET AND VISIBLE SPECTROSCOPY

- 6.1 An Ultraviolet Ruler, E. J. Levi ..... 297
- 6.2 Battery Eliminator for Spectral-Energy-Recording Adapter on Beckman DU Spectrophotometer, J. D. Chazin and D. L. Ohliger ..... 298
- 6.3 Accurate Temperature Control of the Beckman DK-2 Recording Spectrophotometer, J. M. Veigel ..... 303
- 6.4 Attachment for Cary Model 14R Spectrophotometer, A. L. Olsen and M. E. Hills ..... 305

### X-RAY SPECTROSCOPY

- 7.1 A Method of Producing Sturdy Specimens of Pressed Powders for Use in X-ray Spectrochemical Analysis, L. Bean ..... 309
- 7.2 Sterotex — A Grinding Aid, C. K. Matocha ..... 314
- 7.3 Preparation of Glass Blanks by Fusion with Lithium Tetraborate for X-ray Spectrographic Analysis, C. H. Drummond ..... 315
- 7.4 Flat vs. Curved Aluminum Planchets for X-ray Fluorescence Spectrometry, H. D. Spitz ..... 317
- 7.5 Rotating Sample Holder for X-ray Emission Spectrometry, N. P. Quebbeman and C. W. Jones ..... 319
- 7.6 Modification of a Vacuum X-ray Spectrograph to Work in a Helium Atmosphere, W. De Spiegeleer and G. Vos 325
- 7.7 Simple Helium Enclosure for Increasing Diffraction-Line Detectability with a G. E. XRD-5 Diffractometer, H. A. Johnson ..... 328
- 7.8 Convenience Modification of the General Electric X-ray Spectrograph and Diffractometer, H. A. Johnson and M. L. Kinnaman ..... 331
- 7.9 Goniometer Stop for Use with Large Sample Chamber in G. E. X-RD5 X-ray Spectrograph, H. A. Johnson ..... 335

## MISCELLANEOUS

8.1	Technique for Measuring the Emittance of Polymers at Elevated Temperatures, J. G. Hansel and S. Y. Lee .....	337
8.2	A Cooling System for a Laboratory Magnet, R. A. Forman and T. McKneely .....	340
8.3	Method of Cutting a Diffraction Grating, F. R. Lipsett	343
8.4	Funnel Used for Powder Transfer, J. Trafford .....	345
8.5	Shearing and Crushing Device for Mixing Powders, P. L. Stewart and I. H. Tipton .....	349
8.6	Simple Slit Servomechanism for the Rudolph Spectropolarimeter, D. Moorcroft and N. L. McNiven .....	350
	Applied Spectroscopy Reference Index .....	357
	Author Index .....	359
	Cumulative Subject Index .....	363
