

CONTENTS

Part One: INSTRUMENTATION I

1. Introduction	3
2. Sources	7
3. Cell and prism materials	18
4. Cells	23
5. Mirrors, prisms, gratings, choppers	31
6. Detectors	39
7. Comparison of instruments	49

Part Two: THEORY 65

8. Absorption of infrared radiation	67
9. Vibrational spectra	72
10. Rotational spectra	83
11. Rotation-vibration spectra	90
12. Assignment of the fundamentals	96

Part Three: INTERPRETATION OF INFRARED SPECTRA 107

13. Preliminary considerations	109
14. Vibration of hydrogen attached to various compounds	118
15. Frequencies associated with olefins	136
16. Aromatic type compounds	146
17. Groups other than C—H	158
18. Quantitative analysis	166
19. Experimental	173
Index	181
