1 GRATING SPECTROMETERS

- A. Introduction 1
- B. Optical Layout of Spectrometers 2
 - a. General 2
 - b. Littrow Mount 2
 - c. Czerny-Turner Mount 4
 - d. Ebert-Fastie Mount 6
 - e. f-Number of the Monochromator 8
- C. Gratings 8
 - a. General 8
 - b. Grating Formula and Intensity Distribution 9
 - c. Spectral Slit Width 15
- D. Energy Limitations on the Resolving Power 16
- E. Filters 19
 - a. Introduction 19
 - b. Attenuation Requirements 20
 - c. Elimination of Short-Wavelength Radiation 22
 - d. Reflection Crystal Filters (Reststrahlen Filters) 24
 - e. Transmission Crystal-Powder Filters 24
 - f. Reflection Filter Gratings 30
 - g. Transmission Filter Gratings 31
 - h. Metal Mesh Reflection Filters 35
 - j. Interference Filters 41
- F. Checks for False Radiation 41

G.	Polarization of Spectrometer Components	42
a.	<i>Reflection Filter Gratings</i>	43
b.	<i>Diffracton Gratings</i>	44
c.	<i>Crystal Reflection Plates</i>	44
H.	Wavelength Calibration	44
a.	<i>General</i>	44
b.	<i>Calibration with Water Vapor</i>	46
c.	<i>Calibration with Methyl Chloride and Other Compounds</i>	49
	References	52
2	COMMON PARTS OF GRATING SPECTROMETERS AND INTERFEROMETERS AND SOME ACCESSORIES	
A.	Sources	55
B.	Detectors	57
a.	<i>Detector Characterization</i>	57
b.	<i>Golay Detector</i>	58
c.	<i>Liquid-Helium Temperature Detectors</i>	60
1.	Introduction and General Considerations	61
2.	Carbon Resistance and Doped Germanium Bolometers	61
3.	Indium-Antimonide Detector	64
4.	Doped Germanium Photoconducting Detectors	66
5.	Comparison of the Liquid-Helium Temperature Detectors and Problems of Their Use	67
C.	Light-Pipes	68
D.	Conical Light-Pipes (Channel Condensers)	72
E.	Polarizers	75
a.	<i>Linear Polarizers</i>	75
