Foreword
Programme
Addresses

PART I. OPENING AND EVENING LECTURES

Opening Lecture

Light Fluctuations as a New Spectroscopic Tool.....E. WOLF 1

Evening Lectures

Attempts to Treat Nonlinear Imaging DevicesE. INGELSTAM 15
Infrared Optical Materials, Old and New.....S. S. BALLARD 23

PART II. PHOTOGRAPHIC OPTICS

Aberration Theory and Lens Design

Canonical Pupil Coordinates in Geometrical and Diffraction Image Theory ...
..... H. H. HOPKINS 31
Analytical Determination of Axial Spherical Aberration in Spherical-Mirror
SystemsP. LINDBERG 36
Principal Points, Cardinal Axis and Focal Planes of a Slightly Decentred Opti-
cal SystemJ. BARTKOWSKA 39
The Correction of Optical SystemsM. HERZBERGER 46
Optical Transfer Function and Lens Design Techniques.....K. SAYANAGI 55
Objectifs photographiques grand-angulaires utilisant une surface parabolique
—Wide angle camera lens with parabolic surface—Ed. HUGUES 57

Lens Design

A Series of Lenses Designed for Optimum PerformanceR. E. HOPKINS 60
Automatic Lens Design by Statistical Analysis.....B. BRIXNER 68
Automatic Lens Design....T. SUZUKI, Y. ICHIOKA, S. YONEZAWA, and M. KOYAMA 74
Some Examples of Lens Designing by ComputerC. G. WYNNE 81
Some Experiments on Automatic Optical DesignY. MATSUI and R. HIROSE 86
Some Properties of Diapoints.....S. KATO 93

Lens Testing and Image Assessment

Some Applications of the Wave Front Shearing Interferometer....J. B. SAUNDERS 99
Some Applications of the Gas Laser as a Source of Light for the Testing of
Optical SystemsM. V. R. K. MURTY and D. MALACARA-HERNANDEZ 106
Lenses for Ultra-Microphotography.....Z. KOANA and Z. WAKIMOTO 113
New Instrument for Assessing Lens Quality by Pupil Scanning (Spot Diagram
Generation)L. R. BAKER and J. N. WHYTE 121
High Speed Image Synthesizer.....T. SUZUKI, Y. ICHIOKA, and M. KOYAMA 128

Measurement of Optical Transfer Function

Measuring Instruments for Optical Transfer FunctionH. KUBOTA 137
Automatic Recording Instrument for Measuring Optical Transfer Functions
..... L. R. BAKER 146
Le transfert de modulation des objectifs.....J. F. SIMON 153

A Measuring Instrument for Optical Transfer Function —By Means of Electrical Frequency Analysis Method—	154
..... T. OSE, M. TAKASHIMA, and I. YAMAGUCHI	
An Instrument for the Evaluation of the Image Performance of Photographic Lenses	160
..... K. MURATA and H. MATSUI	
Measurement of OTF Using Large Test Pattern of Single Frequency	166
..... S. TATUOKA	
A Polarizing Shearing Interferometer for Evaluating Photographic Optics	172
..... T. TSURUTA	
OTF in Photographic Optics-I	
Experimental Measurements of Modulation Transfer Functions of Intensifier and Fluorescent Screens	178
..... H. A. W. SCHÖBER, R. ROHLER, and H. PULVERMACHER	
The Application of Optical Transfer Function in Radiography	183
..... K. DOI, A. KAJI, T. TAKIZAWA, and K. SAYANAGI	
A new Definition of Photographic Image Information	191
..... H. KANAMORI	
Sensitivity and Sharpness of X-Ray Film Exposed with Intensifying Screens	196
..... W. F. BERG and A. SPÜHLER	
The Determination of the Modulation Transfer Function of Color Films	203
..... S. OOUÉ and I. HATANAKA	
Evaluation of Light-Scattering Images	208
..... J. C. URBACH	
Some Properties of Random Charts	215
..... K. KINOSHITA	
OTF in Photographic Optics-II	
Geometrical Optical Approximation of Optical Transfer Function... K. MIYAMOTO	222
Effects of Large Aberration on the Optical Transfer Function	226
..... I. OGURA	
Transfer Functions for Wide Spectrum Imagery	231
..... R. R. SHANNON	
The Aberration Synthesizer	234
..... Y. MATSUI and M. TAKASHIMA	
Chromatic Aberrations and Optical Transfer Functions of Photographic Lenses	238
..... K. ROSENHAUER and K. J. ROSENBRUCH	
Image Formation-I	
Formation of Images in Coherent and Partially Coherent Illumination.....	243
..... A. MARÉCHAL	
Image-Forming Performance of Projection Systems.....	251
..... J. TSUJIUCHI	
Recherches récentes sur la cohérence partielle	260
..... G. NOMARSKI	
Improvement in Resolving Power of Optical Systems	261
..... G. LANSRAUX	
Superresolution Image-Forming Systems for Objects with Restricted Lambda Dependance.....	273
..... J. D. ARMITAGE, A. LOHMANN, and D. P. PARIS	
Image Formation-II	
Far-Field Diffraction Patterns of Single and Multiple Circularly Symmetric Apertures.....	276
..... A. I. MAHAN, C. V. BITTERLI, and S. M. CANNON	
Diffraction Anomaly of Various Types of Extended Source —By Polarizing Microscope with Crossed Nicols—.....	287
..... T. ASAKURA and Tsuneko SUZUKI	
Intensity Distribution near the Focus of a Large Aperture Optical System....	294
..... S. MARUYAMA	
Evaluation of Optical Image by Wave Aberration	298
..... K. P. MIYAKE	
A New Method of Measuring Particle Size by Diffraction Techniques.....	302
..... B. J. THOMPSON	
Effect of Coherence on the Slit Function	308
..... H. SAKAI	

Optical Elements and Materials

Role of Fiber Optics in Photography.....	N. S. KAPANY	312
Image Transfer Properties of Fiber Bundle.....		
.....	H. OHZU, T. SAWATARI, and K. SAYANAGI	323
The Chemical Resistance of Optical Glasses		
.....	A. M. REID, R. J. PARRY, and J. BLACKBURN	330
On the Evaporation of Two-Component Dielectric Thin Films for Reflection- Reducing Coatings and Interference Filters.....		
.....	R. JACOBSSON and J. O. MÅRTENSSON	333
Mechanical Stresses in Vacuum Deposited Films of Ag, MgF ₂ and ZnS		
.....	K. KINOSITA, K. NAKAMIZO, K. MAKI, K. ONUKI, and K. TAKEUCHI	340
Spectral Reflectance of Lippmann Plate.....		
.....	M. IWATA, R. MAKABE, and S. KATSUBE	347

PART III. SPECTROSCOPIC OPTICS**Far Infrared Instrumentation-I**

Far Infrared Spectroscopy.....	L. GENZEL	353
Far Infrared Spectrometer with a Variable Depth Grating		
.....	T. SAKURAI and S. TAKAHASHI	358
An Application of Double Chopping System to Far Infrared Spectrophotometer	S. MINAMI, H. YOSHINAGA, and K. MATSUNAGA	364
A Far Infrared Spectrometer Designed Mainly for Use in Solid State Physics	I. MAKINO, T. IWASAKI, and I. IWAHASHI	369
Versatile Far Infrared Spectrophotometer	K. KUDO and Y. MOCHIDA	372

Far Infrared Instrumentation-II

Récents développements du spectromètre O. N. E. R. A.....	A. GIRARD	379
Instrumental Problems in High Resolution Infrared Spectroscopy		
.....	H. MAKABE, Y. FUKUDA, and S. HASHIZUME	385
Self Calibration and Automatic Correction for the Wavelength Response of a Monochromator-Detector System	R. A. Brower and A. T. STAIR, Jr.	390
Transmission Grating as an Infrared Filter.....	Y. SAKAYANAGI	397

Infrared Interference Spectroscopy

Progrès récents en spectroscopie interférentielle,.....	P. JACQUINOT	401
Measurement of Spectral Transmittance and Reflectance with a Far Infrared Michelson Interferometer	E. E. BELL	412
High Resolution Far Infrared Interferometry with Application to Solid State Physics.....	P. L. RICHARDS	417
Recent Techniques in Far Infrared Spectroscopy.....	H. YOSHINAGA	420
A New Computing Method for Interference Spectroscopy.....	S. FUJITA, H. YOSHINAGA, K. CHIBA, K. NAKANO, S. YOSHIDA, and H. SUGIMORI	429
Spectra of Argon in the 2-6 μ Region Obtained with a Field-Widened Inter- ferometer		
.....	S. P. STEWART, E. R. HUPPI, A. T. STAIR, Jr., and G. A. VANASSE	433

Interference Spectroscopy

A New Design of a Scanning Fabry-Perot Interferometer.....		
.....	P. N. SLATER, H. T. BETZ, and G. HENDERSON	440
Principe et réalisation d'un spectromètre Fabry-Perot multicanal: le SIMAC	R. CHABBAL et R. PELLETIER	445
Nouvelle méthode spectrométrique interférentielle	R. PRAT	448

Profile Analysis of Spectral Line by Fabry-Perot Interferometer	T. TAKO and M. OHI	451
Vacuum Ultraviolet Instrumentation		
High Resolution Vacuum Spectrograph.....	G. H. DIEKE and D. F. HEATH	455
Instruments et techniques pour l'ultraviolet lointain au C. N. R. S.-Bellevue	B. VODAR	462
The Fabry-Perot Interferometer in the Middle and Vacuum Ultraviolet		
.....	D. J. BRADLEY, B. BATES, C. O. L. JUULMAN, and S. MAJUMDAR	467
Collimating Grating Monochromators for the Vacuum Ultraviolet		
.....	D. E. BEDO and H. E. HINTEREGGER	473
An Ultraviolet Rocket Stellar Spectrometer	D. U. WRIGHT, Jr.	478
An Ultraviolet Spectrophotometer for Satellite Astronomy		
.....	K. HALLAM and J. MANGUS	482
Vacuum Ultraviolet Light Sources and Detectors		
Some Instrumentation Problems in the Vacuum Ultraviolet below 1000 Å		
.....	G. L. WEISSLER	486
Argon, Krypton, and Xenon Continuum Light Sources for the Vacuum Ultraviolet.....	R. E. HUFFMAN, Y. TANAKA, and J. C. LARRABEE	494
Extreme Ultraviolet Emission from Beryllium Oxide		
.....	K. FUKUDA, Y. UCHIDA, and M. NAKAGAWA	501
Les étincelles sous vide utilisées comme source de lumière pour l'ultraviolet lointain.....	J. ROMAND	506
Ultraviolet Photography and Spectroscopy Using a Spectrally Selective Image Converter	L. DUNKELMAN and J. P. HENNES	511
Vacuum Ultraviolet Spectroscopy		
Possible Uses of Thin Films as Polarizers in the Vacuum Ultraviolet Region	F. ABELÈS	517
Polarizers for the Extreme Ultraviolet.....	W. R. HUNTER	520
Determination of Optical Constants of Glasses in the Vacuum Ultraviolet Region.....	F. SASAKI, H. FUKUTANI, K. ISHIGURO, and T. IZUMITANI	527
Recent Instrumentation for the Optical Studies of Solids in the Vacuum Ultraviolet	P. L. HARTMAN	532
Application of Vacuum Ultraviolet Spectroscopy in Solid State Physics	Wm. A. RENSE	540
The Measurement of Absolute Photon Fluxes in the 100 Å to 300 Å Region	D. H. TOMBOULIAN	542
Optical Grating		
Etude théorique de la diffraction de la lumière par les réseaux	P. BOUSQUET	549
On the Ruling Errors of a Diffraction Grating and Their Effects on the Spectral Lines	K. SHIMIZU	555
Modern Diffraction Gratings.....	D. RICHARDSON	562
Infrared Materials		
Far Infrared Reflectance Spectra and Dielectric Dispersion of a Variety of Materials Having the Perovskite and Related Structures...C. H. PERRY		564
Far Infrared Electronic Transitions in Rare Earth and Transition Elements Ions Embedded in Crystals		
.....	A. HADNI, X. GERBAUX, G. MORLOT, and P. STRIMER	574
Optical Measurement of Several Materials in the Far Infrared Region		
.....	A. MITSUISHI, H. YOSHINAGA, K. YATA, and A. MANABE	581

Far Infrared Spectroscopy of Compressed Gases Using a Michelson Interferometer	D. R. BOSOMWORTH and H. P. GUSH	588
An Absolute Method of Determining Transmission and Reflection Coefficients	S. J. FRAY, A. R. GOODWIN, F. A. JOHNSON, and J. E. QUARRINGTON	594
Design and Evaluation of a New Photoelectric Spectropolarimeter for the Study of Faraday Effect Dispersion.....	J. BADOZ, B. BRIAT, and M. BILLARDON	600
Optical Faraday Effect of II-VI Compound Crystals	T. KODA, A. EBINA, and S. SHIONOYA	604
Solid State Spectroscopy		
Modern Spectroscopy of Solids.....	D. L. DEXTER	609
Ultraviolet Absorption of Solid Deuterium.....	G. BALDINI	613
Exciton Absorption in Mixed Alkali Halides	Y. NAKAI, T. MURATA, and K. NAKAMURA	616
Optical Properties of Sodium Indide-Thallium Crystals.....	Y. UCHIDA and E. MATSUI	622
Ultraviolet Absorption of Transition Metal Ions in Alkali-Halides	G. KUWABARA and K. AOYAGI	627
Vacuum Ultraviolet Absorption Bands of Ag-Doped Alkali Halides.....	R. ONAKA, A. FUKUDA, K. INOHARA, T. MABUCHI, and Y. FUJIOKA	631
Laser Spectroscopy		
Time Resolved Spectroscopy at 1.06μ of Nd^{+3} Glass Laser.....	E. SNITZER	641
Spectroscopy of He-Ne Laser Discharge	N. SUZUKI	642
Stimulated Emission of New Infra-red Transitions in Rare Gases.....	R. CAGNARD, R. DER AGOBIAN, J. L. OTTO, R. ECHARD, and M. PAUTHIER	648
Author Index		655
List of Participants		657
Bureau of the International Commission for Optics.....		670
Organizing Committee and Sub-Committees		671
