

TABLE OF CONTENTS

PREFACE	xv
PHOTOPHYSICS OF HIGHLY-EXCITED STATES	1
G. L. Findley, J. A. Wilder, P. Hochmann and S. P. McGlynn	
1. Introduction	1
2. Quantum Defect Theory	8
3. Core Effects	14
4. Intermolecular Rydberg Correlations	22
5. Field Effects	27
6. Rydberg States in Condensed Media	33
7. Concluding Remarks	37
METHODS FOR STUDYING HIGHER EXCITED STATES IN MOLECULES AND MOLECULAR CRYSTALS BY MEANS OF SYNCHROTRON RADIATION	
41	
Ernst-Eckhard Koch and Peter Gürtler	
1. Introduction	41
2. Properties of Synchrotron Radiation Sources: A Short Overview	46
3. Some General Aspects of Synchrotron Radiation Instrumentation	54
4. Absorption and Reflection Spectroscopy	57
5. Time-Resolved and Energy-Resolved VUV Luminescence Spectroscopy	67
6. Photoemission	72
7. Perspectives	89
8. Appendix	92

NONLINEAR OPTICS AND LASER SPECTROSCOPY IN THE VACUUM ULTRAVIOLET	105
--	-----

Stephen C. Wallace

1. Introduction	105
2. Vacuum Ultraviolet Lasers	106
3. Nonlinear Optical Methods for Producing Tunable VUV Radiation	110
4. Applications to Chemical Physics	121
5. Future Goals	127

MULTIPHOTON IONIZATION AND THIRD-HARMONIC GENERATION IN ATOMS AND MOLECULES	133
--	-----

John C. Miller and R. N. Compton

1. Introduction	133
2. Resonantly-Enhanced Multiphoton Ionization	134
3. Multiphoton Ionization and Third-Harmonic Generation in Rare Gases	145

ELECTRON-IMPACT SPECTROSCOPY OF MOLECULES	163
---	-----

H. H. Brongersma, H. A. van Sprang and
G. J. Verhaart

1. Introduction	163
2. General Theory	164
3. Experimental	170
4. Experimental Results	173

ELEMENTS OF QUANTUM DEFECT THEORY. I. INTRODUCTION AND FORMALISM	191
---	-----

A. R. P. Rau

1. Introduction to Quantum Defect Theory	191
2. Multichannel Quantum Defect Theory in Atoms	209

ELEMENTS OF QUANTUM DEFECT THEORY. II.

A UNIFIED THEORY OF RYDBERG AND

AUTOIONIZING STATES 217

K. T. Lu

1.	Introduction	217
2.	Eigenchannel Quantum Defect Theory	221
3.	<i>Ab initio</i> Calculations of Quantum Defect Parameters	234
4.	Applications	235

ELEMENTS OF QUANTUM DEFECT THEORY. III.

DIATOMIC MOLECULES 245

Chris H. Greene

1.	Introduction to Molecular QDT	245
2.	Comparison with Experiment	251
3.	Inclusion of Molecular Dissociation	253

NEGATIVE-ION STATES 261

R. N. Compton

1.	Introduction	261
2.	Negative-Ion Properties	262
3.	Unimolecular Electron Attachment	265
4.	Multiply-Charged Negative Ions	270
5.	Photoabsorption by Negative Ions	271
6.	Recent Studies of Long-Lived He Negative Ions	274
7.	Production of Negative Ions by Photon Reactions	279
8.	Collision of High-Rydberg Atoms with Electron-Attaching Molecules and the Possible Influence of Dipole Bound States	281
9.	Negative Ions of Molecular Clusters	286

SUPEREXCITED AND IONIC STATE RELAXATION

PROCESSES IN VACUUM ULTRAVIOLET EXCITED

POLYATOMIC MOLECULES 297

Sydney Leach

1.	Introduction	297
----	--------------------	-----

2.	Fundamental Processes	298
3.	Competing Decay Channels of Superexcited States	305
4.	Methods for Studying Superexcited and Ionic States and Their Relaxation Processes	310
5.	Further Remarks on Molecular Autoionization	317
6.	Decay of Ion States	321

PHOTOIONIZATION DYNAMICS OF SMALL MOLECULES 341

J. L. Dehmer, Dan Dill and A. C. Parr

1.	Introduction	341
2.	Shape Resonances in Molecular Photoionization	343
3.	Molecular Autoionization	377
4.	Concluding Remarks	396

PHOTODISSOCIATION DYNAMICS OF GAS-PHASE SMALL MOLECULES 409

M. N. R. Ashfold

1.	Introduction	409
2.	ICN Photodissociation in the Near Ultraviolet	413
3.	VUV Photodissociation of HCN	426
4.	VUV Photodissociation of the Cyanogen Halides	443
5.	Conclusions	457

VUV SPECTROSCOPY OF RARE-GAS VAN DER WAALS DIMERS 467

P. M. Dehmer and S. T. Pratt

1.	Introduction	467
2.	General Background	468
3.	Experimental Apparatus	471
4.	Dependence of the Cluster Ion Signals on Nozzle Stagnation Pressure	474
5.	Appearance Potentials of the Dimer Ions and Dissociation Energies of the Dimer-Ion Ground States	475

6.	Molecular Rydberg Structure Between the Atomic Fine-Structure Thresholds: Dissociation Energies of $X_2^+(C\ 2\Pi_{1/2u})$ and $XY^+(B\ 2\Pi_{1/2}$ and $D\ 2\Sigma_{1/2}^+)$	482
7.	Molecular Rydberg Structure in the Spectra of NeY Near the Ne 3s Atomic Resonance	493
8.	Molecular Rydberg Structure in the Spectra of ArKr and ArXe Near the Ar 5s and 3d Atomic Resonances	500
9.	Molecular Rydberg Structure in the Spectra of X_2 and XY Near the High-Lying Atomic Rydberg States	502
10.	Summary and Conclusions	510

EXCITONS AND ENERGY TRANSFER IN INSULATORS 515

J. Jortner, E. E. Koch and N. Schwentner

1.	Prologue	515
2.	Frenkel Excitons	517
3.	Wannier Excitons	525
4.	Deep Wannier Atomic Impurity States	534
5.	Excitons and Impurity States in Rare-Gas Fluids	540
6.	Molecular Wannier Impurity States in Rare-Gas Solids	545
7.	Excited-State Dynamics in Rare-Gas Solids	551
8.	Self-Trapping of Excitons in Rare-Gas Solids	552
9.	Lattice Relaxation Around Impurity States	558
10.	Electronic Relaxation of Impurity States	564
11.	Electronic Energy Transfer in Rare-Gas Solids	567
12.	Perspectives	573

REGULAR AND IRREGULAR MOTION IN CLASSICAL AND QUANTUM SYSTEMS 579

Marko Robnik

1.	Introduction: Order and Chaos	579
2.	Integrable Systems	581
3.	Perturbation of Integrable Systems and the KAM-Theorem	587
4.	Area-Preserving Mappings	591
5.	Chaotic Systems	597

6.	A Generic System is Neither Integrable Nor Ergodic, But Shows a Stochastic Transition	601
7.	The Birkhoff-Gustavson Normal Form and Invariant Tori Below the Critical Energy	604
8.	Do Quantum Systems Exhibit Chaotic Behavior?	606
9.	Integrable Systems and Tori Quantization	608
10.	Quantization of Chaotic Systems	612
11.	Statistics of Energy Levels	618
12.	Quantizing a Generic System	623
13.	Conclusions and Discussion	625

NEW TRENDS IN ATOMIC DIAMAGNETISM	631
---	-----

J. C. Gay

1.	Introduction	631
2.	The Coulomb Spectrum	633
3.	The Landau Spectrum	638
4.	The Atom in a Magnetic Field	650
5.	Classical Mechanics of Diamagnetism	654
6.	Quantum Mechanical Approach	670
7.	Semi-Classical Methods	686
8.	Experimental Studies in Atomic Physics	691
9.	Prospects and Conclusions	700

EVIDENCE FOR MOTIONAL ELECTRIC FIELD EFFECTS IN THE ABSORPTION SPECTRUM OF LITHIUM VAPOR IN A MAGNETIC FIELD	707
--	-----

H. M. Crosswhite, F. S. Tomkins, H. Crosswhite
and W. R. S. Garton

1.	Introduction	707
2.	Results and Discussion	708

ON THE SPECTRUM OF $V(\rho) = -\frac{qt}{\rho} + \frac{rt}{\rho^2} + \text{stp} + t\rho^2$. PHYSICAL IMPLICATIONS FOR A VARIETY OF PROBLEMS	721
--	-----

J. A. C. Gallas and R. F. O'Connell

1.	Introduction	721
2.	Solution of the Eigenvalue Problem	722
3.	Applications	724

4. Summary	727
------------------	-----

PERTURBATION SPECTROSCOPY	729
---------------------------------	-----

John D. Scott

1. Introduction	729
2. Perturbation Theory and MCD Spectroscopy	736
3. Electric Field-Effect Spectroscopy	756
4. Pressure-Effect Spectroscopy	760

CIRCULAR DICHROISM AND MAGNETIC CIRCULAR DICHROISM STUDIES IN THE VACUUM ULTRAVIOLET	765
--	-----

A. Gedanken

1. Introduction	765
2. Instrumentation	769
3. Results	770

ELECTRIC FIELD STUDIES IN THE VACUUM ULTRAVIOLET	783
---	-----

Daniel D. Altenloh and B. R. Russell

1. Introduction	783
2. Experimental	784
3. General Results	786
4. Excited-State Parameters	791
5. Arc-Suppressor "Solvent" Effects	807
6. Conclusions	816

VALENCE-SHELL AND RYDBERG TRANSITIONS IN LARGE MOLECULES	819
---	-----

C. Sandorfy and L. S. Lussier

1. Introduction	819
2. The Rydberg Concept	820
3. From Spectra to Photochemistry	826
4. Rydberg States of Transition Metal Complexes	832

MULTIPHOTON SPECTROSCOPY AND PHOTOCHEMISTRY	841
M. B. Robin	
1. Introduction	841
2. Nonlinear Photochemistry	843
3. Two Examples	845
4. Other Systems	848
EXCESS ENERGY DEPENDENCE OF VIBRATIONAL RELAXATION AND PHOTOPHYSICAL BRANCHING RATIOS IN ISOLATED AROMATIC MOLECULES: RELEVANCE TO VACUUM ULTRAVIOLET PHOTOCHEMISTRY	
	855
E. C. Lim	
1. Introduction	855
2. Spectral Characteristics of Gas-Phase Fluorescence	856
3. Excess-Energy Dependence of Radiationless Transitions: Theory	859
4. Excess-Energy Dependence of Radiationless Transitions: Experiment	863
5. Intramolecular Vibrational Relaxation	867
6. Photochemical Implications of the Energy Dependence of Electronic Relaxation Processes	870
THEORETICAL STUDIES OF THE ELECTRONIC STRUCTURE AND SPECTRA OF NH_3^+	
	875
Angelo R. Rossi and Phaedon Avouris	
1. Introduction	875
2. Franck-Condon Analysis of the $^2\text{A}_1(\text{NH}_3^+) \leftarrow ^1\text{A}_1(\text{NH}_3)$ Spectrum	878
3. <i>Ab initio</i> Calculations on Low-Lying States of NH_3^+	881
THEORETICAL CORRELATIONS OF ORGANIC PHOTOCHEMICAL REACTIONS IN THE VUV	
	895
Angelo R. Rossi and R. Srinivasan	
1. Introduction	895
2. 1,4-Cyclohexadiene	897
3. Methylene Cyclopropane	903

PHOTOCHEMISTRY OF SATURATED ALCOHOLS AND OPEN-CHAIN ETHERS AT 185 nm IN THE LIQUID PHASE	913
Clemens von Sonntag	
1. Introduction	913
2. Discussion	913
PHOTOLYSIS OF CYCLIC ETHERS AND ACETALS AT 185 nm IN THE LIQUID PHASE	927
Clemens von Sonntag	
1. Discussion	927
LIST OF PARTICIPANTS	945
SUBJECT INDEX	951
