CHAPTER I. LOW DENSITY AND COLD PLASMAS

Good News - Bad News ? Stark Broadening at Moderate Electron Densities	
V. Helbig	3 *
Experimental Study of Weak Forbidden Components of the Two He I Spectral Lines	
B.T. Vujicic and L.M. Cirkovic	35
Observation of $2^1P - 3^3D$ Pressure-Induced Transition in Helium	
D.M. Spirit, D.D. Burgess and M.P.S. Nightingale	37
Broadening of a Valence Autoionization Resonance in Electric Fields	
D.E. Kelleher, J.F. Delpech, J. Weiner and C.W. Clark	39
Stark Parameter Dependence on the Upper Level Ionization Potential	
J. Puric, M. Cuk and I.S. Lakicevic	41
Experimental Verification of Some Stark Width and Shift Trends	
B.A. Rathore, I.S. Lakicevic, M. Cuk and J. Puric	43
Experimental Stark Widths for Phosphorus and Sulfur and Systematic Trends for Third Row Ion Line Broadening	
M.H. Miller, D. Abadie and A. Lesage	45
Regularities in Rare Gas Ion Line Broadening	
K.-P. Nick and V. Helbig	47
Experimental Determination of the Stark Widths of S II Lines	
S. Mar, A. Czernichowski and J. Chapelle	49
Electron Impact Broadening of Spectral Lines of Singly Ionized Noble Gases, Multiplets $np^2P^0 - nd^2D$	
N. Konjevic and T. Pittman	51

Stark Broadening of He I Lines of Astrophysical Interest :
 Regularities within Spectral Series and Influence of Debye
 Shielding
 M.S. Dimitrijevic and S. Sahal-Bréchet 53

Stark Widths and Shifts of Ne I Lines
 J. Puric, M. Cuk, M. Cekic, B.A. Rathore and I.S. Lakicevic 55

Stark Broadening of Br I Lines
 R. Konjevic, M. Platisa and N. Konjevic 57

Broadening and Shift of Neon I Lines
 W. Schade, K.-P. Nick and V. Helbig 59

Stark Broadening and Shift of C I Lines in the VUV
 D. Merschmann and V. Helbig 61

Stark Widths and Asymmetries of Some Neutral Carbon Lines
 D.W. Jones and W.L. Wiese 63

Stark Broadening of Hydrogen Lines in the Presence of a Magnetic
 Field
 G. Mathys 65

Effects of Emitter Motion on the L_{β} Stark Profiles Investigated
 by Varying the Plasma Temperature at Constant Electron Density
 M. Geisler, K. Grützmacher and B. Wende 67

Effects of Emitter Motion on the Plasma Broadening of Hydrogen
 Resonance Lines
 J. Seidel 69

Width and Shift Measurements of Spectral Lines of He I in a
 Proton Gas
 T. Pittman and N. Konjevic 71

Stark Broadening of Hydrogen Balmer α Line at Low Densities
 C. Stehlé and N. Feautrier 73

Lyman- α Stark Broadening : an Improved Impact Model
 M.A. Gigosos and F. Torres 75

Amplitude of the Satellites of the Lyman- α Line in an Argon Plasma	
M.-C. Bacchus - Montabone1	77
Global Theory of Spectral Line Shape in the Weak Density Limit	
O. Vallée, J. Picart and N. Tran Minh	79
Phase Shift Calculations for General Stark Problems	
A. Rabinovitch, R. Thieberger and M. Friedman	81

CHAPTER II, PLASMA SHIFTS

Shifts of Ion Lines in Plasmas	
D.E. Kelleher and J. Cooper	85 *
Statistical Mechanics of Dense Plasmas and Implications for the Plasma Polarization Shift	
F.J. Rogers	121 *
Static and Dynamic Shifts of Spectral Lines	
D.B. Boercker and C.A. Iglesias	139
Shifts of Spectral Lines in a Plasma	
C.A. Iglesias	141
Atomic Structure and Line Shift of Highly Charged Ions in Dense Plasmas	
H. Nguyen, M. Koenig, M. Caby and G. Coulaud	143

CHAPTER III, HOT AND DENSE PLASMAS

Some Aspects of Dense Plasma Physics	
S.J. Rose	147 *
Experimental Radiation Transfer Studies Associated to Population Inversions in Laser-Plasmas	
A. Klisnick, P. Jaeglé, G. Jamelot and A. Carillon	157 *

Local Fields in Strongly Coupled Plasmas E.L. Pollock and J.C. Weisheit	181 *
Line Broadening and Merging in Dense Plasmas B. d'Etat and H. Nguyen	209 *
Effect of Ion Dynamics on Stark Profiles in Hot and Dense Plasmas R. Stamm, Y. Botzanowski, V.P. Kaftandjian and B. Talin	237
Effect of Short-Range Correlations on Thomson Scattering Profiles in Cesium and Barium Plasmas D.B. Boercker, R.W. Lee and F.J. Rogers	239
Composition and Temperature Effects on Low Frequency Microfields and Their Applications B. Held	241
Quantum Corrections to the High - and Low - Frequency Thermal Microfields in a Dense Plasma M.-M. Gombert, B. Held and C. Deutsch	243
Monte - Carlo Calculations of Microfield Distributions A. Angelié and D. Gilles	245
X-Ray Emission Spectra of Dense H-Like and He-Like Plasmas D. Lambert	247
Asymmetrical Broadening and Merging of Hydrogenic Lines Emitted from Dense Plasmas E. Leboucher, M. Koenig, B. d'Etat, L. Terray and H. Nguyen	249
Spectral Series Limit as a Diagnostic Tool for High Density Plasmas B. D'Etat, E. Leboucher, H. Nguyen, A. Carillon, M. Lamoureux G. Jamelot and P. Jaeglé	251
Stark Broadening of Dielectronic Satellite Lines J. Banon, M. Koenig and H. Nguyen	253
Direct Comparison of Electron Density Measurements in Laser-Created Plasmas Using Stark Broadening and Satellite Line Intensities Ph. Alaterre, P. Audebert, J.P. Geindre, C. Popovics and J.C. Gauthier	255

VUV Absorption Measurements of Lyman-Alpha Lineshapes in a Cool Hydrogen Plasma	
K.G. Baldwin, D.D. Burgess, D.A. Evans, J. Marangos and M.G. Nicholson	257
Ion Quadrupole Effects in Spectral Line Broadening	
R.F. Joyce and C.F. Hooper, Jr.	259
Dynamical Electric Fields in Strongly Coupled Equilibrium Plasmas	
P.M. Bakshi and G.J. Kalman	261
CHAPTER IV. COLLISIONAL EFFECTS IN NONLINEAR LASER INTERACTION PROCESSES	
Collision-Induced Coherence and Population Gratings in Four-Wave Light Mixing in Sodium Vapor	
N. Bloembergen and L.J. Rothberg	265 *
Line Shapes in Four Wave Mixing Spectroscopy	
A.M. Schnitzer and W. Behmenburg	287 *
Stimulated Photon Echo Techniques for Collisional Studies	
J.L. Le Gouët and J.C. Keller	309 *
Four-Wave Transverse-Longitudinal Mixing in a Plasma	
D.M. Spirit, D.D. Burgess and J.N. Elgin	335
Interpretation of Pump-Probe and 4-Wave Mixing Line Shapes	
P.R. Berman, G. Khitrova and J.F. Lam	337
Line Shape of the Raman Contribution to Time-Resolved Saturation Spectroscopy - Application to Neon Metastable Levels	
Ch. Lermينياux, S. Saoudi, M. Gorlicki and M. Dumont	339
Forward and Backward Scattered Line Shapes in Stimulated Raman Spectroscopy	
R.J. Exton and M.E. Hillard	341
Collisional Relaxation of Atoms Excited by Laser Beam	
J. Czub and J. Fiutak	343

Radiation Power Broadening of the Na-D Lines A.R.D. van Bergen, Tj. Hollander and C.Th.J. Alkemade	345
Resonant Multiphoton Ionization of Atomic Hydrogen D.E. Kelleher, M. Ligare and L. Brewer	347
Modelling Line Shapes of Laser-Induced Fluorescence in the Presence of Poisson Process Noise B.W. Shore and J.H. Eberly	349
CHAPTER V. COLLISION-INDUCED ABSORPTION, REDISTRIBUTION OF RADIATION AND HALF COLLISIONS	
What are we learning from collisional redistribution ? K. Burnett	353 *
Laser-Induced Collision Processes : Polarization Effects and Ionization K.-S. Lam, P.L. DeVries, T.F. George	369 *
A Molecular Half Collision Analysis of Atomic Lineshapes F.H. Mies and P.S. Julienne	393 *
Fine-Structure Effects in Far-Wing Collisional Redistribution of Light M.D. Havey and L.L. Vahala	421 *
Polarization of the Light Emitted by Photofragments J. Vigué	437 *
Redistribution beyond the Impact Approximation L. Klein, B. Talin, V.P. Kaftandjian and R. Stamm	447 *
Some Aspects of Cooperative Redistribution D. Voslamber	469 *
Redistribution and Radiation Transfer in Astrophysical Situations I. Hubeny	501 *

Far-Wing Redistribution Line Shapes and Fluorescence Polarizations for Ba-Ar, Xe Systems	
W.J. Alford, N. Andersen, K. Burnett and J. Cooper	523
Half Collision Analysis of 1P Polarization Redistribution	
P.S. Julienne and F.H. Mies	525
Close-Coupling Calculations of D1/D2 Branching Ratios in Na-Rare Gas Laser-Assisted Collisions	
L. Vahala, M.D. Havey and P.S. Julienne	527
Disorientation and Disalignment in Na-Ar Optical Collisions	
W. Behmenburg, V. Kroop and F. Reberstrost	529
Non Adiabatic Effects in Atomic Line Profiles : SemiClassical Study	
A. Spielfiedel, N. Feautrier and E. Roueff	531
Non Adiabatic Effects in Photon Assisted Scattering Phenomena	
I. The Binary Model in Electron Line Broadening Theory	
II. The Binary Model in Optical or Radiative Laser Field Transitions	
H. Van Regemorter and N. Feautrier	533
Far Wing Intensities of Collisionally Broadened Spectral Line in the Case of Strongly Perturbed States	
J.P. Visticot, J. Pascale and B. Sayer	537
Line Shapes in the Region of Avoided Level Crossing	
T. Holstein, M. O'Callaghan and A. Gallagher	539
Unified Franck-Condon Analysis of Radiatively Assisted Inelastic Collisions	
J. Szudy and W.E. Baylis	541
Treatment of Non Adiabatic Collisions in Diabatic and Adiabatic Framework. An Uniform Approximation Analysis	
O. Vallée, P. Brault, N. Tran Minh and J. Chapelle	543
Quench Enhancement during Half-Collisions of Laser Excited Xenon Atoms	
N. Bowering, T.D. Raymond and J.W. Keto	545

Autoionisation Profiles in Spectra of Rare-Gas Complexes by means of a Molecular Beam Crossed with Synchrotron Radiation	
M.C. Castex, I. Dimicoli, J. Le Calvé, F. Piuze and A. Tramer	547
Analytical Models for a Laser Switched Reactive Collision	
K. Ahlquist, O. Vallée and H. Rabitz	549
Resonant Rayleigh Scattering in a Flame	
K.J. Nieuwesteeg, Tj. Hollander and C.Th.J. Alkemade	551
Radiative Damping Effects in Redistribution	
G.G. Lombardi, D.E. Kelleher and J. Cooper	553
Cooperative Effects in the Redistribution of Intense Radiation	
G. Nienhuis and F. Schuller	555
Correlations and Statistics of Photons in Fluorescence Radiation	
H.F. Arnoldus and G. Nienhuis	557
Variational Calculations of Two-Level Lineshapes	
E.J. Robinson	559

CHAPTER VI. NEUTRAL - NEUTRAL INTERACTIONS AND BROADENING

Recent Progress in Molecular Structure Calculations of Alkali-Rare Gas Systems	
J. Pascale	563 *
Diabatic States from <i>ab initio</i> calculations. A New Method Applied to the Na(² S, ² P) + N ₂ system	
M. Persico	587 *
Physical Interpretation of Line Profiles Using Square-Well Interaction Potentials	
N.F. Allard and Y.G. Biraud	615 *
Recent Progress in the Derivation of Accurate Potentials for Alkali-Rare Gas Systems	
C.R. Mason and G. Peach	643

The Broadening of the Resonance Lines of ${}^6\text{Li}$ and ${}^7\text{Li}$ Y. Guimerans and G. McCartan	645
Visible and Near-Infrared Collisional Satellites of Atomic D-Lines in Alkali Systems R.J. Bieniek	647
Collision Broadening and Solar Limb Effect : Na I $3p^2P^0 - ns^2S$ Lines I. Vince, M.S. Dimitrijevic and V. Krsljanin	649
Broadening and Shift of Na - D Lines and Si I 4103 Å Lines by Atomic Hydrogen Created in a Combustion Driven Shock Tube J.L. Lemaire, J.L. Chotin and F. Rostas	651
Calculation of the D-Line Peak Positions in a Sodium-Mercury Arc Using Recently Measured Interaction Potential Constants P.A. Reiser and E.F. Wyner	653
Broadening of Dipole Forbidden S - D Lines in Homonuclear and Heteronuclear Alkali Collisional Systems R. Beuc	655
Interference Structured Continuum in Rubidium Dimer Spectrum S. Milosevic, D. Vukicevic, D. Veza and G. Pichler	657
Study of the Shape of the Lithium Diffuse Band by Single and Double Photon Excitation G. Pichler, J.T. Bahns and W.C. Stwalley	659
Observation of the Sodium Diffuse Bands by D Line Wing Excitation S. Milosevic and G. Pichler	661
Direct Excitation of Potassium Diffuse Band by Single Mode Ring Dye Laser C. Vadla, K. Niemax and G. Pichler	663
Low Lying Triplet Bands of Diatomic Alkali Molecules J. Huennekens, S. Schaefer, T. Walker, W. Happer and M. Ligare	665
The Shape of Alkali Triplet Satellite Bands D. Veza and G. Pichler	667

Pressure Broadening and Pressure Shift of the Intercombination Line of Cadmium ($\lambda = 3261 \text{ \AA}$) Perturbed by Argon	
J. Sienkiewicz and E. Czuchaj	669
Thallium- Heavy Noble Gas Atom Excimers	
E. Czuchaj and J. Sienkiewicz	671
Quantum Calculation of the Wing Profiles for the Mercury Resonance Line Perturbed by Krypton	
M. Findeisen and T. Grycuk	673
High Resolution Lineshape Studies : Observations of Asymmetry and Velocity Correlations	
M. Harris, E.L. Lewis, D.R. McHugh and I. Shannon	675
Pressure Broadening of Neon and Helium Lines	
J. Röhe-Hansen, K. Jeß, V. Helbig	677
Pressure Broadening of Argon Lines Observed in an Argon Microwave Discharge	
P.S. Moussounda and P. Ranson	679
Collision Broadening by Noble Gases in the Spectrum of Atomic Hydrogen	
J. Kielkopf	681
Interatomic Potential Determination from Rare Gas Excimer Spectra	
I. Structured Red Wing Emission of Kr I First Resonance Line	
II. Emission from the Highest and Lowest Vibrational Levels of the Lowest $^1\Sigma_u^+$, $0_u^+(^3P_1)$ State of Kr_2	
H. Schmoranzer, K. Barzen and P. Wollenweber	683
Calculation of Transition Dipole Moments	
G. Chambaud and B. Levy	687
A Thermodynamical Analysis of Lineshifts	
G. Mayer	689
Model Lineshape Calculations in Cryogenic Liquids	
D. Grimbert	691
Density Effect on the Frequency of the Satellites. Case of Rb- Kr	
Y. Leycuras	693

Frequency of the Satellites at Low Density. Case of the Na - Ar Couple	
Y. Leycuras and A. Leycuras	695

CHAPTER VII. MOLECULAR LINE BROADENING

Lineshapes in Molecular Spectra and Rotationally Inelastic Cross Sections	
Ph. Bréchnignac	699 *
Infrared Lineshape from Resonance to the Wings	
C. Boulet and D. Robert	725
Infrared Spectral Lineshapes of Planetary Atmospheric Molecules	
P. Varanasi	727
Analysis of the Breakdown of the Long-Range Interaction Model for Pressure Broadening by Noble Gases	
E.T. Salesky	729
Calculation of Pressure Broadened Linewidths of CO ₂ Due to Self-Broadening	
E.T. Salesky	731
Calculation of Pressure Broadened Linewidths of HCl (1-0) Perturbed by N ₂ , O ₂ , and CO Using the Semiclassical Theory of Leavitt and Korff	
E.T. Salesky	733
A Spectral Lines Analysis Method	
A. Denis and J. Aubard	735
Spectral Lineshapes of OCS Perturbed by Ar, He, H ₂ in the Infrared	
A. Picard-Bersellini, M. Broquier and S. Green	737
Interference Effects in the Rotational Doublets of OCS in the Infrared	
M. Broquier and A. Picard-Bersellini	739

The Line Shape of CO ₂ absorption in Stark-Tuned Ammonia R.A. Gordon, M. Owner-Petersen, E. Dalsgaard	741
Infrared Absorption and Laser-Induced Vibrational Predissociation of Gaseous NO Dimer S. Avrillier, Ph. Bréchnignac, S. De Benedictis, N. Halberstadt and B.J. Whitaker	743
Study of Rotational Relaxation Times T ₂ by Microwave Pulse Techniques S.C. Mehrotra, H. Dreizler and H. Mäder	745
Moment Analysis of the Rydberg Absorption and Emission Line of Nitric Oxide in Condensed Rare Gases M. Chergui and N. Schwentner	747
Experimental Dipole Moments and Linewidth Parameters for Propyne J.A. Roberts and J.M. Ware	749
Semiclassical Calculations of Self-Broadening Coefficients of the Raman Lines of Nitrogen J.P. Cebe, M. Giraud	751
AUTHOR INDEX	753
SUBJECT INDEX	757
