

# C O N T E N T S

## Chapter I. HYDROGENIC EMITTERS IN MODERATELY DENSE PLASMAS

Theory of Hydrogen Stark Broadening. <i>J. Seidel</i> .....	3
The Microfield Formulation of Spectral Line Broadening. <i>J.W. Dufty</i> .....	41
Influence of Different Ion Dynamical Effects on Lyman Lines. <i>D. Voslanber and R. Stamm</i> .....	63
Theory Including Non-Adiabatic Effects of Ion Dynamics. <i>D. Voslanber</i> .....	73
Is Ion Dynamics Really so Important? <i>G. Peach</i> .....	91
Stark Broadening of the Hydrogen Resonance Line $L_{\gamma}$ in Comparison to $L_{\alpha}$ and $L_{\beta}$ . <i>M. Geisler, K. Grützmacher, and B. Wende</i> .....	103
Long Path Absorption Measurements of the Pressure-Broadened Balmer-Alpha Profile. <i>D.D. Burgess, G. Kolbe, and C.St.Q. Playford</i> .....	119
The Influence of the Gas Temperature on the Central Part of the Stark Profile of Balmer Beta. <i>H. Esrom and V. Helbig</i> .....	135
Investigation of the Stark Broadening of Balmer Beta. <i>K.-P. Nick and V. Helbig</i> .....	141
Experimental Stark Profiles of He II 3203 and He II 4686. <i>J.E. Bernard, F.L. Curzon, and A.J. Barnard</i> .....	153
Some Comments on Hydrogenic Lines in a Plasma - Shifts, Asymmetries and Widths. <i>T.L. Pittman and D.E. Kelleher</i> .....	165

Chapter II. TWO- AND MORE-ELECTRON EMITTERS IN MODERATELY  
DENSE PLASMAS

Experimental Study of Plasma Broadened He I Lines With Forbidden Components.	
<i>V. Helbig and H. Ehrlich</i> .....	179
Stark Broadening of Isolated Ion Lines by Plasmas: Theory.	
<i>J.D. Hey and P. Breger</i> .....	191
Stark Broadening of Isolated Ion Lines by Plasmas: Application of Theory.	
<i>J.D. Hey and P. Breger</i> .....	201
Modified Semiempirical Formula for the Electron-Impact Width of Ionized Atom Lines: Theory and Applications.	
<i>M.S. Dimitrijević and N. Konjević</i> .....	211
On the Systematic Trends of Stark Broadening Parameters of Isolated Lines in Plasmas.	
<i>N. Konjević and M.S. Dimitrijević</i> .....	241
Stark Parameter Dependence on the Ionization Potential.	
<i>J. Purić, O. Labat, and I. Lakićević</i> .....	249
Stark Broadening and Shift of Cs I and Al II Lines.	
<i>I.S. Lakićević, J. Purić, and M. Cuk</i> .....	253
Experimental and Calculated Xe I and Xe II Stark Widths.	
<i>A. Lesage, M.H. Miller, J. Richou, and Truong-Bach</i> .....	257
Stark Broadening of Krypton Lines.	
<i>T. Brandt, V. Helbig, and K.-P. Nick</i> .....	265
The Broadening of Spectral Lines by Autoionization, Radiative Transitions, and Collisions.	
<i>J. Davis and V.L. Jacobs</i> .....	275
The Effect of Electric Fields on Autoionization Resonances.	
<i>D.E. Kelleher</i> .....	281

## Chapter III. HIGHLY IONIZED EMITTERS IN EXTREMELY DENSE PLASMAS

Diagnosis of High-Density Laser Compressed Plasmas Using Spectral Line Profiles.	
<i>A. Hauer</i> .....	295
Line Shapes in High Density Plasmas.	
<i>R.W. Lee</i> .....	333
Line Shapes in the Simulation of Radiative Transfer.	
<i>R.W. Lee</i> .....	359
Emission Line Shapes From Laser Compression Plasmas.	
<i>J. Kilkenny, S. Veats, A. Shalom, and R.W. Lee</i> .....	367
Doppler Profiles of XUV Emission From Dense Plasmas.	
<i>D.D. Burgess, D. Everett, and N.J. Peacock</i> .....	373
Stark Broadening in Hot, Dense, Laser-Produced Plasmas: Full Coulomb Electron Interactions.	
<i>L.A. Woltz, R.F. Joyce, and C.F. Hooper, Jr.</i> .....	379
Intermediate Coupling Effects on Helium-Like Ion Lines From Dense Plasmas.	
<i>H.R. Griem and P.C. Kepple</i> .....	391
Broadening of Hydrogenic X Rays Emitted by a Laser-Produced Plasma.	
<i>Nguyen Hoe</i> .....	397
Stark Broadening of Isolated Lines From High-Z Emitters in Dense Plasmas.	
<i>J.C. Weisheit and E.L. Pollock</i> .....	433
Second-Order Corrections to Thermal Microfield in Dense Plasmas.	
<i>B. Held and C. Deutsch</i> .....	447
Stark Effect in Strong Non-Homogeneous $\vec{E}$ Field.	
<i>D. Lambert</i> .....	457

## Chapter IV. LASER SPECTROSCOPY OF PLASMAS AND PLASMA SATELLITES

Laser Spectroscopy of Plasmas in Application to Measurements of Line Shapes and Collision Rates.	
<i>D.D. Burgess</i> .....	473
Investigation of Plasma-Satellites by Laser-Fluorescence Spectroscopy.	
<i>H.-J. Kunze</i> .....	517
The Last Truth on Plasma Satellites?	
<i>H.W. Drawin</i> .....	527
The Problem of Molecular Lines in the Study of Plasma Satellites.	
<i>A. Piel</i> .....	577

## Chapter V. LINE BROADENING BY FOREIGN GASES

Model Potential Calculations for Alkali-Rare-Gas Systems. Comparison With Experiment.	
<i>F. Masnou-Seewes</i> .....	593
Ab Initio Calculation of Potential Energy Surfaces. Adiabatic and Non-Adiabatic Representations.	
<i>B. Lévy</i> .....	615
Quasimolecular Interpretation of Collision Effects on Atomic Forbidden Transitions.	
<i>J. Szudy, J.P. Visticot, and B. Sayer</i> .....	631
Theory of Spectral Line Broadening by Neutral Gas at Intermediate Densities.	
<i>A. Royer</i> .....	651
Multiple Perturber Satellites: Theory and Experiment.	
<i>J. Kielkopf</i> .....	665

Blue Satellite of the K(5P-4S) Doublet Perturbed by Neon. <i>M. Delhoume, W-Ü L. Brillet, F. Masnou-Seeuws, N. Feautrier, and F. Rostas</i> .....	689
Interatomic Potentials for Hg-Kr From Measurements of Pressure Broadening of the Hg-2537 Å Line. <i>T. Gryczuk</i> .....	695
Study of Collision-Induced Absorption in Dipole Electronic Transitions of Alkali-Rare Gas Atom Pairs. <i>E. Czuchaj</i> .....	705
Experimental Study of Two-Photon Absorption of Sodium Perturbed by Collisions With Noble Gas Atoms. <i>R. Granier, G. Charton, and J. Granier</i> .....	721
Broadening and Shifts of the Resonance Lines of Neutral and Singly Ionized Mg, Ca and Sr. <i>R.G. Giles and E.L. Lewis</i> .....	733
Pressure Broadening and Pressure Shift of the Cadmium Inter- combination Line at $\lambda = 3261 \text{ \AA}$ . <i>H.A. Schuessler, K.-J. Dietz, P. Dabkiewicz, H.J. Kluge, T. Kühl</i>	741
Quasi-Static Wings of K Spectral Lines Broadened by Cs. <i>Č. Vadle, R. Beuc, and M. Movre</i> .....	751
Observation of Non-Lorentzian Spectral Lineshapes in Na-Noble Gas Systems. <i>R.E. Walkup, D.E. Pritchard, and A. Spielfiedel</i> .....	757

## Chapter VI. EXCIMERS

Alkali-Rare Gas Excimers.	
<i>F. Rostas</i> .....	767
A Model for the Rare Gas Excimers With Spin Orbit Coupling. I. Interaction Potential. II. Dipole Moment.	
<i>O. Vallée, N. Tran Minh, and J. Chapelle</i> .....	789
Synchrotron Radiation Experimental Determination of Rare Gas Excimer States: Comparison With Recent Theoretical Calculations.	
<i>M.C. Castex, O. Dutuit, J. Le Calvé, and M. Morlais</i> .....	803
VUV Emission Spectroscopy of Rare Gas Excimers After keV-Electron Impact Excitation.	
<i>H. Schmoranzner and R. Waník</i> .....	815
Determination of Excimer Potential Curves From VUV-Fluorescence Intensities.	
<i>H. Schmoranzner, R. Waník, and H. Krüger</i> .....	819

## Chapter VII. RESONANCE BROADENING

Self-Broadening in Metal Vapors.	
<i>G. Pichler</i> .....	827
Quasistatic Self-Broadening of Li and Na First Resonance Lines.	
<i>D. Veža and G. Pichler</i> .....	845
Triplet Satellite Bands in the Very Far Blue Wings of the Self- Broadened Alkali D Lines.	
<i>M. Moure, D. Veža, G. Pichler, and K. Niemax</i> .....	851
Discrepancy With Theoretical Resonance Broadening on the He Line at 2.06 $\mu\text{m}$ .	
<i>R. Damaschini and J. Vergès</i> .....	857

Chapter VIII. COLLISIONAL REDISTRIBUTION OF RESONANCE RADIATION  
AND RELATED PHENOMENA

Recent Developments in Line Shape Theory.	
<i>A. Ben-Reuven</i> .....	867
Collisional Redistribution of Resonance Radiation.	
<i>K. Burnett</i> .....	885
Collisional Redistribution of Strong Resonance Radiation.	
<i>G. Nienhuis</i> .....	899
Collisional Depolarization and Redistribution of Laser Radiation in Near Resonance With a $^2S_{1/2} \leftrightarrow ^2P$ - Transition.	
<i>W. Behmenburg and V. Kroop</i> .....	921
Far Wing Depolarization of Light: Generalized Absorption Profiles.	
<i>P. Thomann, K. Burnett, and J. Cooper</i> .....	929
Power-Broadening of the Na-D Lines in a Flame Irradiated With a Pulsed Tunable Dye Laser.	
<i>R.A. van Calcar</i> .....	937
Unified Theory of Pressure Broadened Absorption Spectra in Strong Radiation Fields.	
<i>Y. Rabin and S. Mukamel</i> .....	945
Line Broadening Caused by Laser Linewidth.	
<i>K. Wódkiewicz</i> .....	955
An Experimental Study of the Collision Broadening of the Na-D Doublet Lines in Flames and Absorption Cells With Ar and N <sub>2</sub> Perturbers.	
<i>M.J. Jongerius</i> .....	963
Structured Continuum in the Fluorescence Spectrum of Cs <sub>2</sub> .	
<i>R.J. Exton, G. Pichler, and J. Tellinghuisen</i> .....	983
Light-Induced Collisional Energy Transfer.	
<i>P.E. Toschek</i> .....	997

Collision Induced Pair Absorption in Pure and Mixed Alkalis. <i>R. Hotop and K. Niemax</i> .....	1019
Collision Induced Scattering of Light in Mercury Vapour: Some Experimental and Theoretical Results. <i>A. Borysow, M. Findeisen, T. Grycuk, and W. Komar</i> .....	1027
Inelastic Collisions Between Selectively Excited Rubidium Atoms and Ground State Rubidium Atoms Observed by Laser Induced Fluorescence. <i>H.A. Schuessler and R.H. Hill, Jr.</i> .....	1033

## Chapter IX. DOPPLER-FREE TECHNIQUES

Resonance Fluorescence From Single Ions at Rest. <i>W. Neuhauser, M. Hohenstatt, P.E. Toschek, and H. Dehmelt</i> .....	1045
Broadening and Shift of High Rydberg States Measured by Doppler- Free Two-Photon Spectroscopy. <i>B.P. Stoicheff, D.C. Thompson, and E. Weinberger</i> .....	1071
Broadening and Shift Measurements of Doppler-Free Two-Photon Lines With the Thermionic Diode. <i>K. Niemax and K.-H. Weber</i> .....	1083
The Measurement of Collisional Lineshapes Using Optical Echo Techniques. <i>T.W. Mossberg, R. Kachru, K.P. Leung, E. Whittaker, S.R. Hartmann</i>	1093
Collision Studies of $H_{\alpha}$ Fine Structure Lines With High-Resolution Laser Spectroscopy. <i>E.W. Weber</i> .....	1113
Effect of Quenching Collisions on Density Shift and Broadening. <i>E.W. Weber and K. Jungmann</i> .....	1123
Plasma Shift and Broadening of Resolved $H_{\alpha}$ Fine Structure Lines. <i>E.W. Weber and H.J. Humpert</i> .....	1133

## Chapter X. RELATED TOPICS

Light Scattering From a Non-Equilibrium Fluid. <i>J.W. Dufty</i> .....	1143
Validity of Semiclassical Small Angle Scattering Amplitudes for the Calculation of Elastic Collision Kernels With Lennard-Jones Intermolecular Potentials. <i>S. Avrillier, C.J. Bordé, J. Picart, and N. Tran Minh</i> .....	1159
Modification of Microwave Radiation due to Electron-Molecule Collisions. <i>S.C. Mehrotra</i> .....	1183
Author Index .....	1190
Subject Index .....	1192
