

C O N T E N T S

Chapter I. HYDROGENIC EMITTERS IN MODERATELY DENSE PLASMAS

Simulation Studies of the Dynamics of Plasma Microfields	
R. Stamm	3
Computer Simulation of Plasma Correlation Functions	
E. W. Smith and R. Stamm	31
Stark Broadening of the Hydrogen-Resonance Lines L_α and L_β for the Atom-Ion Combinations H-Ar ⁺ and D-Ar ⁺	
M. Geisler, K. Grützmacher and B. Wende	37
Investigation of the Stark Broadening of Balmer Beta	
V. Helbig, Fan Shi Fu and K.-P. Nick	47
Ion-Electron Correlations in Spectral Line Shape Theory	
C. Iglesias and J. W. Dufty	55
Role of Molecular Dissociation and Charge Exchange in the Shape of Atomic Spectrum Lines in Low-Density Hydrogen Plasmas	
D. H. McNeil	71
Red Shift of the He II H_α and P_α Lines	
T. L. Pittman and C. Fleurier	87

Chapter II. TWO AND MORE ELECTRON EMITTERS IN MODERATELY DENSE PLASMAS

Stark Broadening Parameters for He I Infrared Lines	
M. S. Dimitrijević and S. Sahal-Bréchet	103
Investigation of a Gas-Liner Pinch	
K. H. Finken	117
Stark Widths and Shifts for some Ar I 4s-4p Transitions	
D. W. Jones, K. Musiol and W. L. Wiese	125

VIII

On the Stark Broadening of Non-Hydrogenic Lines of Heavy Elements in Plasmas	
N. Konjević and M. S. Dimitrijević	137
On the Stark Broadening and Shift Regularities	
I. S. Lakićević and J. Purić	147
Stark Widths and Shifts of IV and V Group Homologous Ions	
J. Purić and I. S. Lakićević	161
Stark Widths and Shifts of Singly Ionized Silicon Spectral Lines	
J. Purić, A. Lesage, I. S. Lakićević and B. A. Rathmore	175
An Experimental Study of Ion Dynamic Effects on Helium Line Profiles	
R. D. Bengtson and D. C. Pease	183
High Resolution ($\Delta\lambda_{FWHM} < 0.08 \text{ \AA}$) Helium Line Profiles in a Low Density Linear Discharge	
D. C. Pease and R. D. Bengtson	199
Experimental Study of Ion Effects in the Stark Broadening of the Helium 447.1 nm and 492.2 nm Lines	
A. Piel and H. Richter	215
 Chapter III. HIGHLY IONIZED EMITTERS AND EXTREMELY DENSE PLASMAS	
Emission and Absorption X-ray Spectroscopy of Laser Produced Plasmas	
J. D.ilkenny	231
Time Dependent Stark Broadening Measurements in Planar-Laser Target Experiments	
R. W. Lee, J. D.ilkenny, R. L. Kauffman and D. L. Matthews	247
Microfield Distribution for Degenerate Electrons	
D. B. Boercker and J. W. Dufty	265

Broadening of Lyman- α and γ of Hydrogenic Ions by Low-Frequency Fields in Dense Plasmas	
R. Cauble and H. R. Griem	281
Suitable Spectral Line Shape Calculations for Inertial Confinement Plasma Diagnosis	
D. Lambert and M. Louis-Jacquet	291
Theoretical Analysis of Spectral Lines of One- and Two-Electron Ions in Hot Plasmas	
B. F. Rozsnyai and T. Einwohner	315
The Effect of Unresolved Satellite Lines on the 'Apparent' Resonance Line Profiles for Ions Observed in Hot Plasmas	
L. Steenman-Clark, F. Bely-Dubau, M. Bitter, J. Dubau and P. Faucher	329
A Full Coulomb Calculation of Stark Broadening in Dense Plasmas: Line Shapes, Shifts and Asymmetries	
L. A. Woltz and C. F. Hooper, Jr.	337

Chapter IV. LASER AND DOPPLER-FREE SPECTROSCOPY OF PLASMAS AND PLASMA SATELLITES

High Resolution Spectroscopy of Discharge Plasmas	
E. W. Weber	355
Plasma Broadening of Hydrogen Two-Photon Absorption Lines	
J. Seidel	381
Non-Thermal Plasma Satellite Induced Simultaneously by Plasma Oscillations and by a Radiation Field	
Truong-Bach and H. W. Drawin	395

Chapter V. LINE BROADENING BY FOREIGN GASES

The Theory of Interatomic Potentials for Line Broadening	
W. E. Baylis	409
Long-Range Interatomic Potentials and Line Broadening	
E. L. Lewis	429
Transition Regions in Line Broadening	
D. E. Pritchard and R. E. Walkup	445
On the $^2\Sigma$ -Potentials for the Interaction of K(4P)	
and K(5P) with Argon	
R. Düren, E. Hasselbrink, S. Milosevic	
G. Pichler and H. Tischer	461
Neutral Collision Broadening of 6P-NS Transitions in Thallium	
J. Kielkopf	467
Broadening of Hyperfine Components of Na D Lines	
Perturbed by He	
E. Roueff and A. Spielfiedel	479
Shift, Width and Asymmetry of Pressure Perturbed Spectral	
Lines at Low Densities	
A. Royer	483
Detailed Balance in Theory of Pressure-Broadening	
of Atomic Lines	
K. M. Sando and P. S. Herman	497
Collisional Broadening of the Atomic Fluorine	
$^2p_{1/2} \leftarrow ^2p_{3/2}$ Spin Orbit Transition	
A. C. Stanton, J. C. Wormhoudt and J. W. Duff	515
Broadening of the First Potassium Resonance Lines by	
Rubidium in the Impact Region	
C. Vadla, R. Beuc and M. Movre	531
Uniform Semiclassical Description of Satellite Bands	
P. A. Vicharelli and C. B. Collins	537

Chapter VI. MOLECULES AND EXCIMERS

The Line Shape for Collisionally Broadened Molecular Transitions: A Quantum Theory Satisfying the Fluctuation Dissipation Theorem S. A. Clough, R. W. Davies and R. H. Tipping	553
Infrared-Microwave Double Resonance Probing of the SO ₂ and NO ₂ Molecules B. Khoobehi and J. A. Roberts	569
High Density Atomic and Molecular Spectra of Xenon in the Wavelength Range 120-170 nm P. Laporte, J. L. Subtil and M. C. Castex	583
Analysis of Structured Fluorescence Spectra of C ₂ Molecule Excited Selectively with Synchrotron Radiation T. Moeller, B. Jordan, P. Gürtler, G. Zimmerer, D. Haaks, J. LeCalvé and M. C. Castex	597
Peculiar Diffuse Bands in Li ₂ , Na ₂ and K ₂ Spectra G. Pichler, S. Milosević, D. Veza and S. Bosanac	613
Raman Band Shapes From CO Adsorbed on Ni(111), Ni(110) and Ni(100) E. Bradley, K. Arunkumar and J. Stencel	625
Pressure Dependent Linewidth and Lineshift Measurements in the Vibrational q-Branch of N ₂ From 4 to 200 kPa G. J. Rosasco, W. Lempert, W. S. Hurst and A. Fein	635
Collisional Dependence of Spectral Line Shapes in CO ₂ at Low Pressures R. Roy, D. S. Elliott, D. Meschede, F. M. Pipkin and S. J. Smith	651

Chapter VII. RESONANCE AND SELF BROADENING

Resonance Broadening of the Sodium D-Lines J. Huennekens and A. Gallagher	665
Triplet Satellite in Very Far Blue Wing of the Self-Broadened Lithium D-Line D. Veza, S. Milosević and G. Pichler	679

Chapter VIII. COLLISIONAL REDISTRIBUTION OF RADIATION AND
INTENSE FIELD COLLISIONAL PHENOMENA

Collisional Redistribution of Radiation by Hydrogen R. J. Ballagh	691
Redistribution of Radiation in Near Resonance with an Atomic Multiplet W. Behmenburg and V. Kroop	705
Line Shapes in Radiative Collision Processes C. Bréchnignac and P. Cahuzac	721
Redistribution -- Why Half a Collision is Better Than a Whole One J. Cooper	737
Far Wing Radiation From Atom-Molecule Collisions A. Gallagher	755
Nonadiabatic Effects in Line Broadening P. Julienne	769
Collisional Redistribution of Radiation in Intense Laser Fields Y. Rabin and S. Mukamel	787
Experimental Aspects of Studying the Polarization of Collisionally Redistributed Light in Strontium-Rare Gas Systems W. J. Alford, K. Burnett and J. Cooper	805

Line-Broadening in a Half-Collision H. J. Foth, J. C. Polanyi and H. H. Telle	813
Observation of the Modification of Optical Collision Dynamics in Intense Laser Fields P. D. Kleiber, K. Burnett and J. Cooper	827
Redistribution of Radiation in a Low Density Plasma G. G. Lombardi and D. E. Kelleher	835
Redistribution as a Probe of Atomic Collisions G. Nienhuis	847
Optical Collisions in Short-Pulse Light Fields M. G. Raymer and T. Sizer II	861
Line Shape Analysis of Intense Field Molecular Multiphoton Absorption Spectra J. V. Tietz and S. I. Chu	863

Chapter IX. DOPPLER-FREE TECHNIQUES FOR NEUTRALS

Study of Elastic Collisions by Time Resolved Saturation Spectroscopy: Experimental and Theoretical Determination of Ne(3s 3P_0) - Ne Collision Kernel M. Dumont, M. Gorlicki and C. Lermiaux	881
Echo Spectroscopic Studies of Velocity-Changing Collisions T. W. Mossberg	899
Neutral Gas Line Broadening and Shift in Spectral Lines K. Niemax	917
Spectral Line Shapes from Two Photon Excitation of Xenon N. Böwering, Chien-Yu Kuo, T. D. Raymond and J. W. Keto	927
Total Optical Coherence-Perturber Collision Cross Sections Using Velocity Selective Photon Echoes J. E. Thomas, R. A. Forber, L. Spinelli and M. S. Feld	945

Study of the Pressure Broadening of the 587.6 nm Helium and the 588.2 nm Neon Lines J. Røhe-Hansen and V. Helbig	961
--	-----

Chapter X. RELATED TOPICS

Line Broadening Near Critical Points -- A Probe for Density Fluctuations S. Mukamel, P. S. Stern and D. Ronis	973
Role of Field Fluctuations in Nonlinear Absorption D. S. Elliott, R. Roy and S. J. Smith	989
Liouvillian Green's Function Approach to Non-Equilibrium Environmental Effects on Spectral Lines M. D. Girardeau and C. F. Hart	999
Recombination Effects in Autoionization S. L. Haan and G. S. Agarwal	1013
