

## CONTENTS

(\* indicates an invited paper)

Preface .....	v
<b>CHAPTER I. LINE BROADENING AND SHIFTS IN LOW TO MODERATELY DENSE PLASMAS</b>	
Ion Broadening of Heavy Element Lines in Plasmas .....	3*
<i>W. L. Wiese and Douglas W. Jones</i>	
The Gas-Liner Pinch and Its Potential as a Plasma Source for Spectroscopic Investigations .....	23*
<i>H.-J. Kunze</i>	
A Doppler-Free Measurement of the Stark Broadened $\text{La}$ Resonance Line in a Dense Plasma .....	37
<i>K. Danzmann, K. Gruetzmacher, and B. Wende</i>	
Soft X-Ray Spectroscopy of a Gas-Puff Z-Pinch .....	39
<i>G. Nave, A. E. Dangor, C. D. Challis, J. R. Liu, and J. G. Lunney</i>	
Absorption Line Profile Measurements of He II Balmer- $\alpha$ (1640A) in a Dense Z-Pinch Plasma .....	41
<i>J. P. Marangos, K. G. H. Baldwin, and D. D. Burgess</i>	
Widths and Shifts of Be Ion Lines .....	43
<i>T. L. Pittman and D. E. Kelleher</i>	
Ion Dynamic Effects on Balmer Line Profiles .....	45
<i>Marco A. Gigosos and Valentín Cardénoso</i>	
Measurement of Ion Dynamical Effects on the Profiles of the Balmer Alpha Lines of Hydrogen and Deuterium at Low Electron Densities .....	47
<i>A. Sanchez, R. D. Fulton, and Hans R. Griem</i>	
Stark Broadening of Xe II Lines: Temperature Variation .....	49
<i>J. Richou and A. Lesage</i>	
Stark Broadening of Fe I Lines: Temperature Variation .....	51
<i>J. Richou, B. Fehrat, J. L. Lebrun, and A. Lesage</i>	
Absorption or Emission During a Collision: A Test Case $\text{H}_2^+$ .....	53
<i>C. Stehlé and N. Feautrier</i>	
Stark Widths of Ne II Spectral Lines .....	55
<i>J. Purić, S. Denize, A. Srećković, J. Labat, and Lj. Čirković</i>	
Computer Simulation of the Plasma Broadening of Hydrogen Balmer- $\alpha$ .....	57
<i>Joachim Seidel</i>	
Shift of the Hydrogen $\text{La}$ Resonance Line in a Dense Arc Plasma .....	59
<i>K. Gruetzmacher and B. Wende</i>	
Stark Broadening of K I: Regularities Within Spectral Series .....	61
<i>Milan S. Dimitrijević and Sylvie Sahal-Bréchot</i>	
Modified Semiempirical Estimates of Ion Lines Stark Broadening: I. Theory .....	63
<i>Milan S. Dimitrijević, Nikola Konjević, and Vladimir Kršljanin</i>	

Modified Semiempirical Estimates of Ion Lines Stark Broadening: II. Application . . . . .	65
<i>Milan S. Dimitrijević, Nikola Konjević, and Vladimer Kjšjanin</i>	
Broadening and Shift of Cu I and Cu II Lines in Plasmas . . . . .	67
<i>C. Fleuriot</i>	
Time-Resolved Electron Density Measurements in XeCl Laser Discharge Plasma . . . . .	69
<i>A. A. Vill, S. M. Babichenko, L. V. Poryvkina, and K. J. Saar</i>	
 CHAPTER II. RESONANCES IN THE CONTINUUM	
Quantum-Defect Theory of the Stark Effect . . . . .	73*
<i>David A. Harmin</i>	
Line Shapes of Sodium Stark Resonances Above the Classical Saddle Point . . . . .	107*
<i>P. McNicholl, T. Bergeman, and H. J. Metcalf</i>	
Electric Field Effects on Structure in the Continuum . . . . .	133
<i>D. E. Kelleher, E. B. Saloman, and J. W. Cooper</i>	
Line Shapes of Autoionizing Rydberg Series: I. Unperturbed Series . . . . .	135
<i>K. Ueda</i>	
Line Shapes of Autoionizing Rydberg Series: II. Perturbed Series . . . . .	137
<i>K. Ueda</i>	
 CHAPTER III. HOT AND DENSE (LASER PRODUCED) PLASMAS	
Line Broadening of Hydrogenic Ions in Dense Plasmas . . . . .	141*
<i>R. Stamm, B. Talin, E. L. Pollock, and C. A. Iglesias</i>	
Electric Microfield Distribution Functions: Past and Present . . . . .	161*
<i>C. F. Hooper, Jr.</i>	
Electric Field Fluctuations at a Charged Point . . . . .	195
<i>James W. Dufty, David B. Boercker, and Carlos A. Iglesias</i>	
Line Broadening Measurements of CV and CVI Lines in a Laser Produced Plasma . . . . .	197
<i>E. J. Iglesias and H. R. Griem</i>	
Hydrogenic Stark Profiles in Hot and Dense Plasmas: Ion Dynamic Effects . . . . .	199
<i>C. Stehlé and N. Feautrier</i>	
The Stark Broadening of Balmer Lines in C <sup>+5</sup> , With Ion Dynamics Included . . . . .	201
<i>D. Oza, R. L. Greene, and D. E. Kelleher</i>	
Electron Broadening and Shifts of Hydrogen-Like and Helium-Like Ion Lines . . . . .	203
<i>M. Koenig, H. Nguyen, and L. Terray</i>	
Theoretical and Experimental Study of Complete Spectral Series Emitted From Laser Plasma . . . . .	205
<i>B. d'Etat, J. Grumberg, E. Leboucher, H. Nguyen, and A. Poquerusse</i>	
Absorption Spectra of Low Z Ions in the VUV-XUV Regions . . . . .	207
<i>E. Jannitti, P. Nicolosi, and G. Tondello</i>	
Spectral Line Shapes of X-Ray Dipoler Emission in High Density Plasmas . . . . .	209
<i>D. Lambert</i>	

Schematic Fits to Line Profiles for Hydrogenic Ions in Laser-Produced Plasmas . . . . .	211
<i>R. Cauble and R. W. Lee</i>	

#### CHAPTER IV. COLLISIONAL BROADENING AND INTERMOLECULAR POTENTIALS

Doppler-Free Lineshapes . . . . .	215*
<i>Alan Gallagher</i>	
Observation of Curve Crossings in Optical Collisions of Xenon Atoms . . . . .	235*
<i>J. W. Keto and N. Böwering</i>	
Experimental Investigation of the Far Wings of Forbidden Lines in Rb-Ar, He, and K-He Systems . . . . .	249
<i>I. Dubourg, J. P. Vistica, M. Ferray, and B. Sayer</i>	
Pressure Broadening of the Intercombination Lines of Hg/2537 Å and Cd/3261 Å Perturbed by Helium . . . . .	251
<i>E. Czuchaj and J. Sienkiewicz</i>	
Impact-Regime Line Broadening Rates From Studies of Radiation Trapping . . . . .	253
<i>J. Huennekins, H. J. Park, T. Colbert, and S. C. McClain</i>	
Potential Calculation for Alkaline Earth Ion-Rare Gas Pairs and Its Application to Line-Core Analysis . . . . .	255
<i>H. Harima, K. Tachibana, and Y. Urano</i>	
Collision Broadening of Sr Ion Resonance Line in the Wing Region . . . . .	257
<i>H. Harima, K. Tachibana, and Y. Urano</i>	
Ionization of Lithium Vapor by CW Quasiresonant Laser Radiation . . . . .	259
<i>D. Veza and C. J. Sansonetti</i>	
Excitation Transfer Due to Neutral Collisions in Excited States of Atomic Hydrogen Derived From Balmer Line Profiles . . . . .	261
<i>J. F. Kielkopf and K. Myneni</i>	
Spectral Balmer Line Shapes in a Low-Pressure H <sub>2</sub> Discharge . . . . .	263
<i>G. Sultan, G. Baravian, J. Bretagne, J. Chouan, J. Jolly, and A. Ricard</i>	
Broadening and Shift Parameters of the Sodium D Lines Perturbed by Helium . . . . .	265
<i>J. L. Lemaire, J. L. Chotin, and F. Rostas</i>	
Spectral Satellite Interference Undulations in Na + K Vapor Mixtures . . . . .	267
<i>R. J. Bieriek</i>	
On the Classical Shape of Satellite Bands . . . . .	269
<i>M. Movre</i>	
Quantum Calculation of the Wing Profiles for the Mercury Resonance Line Perturbed by Xenon . . . . .	271
<i>M. Findeisen and T. Grycuk</i>	
Collision Broadening and Shift in the Argon Spectrum . . . . .	273
<i>J. Wolnikowski, J. Wawryński, A. Bielski, and J. Szudy</i>	
Influence of Neon and Argon on Thallium Emission Lines . . . . .	275
<i>R. S. Dygdała, R. Bobkowski, and E. Lisicki</i>	
Relativistic Interatomic Potentials for Line-Broadening Applications: The Short-Range Monopole Polarization Term . . . . .	277
<i>W. E. Baylis and J. Sienkiewicz</i>	

Anomalous Saturation of the Calcium Resonance Line (422.7 nm) . . . . .	279
<i>M. Harris, E. L. Lewis, D. McHugh, I. Shannon, and M. Zokai</i>	
The Full Voigt Profile and Collision Time Asymmetry for Profiles of Calcium 422.7 nm Perturbed by Rare Gases . . . . .	281
<i>M. Harris, E. L. Lewis, D. R. McHugh, and I. Shannon</i>	
Helium Broadening of the Mg <sup>+</sup> and Ca <sup>+</sup> Resonance Lines and the Ca <sup>+</sup> Infra-Red Triplet ..	283
<i>T. S. Monteiro, I. L. Cooper, A. S. Dickinson, and E. L. Lewis</i>	
Preliminary Results for a Semiclassical Sensitivity Analysis of a Molecular Spectral Line Profile to Intermolecular Potential . . . . .	285
<i>O. Vallee and H. Rabitz</i>	
 CHAPTER V. MOLECULAR BROADENING, EXCIMERS, AND COLLISION INDUCED SPECTROSCOPY	
Electronic Properties of Rare Gas Molecules . . . . .	289*
<i>Marie-Claude Castex</i>	
Radiative Dissociation of H <sub>2</sub> and Radiative Recombination of Kr <sub>2</sub> Observed by VUV Spectroscopy . . . . .	315*
<i>H. Schmoranzer</i>	
The Franck-Condon Principle . . . . .	339*
<i>Joel Tellinghuisen</i>	
Scalar and Vector Collisional Interference in the Vibration-Rotation Absorption Spectra of H <sub>2</sub> and HD . . . . .	351*
<i>R. M. Herman</i>	
New Results on 4s-5s Potassium-Rare Gas Excimer Bands . . . . .	371
<i>W.-Ü L. Tchang-Brillet, D. A. Haner, and F. Rostas</i>	
Rotational Collisional Narrowing in an Infrared CO <sub>2</sub> Q Branch . . . . .	373
<i>L. Larrabee Strow and Bruce M. Gentry</i>	
Self-Broadening and Narrowing of an Ozone Absorption Line Near 1129.4 cm <sup>-1</sup> . . . . .	375
<i>G. E. Copeland and L. N. Majorana</i>	
N <sub>2</sub> - and Air-Broadening in the Fundamental Bands of HF and HCl . . . . .	377
<i>J. P. Looney, R. M. Herman, and A. S. Pine</i>	
Effects of Collisional Velocity Changes on Line Shapes of HF Broadened by Foreign Gases . . . . .	379
<i>R. M. Herman and J. P. Looney</i>	
Bound-Free Oscillations in Fluorescence Spectra of Xe <sub>2</sub> , Kr <sub>2</sub> and Ar <sub>2</sub> . . . . .	381
<i>T. Möller, J. Stapelfeldt, M. Beland, and G. Zimmerer</i>	
Intermediate and Long-Range Interaction Potentials of Homonuclear Alkali Dimers . . . .	383
<i>M. Movre</i>	
Relation Between the Diffuse Bands and the Triplet Satellite Bands in Alkali Dimers . . . .	385
<i>R. Beuc, S. Milošević, D. Veža, and G. Pichler</i>	
The Pressure Effect on the Potassium Dimer Diffuse Band . . . . .	387
<i>Pawel Kowalczyk, Slobodan Milošević, and Goran Pichler</i>	
Is Longitudinal Relaxation Time, T <sub>1</sub> , Different From Transverse Relaxation Time, T <sub>2</sub> ? . . .	389
<i>S. C. Mehrotra</i>	

Rototranslational Collision Induced Spectra for Titan's Atmosphere .....	391
<i>Aleksandra Borysow and Lothar Frommhold</i>	
Collision-Induced Far Infrared Absorption in He-Ne Mixture .....	393
<i>Ph. Marteau and J. Obriot</i>	
 CHAPTER VI. COLLISIONAL REDISTRIBUTION, LASER ASSISTED COLLISION PROCESSES, AND KINETIC EFFECTS	
Close Coupled Theory of Fine Structure Transitions in Collisional Redistribution .....	397*
<i>Paul S. Julienne and Linda L. Vahala</i>	
The Dynamics of Laser Assisted Reactive Collisions .....	413*
<i>Paul D. Kleiber</i>	
Stimulated Absorption, Ionization and Emission During Molecular Dissociation .....	425*
<i>H. H. Telle</i>	
Gas-Kinetic Effects of Light .....	445*
<i>Gerard Nienhuis</i>	
Intensity Effects in Two Photon Collisional Redistribution .....	469
<i>M. Belsley, G. Alber, and J. Cooper</i>	
The Binary Model for Collisional Redistribution of Light .....	471
<i>H. Van Regemorter</i>	
Radiative Scattering Close Coupled Calculations of Lorentzian Width and Asymmetry Parameters for Na + Rare Gas Systems .....	473
<i>L. Vahala and P. S. Julienne</i>	
Collisional Redistribution of Intense Resonant Laser Radiation .....	475
<i>F. H. Mies</i>	
Collisional Redistribution by the Mercury 253.7 nm Intercombination Line .....	477
<i>I. D. Harris, D. Segal, L. Kent, C. Richter, W. S. Steer, and K. Burnett</i>	
Application of Recoil and Frame Transformation Models for Collisional Redistribution of Light .....	479
<i>P. S. Julienne and L. Vahala</i>	
Spectroscopy of Collisional Complexes: Close Coupled Approach .....	481
<i>A. Spielfeld, N. Feautrier, and E. Roueff</i>	
Collision-Aided Self Stimulated Emission (CASSE) in Alkali-Rare Gas Systems .....	483
<i>J. L. Lemaire, W. Ü L. Tchang-Brillet, and F. Rostas</i>	
Depolarization Mechanisms in Alkali-Noble Gas Half Collisions .....	485
<i>F. Schuller, G. Nienhuis, and W. Behmenburg</i>	
Fluorescence Ratios in Non-resonant Excitation of Alkali Helium Pairs .....	487
<i>R. Best and F. Rebentrost</i>	
Depolarisation Spectra for Optical Collisions in the Alkali-Helium Series .....	489
<i>F. Rebentrost, R. Best, and W. Behmenburg</i>	
Depolarization and Fine Structure Effects in Half Collisions of Systems $\text{Na}(3^2\text{P}_1) + \text{Noble Gas Atom}$ .....	491
<i>A. Ermers, T. Woschnik, and W. Behmenburg</i>	

Stochastic Theory of Frequency Redistribution in Two-Photon Processes .....	493
<i>'Kale Oyedeqi, Larry Petway, Lewis Klein, and Bernard Talin'</i>	
Half Collision Analysis of Far Wing Diffuse Structure: Cs-Xe .....	495
<i>R. J. Exton, M. E. Hillard, and W. R. Lempert</i>	
Collisional Redistribution With Intense, Ultrashort Laser Pulses .....	497
<i>M. G. Raymer and T. Sizer II</i>	
Effects of Short Laser Pulses on Na-Ar Collisions: Some Preliminary Results .....	499
<i>J. F. Scipione and Paul L. DeVries</i>	

## CHAPTER VII. COHERENT AND NONLINEAR SPECTROSCOPY

Collision-Induced Processes in Nonlinear Optics .....	503*
<i>Gilbert Grynberg</i>	
Solitons in Stimulated Raman Scattering .....	523*
<i>J. L. Carlsten and D. C. MacPherson</i>	
The Effects of Velocity and State Changing Collisions on Raman Q-Branch Spectra .....	535*
<i>Gregory J. Rosasco and Wilbur S. Hurst</i>	
Sensitivity of Atomic Line Shapes to the Laser Model .....	569
<i>Henk F. Arnoldus and Thomas F. George</i>	
AC Stark-Broadening in Coherent Raman Spectra Obtained With Focused Gaussian Beams ..	571
<i>H. Moosmüller and C. Y. She</i>	
Experimental Observation of Dicke Narrowing on a Fine Structure Transition, by Use of the Stimulated Raman Effect .....	573
<i>S. Saoudi, C. Lerminiaux, and M. Dumont</i>	
A New Feature in the Raman Q-Branch of Gaseous D <sub>2</sub> .....	575
<i>G. J. Rosasco, W. S. Hurst, K. C. Smyth, L. B. Petway, and A. D. May</i>	
Theoretical and Experimental Studies of High-Resolution Inverse Raman Spectra of N <sub>2</sub> at 1-10 atm .....	577
<i>M. L. Koszykowski, L. A. Rahn, and R. E. Palmer</i>	
Orientation and Alignment Velocity-Change Spectra Obtained by Direct Inversion of Time Domain Stimulated Echo Data .....	579
<i>A. G. Yodh, T. W. Mossberg, and J. E. Thomas</i>	

## CHAPTER VIII. LINESHAPES IN ASTROPHYSICS

Atomic Data Required for Opacity Calculations .....	583*
<i>M. J. Seaton</i>	
Line-Shaping Phenomena in Cool Stars .....	605*
<i>David F. Gray</i>	
Differential Fe I Limb Effect Around $\lambda = 630.2$ nm .....	619
<i>A. Kubičela, I. Vince, M. S. Dimitrijević, and R. Dümmler</i>	
Solar Spectral Line Asymmetries and Pressure Broadening .....	621
<i>Ištván Vince and Milan S. Dimitrijević</i>	

**CHAPTER IX. SHORT WAVELENGTH LASERS**

The Nova X-Ray Laser Experiments .....	625*
<i>D. Matthews, M. Eckart, D. Eder, A. Hazi, R. London, B. MacGowan, S. Maxon,     D. Nilson, M. Rosen, J. Scofield, G. Shimkaveg, R. Stewart, J. Trebes, B. Whitten,     and J. Woodworth</i>	
Recent Progress in Soft X-Ray Laser Development at Princeton .....	633*
<i>C. H. Skinner</i>	
<b>AUTHOR INDEX .....</b>	<b>635</b>
<b>SUBJECT INDEX .....</b>	<b>639</b>
