

CONTENTS

Preface	13
---------------	----

CHAPTER I. LINE BROADENING IN PLASMAS

<i>H. R. Griem</i> Stark Broadening in Multielectron Atoms and Ions	17
<i>K. Gruetzmacher, A. Steiger</i> Doppler-Free Two-Photon Measurements of Stark Broadening of Lyman-Alpha in Dense Arc Plasmas	35
<i>G. Roepke, L. Hitzschke</i> Shift and Broadening of Spectral Lines in Non-Ideal Plasmas	49
<i>D. B. Boercker</i> Model Microfield Calculations of Radiative and Transport Properties of Ions in Strongly Coupled Plasmas	73
<i>J. P. Marangos</i> VUV Measurements of Plasma Line Shapes	97
<i>R. L. Greene, D. H. Oza, D. E. Kelleher</i> Hydrogen Stark Broadening from the Impact to Quasistatic Regime	127

CHAPTER II. STRUCTURE IN THE CONTINUUM

<i>D. E. Kelleher</i> Electric Field Effects on Autoionizing Resonances	149
<i>T. F. Gallagher, R. R. Jones</i> The Effect of Static and Dynamic Fields on Autoionizing Rates	163
<i>K. Rzażewski, M. Wilkens, J. Cooper</i> Effect of Plasma Microfields on Autoionizing States	183

CHAPTER III. QUASIMOLECULAR FORMATION IN PLASMAS AND NEUTRALS

<i>N. Feautrier, C. Stehle</i> Quantum Mechanical and Semiclassical Calculations of Hydrogen Stark Broadening by Ion Impact	199
---	-----

<i>O. Vallee, H. Rabitz, N. Tran Minh</i> Semiclassical Evaluation of Forward Sensitivity Coefficient of Spectral Line Profile to Interatomic Potentials	217
---	-----

CHAPTER IV. COLLISIONAL REDISTRIBUTION OF RADIATION

<i>F. Schuller</i> Collective Atomic Effects on the Emission and Redistribution of Radiation	231
<i>F. Rebenrost</i> Thermally Averaged Coupled-Channels Calculations of Collisional Redistribution	249
<i>J. Cooper, R.J. Ballagh, I. Hubeny</i> Redistribution of Astrophysically Important Hydrogen Lines	275
<i>V.S. Lisitsa</i> Effect of Strong Electro-Magnetic Fields on Atomic Spectral Line Shapes in Plasmas and Gases	305

CHAPTER V. LASER TECHNIQUES IN LINE SHAPE STUDIES

<i>W. Demtroeder, F. Bylicki, R. Bombach, U. Diemer, B. Hemmerling, E. Mehdizadeh, G. Persch, H. Weickenmeier</i> Sub-Doppler Laser Spectroscopy of Molecular Line Shapes ..	353
<i>E.V. Baklanov, V.P. Chebotayev, M.P. Staroselsky</i> Doppler-Free Broadening Resonance in Strong Saturating Fields	375
<i>M.G. Raymer</i> Collisional Redistribution with Intense and/or Ultra-Short Laser Pulses	401

CHAPTER VI. PRESSURE BROADENING BY NEUTRAL PERTURBERS

<i>D.N. Stacey</i> Line Shapes in High-Resolution Spectroscopy	419
<i>B. Kaulakys, P.D. Serapinas</i> Recent Studies in Interaction and Collision between Rydberg Atoms and Neutral Perturbers	437

<i>E.A. Yukov, Y.V. Bogdanov, S.I. Kanorskiĭ, I.I. Sobelman, V.N. Sorokin, I.I. Struk</i> The Study of Spectral Line Broadening and Shift by the Faraday Rotation Spectroscopy	459
<i>E.L. Lewis</i> Asymmetric Voigt Profiles	485
<i>S.G. Rautian</i> Collision Anisotropy and Impact Contour of Spectral Lines	503
<i>K. Wódkiewicz, N. Huy Cong</i> Stochastic Models of Line Shapes	527

CHAPTER VII. MOLECULES AND EXCIMERS

<i>G. Boulet</i> On Some Aspects of Molecular Broadening, From Resonance to the Far Wings	539
<i>W. Ketterle, H. Walther</i> Spectroscopy of Triatomic Hydrogen and Helium Hydride	563
<i>Jouvet C., Duval M.C., Breckenridge W.H., Soep B.</i> Reaction in Van der Waals Complexes	579

CHAPTER VIII. COLLISION-INDUCED PHENOMENA

<i>M.O. Bulanin</i> Electrostatic Induction in Van der Waals Complexes	597
<i>G. Birnbaum, L. Frommhold, G.C. Tabisz</i> Collision-Induced Spectroscopy; Absorption and Light Scattering	623
<i>T. Keyes, G. Seeley</i> Normal Mode Analysis of the Second Order Light Scattering Spectrum in Liquids	649
<i>W.A. Steele</i> Computer Simulation Studies of the Induced Far-Infrared Absorption in Liquids	653
<i>T. Banciewicz, S. Kielich</i> Molecular Interaction-Induced Contributions to Rayleigh and Raman Light Scattering	671

CHAPTER IX. LASER-ASSISTED COLLISIONAL PROCESSES

<i>S. I. Yakovlenko</i> Optical-Collisional Phenomena	695
<i>P. R. Berman</i> Three-State Model for Laser-Assisted Collisions	713
<i>F. Kh. Gel'mukhanov</i> Light-Induced Drift in a Gas and Related Phenomena	733

CHAPTER X. LINE SHAPES IN ASTROPHYSICS

<i>L. Trafton</i> Observational Studies of Collision-Induced Absorption in the Atmospheres of the Major Planets	755
<i>S. N. Atutov, A. M. Shalagin</i> On Some Possible Manifestations of Light-Induced Drift Phenomenon in Astrophysic Objects	777
<i>N. Grevesse</i> Spectral Line Shapes and Solar Photospheric Abundances ...	789
<i>T. Schoening, K. Butler</i> Stark Broadening of He II Lines and New Results in Astrophysical Spectroscopy	791

CHAPTER XI. ROUNDTABLE DISCUSSION AND POSTER SESSIONS

Foreword	797
<i>P. S. Julienne, L. Frommhold</i> Notes and Comments on Roundtable Discussion on Laser- -Assisted Collisions and Collision-Induced Spectra	800
<i>J. Schaefer</i> Faint Features of the Collision Induced Absorption Spectra of H ₂ Gas	807
<i>D. Segal, K. Burnett, I. D. Harts, L. W. J. Kent, C. Richter, W. Steer</i> Polarization Monitored Collisional Redistribution Experiments in the Hg(³ P ₁ - ¹ S ₀)-Kr System	810
<i>M. Shah, K. Burnett</i> Resonance Atomic Collisions in Intense Fields	812
<i>P. S. Julienne, Shao-Hua Pan, H. R. Thorsheim, J. Weiner</i> Na Resonance Line Broadening in Ultracold Collisions	813

<i>A. Gallagher</i> Collisional Line-Shapes of Slowed and Trapped Atoms	814
<i>P.S. Julienne, F.H. Mies</i> Collision Induced Spectral Phenomena at Ultracold Temperatures	815
List of Contributed Papers	817
Author Index	829
Subject Index	831
