

## CONTENTS

Preface .....	xiii
---------------	------

### PLASMA BROADENING

<b>Line shapes in hydrogen and complex spectra.....</b>	<b>3</b>
A. Calisti,* F. Khelfaoui, R. Stamm, and B. Talin	
<b>Ion-dynamic effects in non-hydrogenic spectra .....</b>	<b>19</b>
N. Konjević*	
<b>Line shapes in charge exchange recombination spectroscopy .....</b>	<b>31</b>
R. J. Fonck*	
<b>Coulomb broadened spectral resonances .....</b>	<b>48</b>
S. A. Babin and D. A. Shapiro*	
<b>A new critical review of experimental Stark widths and shifts .....</b>	<b>63</b>
W. L. Wiese and N. Konjević	
<b>Plasma broadening of Br I and II lines from (<math>^1D_2</math>) <math>np</math> levels.....</b>	<b>65</b>
S. Djurović, N. Konjević, and M. S. Dimitrijević	
<b>Stark broadening of several C II and Si II lines .....</b>	<b>67</b>
C. Pérez, I. de la Rosa, A. de Frutos, and S. Mar	
<b>Stark broadening regularities within successive ionization stages of phosphorus ....</b>	<b>69</b>
A. Srećković, S. Djeniže, J. Labat, M. Platiša, and J. Purić	
<b>Electron-impact width of Si III transitions.....</b>	<b>71</b>
Vivek Bakshi	
<b>Stark broadening of C IV lines .....</b>	<b>73</b>
T. Schöning and K. Butler	
<b>Line shape measurements in a high-intensity discharge lamp using a retroreflective array.....</b>	<b>75</b>
S. Couris, T. Fohl, and P. A. Vicharelli	
<b>Studies of neutral helium lines in a dense, cool, Z-pinch plasma.....</b>	<b>77</b>
D. J. Heading, J. P. Marangos, and D. D. Burgess	
<b>Attempts at extending the unified theory to include many-body effects .....</b>	<b>78</b>
D. E. Kelleher and J. Cooper	
<b>Relationship of radiative and transport properties of an ion in a plasma.....</b>	<b>80</b>
James W. Dufty	
<b>Stochastic microfield produced shapes of multiphoton plasma satellites of atomic spectral lines .....</b>	<b>82</b>
N. F. Perelman and A. A. Mosyak	
<b>Nonlinear interference effects in the Stark broadening of dipole forbidden lines of highly charged ions in plasmas .....</b>	<b>84</b>
A. V. Anufrienko, A. L. Godunov, A. V. Demura, Yu. K. Zemtsov, V. S. Lisitsa, A. N. Starostin, and M. D. Taran	
<b>Influence of Debye shielding and back reaction on Stark broadening of atomic lines in the quasi-classical impact model .....</b>	<b>86</b>
B. Grabowski and A. Czański	

<b>Collision width function in a correlated plasma .....</b>	<b>88</b>
Z. Ben Lakhdar and N. Ben Nessib	
<b>Analytic fit of Monte Carlo distributions of the electric microfield in a plasma .....</b>	<b>90</b>
D. Gilles	
<b>Modification of hydrogen spectral line profiles in plasmas influenced by superposition of non-collinear, oscillating electric fields .....</b>	<b>92</b>
V. P. Gavrilenko	
<b>A new unified quantum theory of Stark broadening and application to the Lyman-<math>\alpha</math> and H<sub>B</sub> line profiles .....</b>	<b>94</b>
Nabil Cherkaoui, Olivier Vallee, and Nguyet Tran Minh	
<b>Ion dynamics via an all-order theory in the plasma-emitter interaction.....</b>	<b>96</b>
S. Alexiou	
<b>Transition to ion impact broadening of hydrogen lines in low-density plasmas.....</b>	<b>98</b>
J. Seidel	
<b>Plasma-broadened spectral line shapes: Computer simulations and analytical approximations for ions at low densities.....</b>	<b>100</b>
V. Kesting	
<b>Molecular dynamics simulation of the ion dynamic effect on multielectron emitters .....</b>	<b>102</b>
F. Khelfaoui, A. Calisti, R. Stamm, and B. Talin	

#### LASER PRODUCED DENSE PLASMAS

<b>Spectral shifting of femtosecond pulses in atmospheric density plasmas.....</b>	<b>107</b>
M. C. Downer,* J. I. Trisnadi, W. M. Wood, and W. C. Banyai	
<b>Influence of line broadening in x-ray lasers .....</b>	<b>127</b>
Juan C. Moreno*	
<b>Measurement and interpretation of spontaneous line emission from a common upper level in laser-produced plasmas .....</b>	<b>141</b>
J. C. Moreno, Y. W. Huang, J.-S. Wang, and H. R. Griem	
<b>Line shape and shift in high density plasmas .....</b>	<b>142</b>
Ph. Malnoult and H. Nguyen	
<b>Combined radiative transfer and radial inhomogeneity effects in spectral lines emitted from laser produced plasmas.....</b>	<b>144</b>
E. Leboucher-Dalimier, J. Grumberg, H. Nguyen, and A. Poquérusse	

#### NEUTRAL BROADENING—ATOMIC TRANSITIONS

<b>Long-range interaction potentials of excited alkali-rare gas systems from light scattering experiments .....</b>	<b>149</b>
W. Behmenburg*, A. Ermers, and T. Woschnik	
<b>Interferometric study of pressure effects on argon spectral lines .....</b>	<b>166</b>
A. Bielski, J. Szudy, R. S. Trawiński, and J. Wolnikowski	
<b>Classical path method for broadening of atomic spectral lines by diatomic perturbers.....</b>	<b>168</b>
Wm. R. Kearney and K. M. Sando	
<b>An examination of regularities in neutral atom broadening.....</b>	<b>170</b>
M. S. Dimitrijević and G. Peach	

<b>Broadening by neutral collisions following recombination in laser-produced plasmas.....</b>	<b>172</b>
J. Kielkopf	
<b>Pressure broadening of the Cd-326.1 nm line: Line wings, satellites and potentials for Cd-Cd and Cd-Kr.....</b>	<b>174</b>
T. Grycuk, M. Findeisen, and A. Śniecińska	
<b>Near-wing profiles of the Yb 398.8 nm line broadened by rare gases.....</b>	<b>176</b>
L. N. Shabanova and A. G. Kuprin	
<b>Quasistatic approach to the problem of broadening and shift of the spectral lines of Rydberg series .....</b>	<b>177</b>
J. N. Monakov	
<b>Photoionization of rare-gas atoms studied by VUV fluorescence spectroscopy .....</b>	<b>179</b>
H. Schmoranzer, M. Wildberger, K.-H. Schartner, B. Möbus, and B. Magel	
<b>Collisional line shape broadening in collinear fast beam laser spectroscopy .....</b>	<b>181</b>
H. A. Schuessler and J. Zhang	
<b>The accuracy of interatomic potentials in neutral atom line broadening .....</b>	<b>183</b>
W. S. Lobb and D. G. McCartan	
<b>Diode laser measurements of the lithium resonance lines .....</b>	<b>185</b>
B. J. Denton and D. G. McCartan	
<b>The influence of energy pooling collisions on spectral line shapes in ionization spectroscopy.....</b>	<b>187</b>
A. Obrebski, R. Hergenröder, and K. Niemax	

## ULTRACOLD ATOMS

<b>Laser assisted collisions at ultracold temperatures .....</b>	<b>191</b>
Paul S. Julienne*, Robert Heather, and Jacques Vigué	
<b>Radiatively damped collisions of ultracold atoms .....</b>	<b>206</b>
A. Ben-Reuven*	
<b>The effect of long-range collisions between atoms on laser cooling .....</b>	<b>221</b>
A. M. Smith and K. Burnett	
<b>Collisional redistribution of radiation from a system of slow identical atoms .....</b>	<b>223</b>
M. Trippenbach, J. Cooper, and K. Burnett	

## COLLISIONAL REDISTRIBUTION

<b>Nonlinear interference effects in partial redistribution of radiation in dense plasmas</b>	<b>227</b>
A. V. Demura*, A. V. Anufrienko, A. L. Godunov, Yu. K. Zemtsov, V. S. Lisitsa, A. N. Starostin, M. D. Taran, and V. A. Schipakov	
<b>Molecular coherences in collisional redistribution and photo-dissociation .....</b>	<b>255</b>
K. Burnett* and D. M. Segal	
<b>Redistribution of radiation and velocity-changing collisions .....</b>	<b>263</b>
G. Nienhuis and S. Kryszewski	
<b>Collisional redistribution in transitions between excited states .....</b>	<b>265</b>
H. Adler and D. E. Kelleher	

## PHOTON-ASSISTED COLLISIONS

<b>Some aspects of collision-induced transitions in spectral line shape experiments ....</b>	<b>269</b>
Hiroshi Harima*	
<b>Multiphoton processes in the presence of collisions.....</b>	<b>286</b>
D. Voslamber	
<b>Satellite of forbidden line Ar(<math>4s^3P_2 - 1S_0</math>) induced by collisions with helium atoms .....</b>	<b>287</b>
A. Z. Devdariani, A. L. Zagrebin, and S. I. Tscherkovny	
<b>Optical spectroscopy of Landau-Zener interactions: New results.....</b>	<b>288</b>
A. Z. Devdariani, Y. I. Sebyakin, and S. I. Tscherkovny	
<b>Line-broadening experiment in a collision-assisted laser ionization .....</b>	<b>290</b>
Hiroshi Harima, Masato Takahashi, Makoto Narazaki, and Kunihide Tachibana	
<b>Measurement of fine structure branching in the near threshold photodissociation of NaK.....</b>	<b>292</b>
J. X. Wang and P. D. Kleiber	
<b>Collision-induced satellite forbidden line Hg <math>6^3P_2 - 6^1S_0</math> in the noble gases .....</b>	<b>294</b>
M. G. Lednev and A. L. Zagrebin	
<b>Fine-structure branching ratios and atomic polarization in Na-Xe optical collisions .....</b>	<b>296</b>
Linda Vahala and Paul S. Julienne	

## REACTION DYNAMICS

<b>Collisional energy spread in hot-atom reactions caused by thermal motions of the reagents.....</b>	<b>301</b>
Wim J. van der Zande, Rong Zhang, and Richard N. Zare*	
<b>Reaction dynamics of Na*(<math>4^2P</math>)+H<sub>2</sub>: Effect of reactant orbital alignment on product rotational state distribution.....</b>	<b>311</b>
Solomon Bililign and P. D. Kleiber*	

## COHERENT AND NONLINEAR PROCESSES

<b>Collision-induced phase in macroscopic optical coherence .....</b>	<b>319</b>
P. J. Laverty, A. M. Bacon, and J. E. Thomas	
<b>Spectral coefficient of amplification at the 4-3 transition of relativistic He-like ions.....</b>	<b>321</b>
A. V. Gulov and A. G. Zhidkov	
<b>A model calculation for nonimpact four wave mixing .....</b>	<b>323</b>
Michael Belsley	
<b>Effect of laser axial modes on the coherence length.....</b>	<b>324</b>
M. A. Kenawy, M. M. H. El-Naby, M. M. El-Nicklawy, E. F. Hassan, and E. A. Nasr	
<b>Mutual coherence function and degree of coherence of multiple beams .....</b>	<b>324</b>
M. A. Kenawy, M. M. H. El-Naby, M. M. El-Nicklawy, E. F. Hassan, and E. A. Nasr	

<b>Short pulse-induced population inversion for continuum-continuum transitions .....</b>	<b>325</b>
J. Swiatlowski and W. Leoński	
<b>Study of the diffractional molecular gas scattering by nonlinear laser spectroscopy .....</b>	<b>327</b>
L. S. Vasilenko, N. M. Dyuba, and N. N. Rubtsova	
<b>Line shapes in cavity enhanced spectroscopy .....</b>	<b>329</b>
E. Benck, S. H. Chen, Z. Rong, and H. A. Schuessler	
<b>Line shape theory in atomic resonant multiphoton ionization .....</b>	<b>331</b>
A. Rachman	
<b>Line shape of transient burned hole at the dephasing induced by slow stochastic frequency modulation .....</b>	<b>333</b>
S. Ya. Kilin and A. P. Nizovtsev	

#### NEUTRAL BROADENING—MOLECULAR TRANSITIONS

<b>A kinetic approach to the shape of pressure broadened molecular bands .....</b>	<b>337</b>
George Birnbaum*	
<b>Temperature dependence of spectral-line shifts in pressure broadening.....</b>	<b>352</b>
W. C. Kreye and J. F. Kielkopf	
<b>Line shape of water vapor absorption lines in the 720-nm wavelength region .....</b>	<b>354</b>
Benoist E. Grossmann and Edward V. Browell	
<b>Measurements of state-to-state rotational energy transfer rates in N<sub>2</sub>:</b>	
<b>Critical comparison with statistical and sudden fitting laws .....</b>	<b>356</b>
G. O. Sitz and R. L. Farrow	
<b>Speed-dependent inhomogeneity in H<sub>2</sub> vibrational line profiles.....</b>	<b>358</b>
R. L. Farrow, L. A. Rahn, G. O. Sitz, and G. J. Rosasco	
<b>MCQDT and close-coupled theory of non-Lorentzian line shapes in the predissociation of the O<sub>2</sub> Schumann–Runge bands .....</b>	<b>359</b>
L. L. Vahala, P. S. Julienne, and F. H. Mies	
<b>Linewidth and line shift parameters of rotation-vibration transitions of linear molecules perturbed by inert gas .....</b>	<b>361</b>
Manoj Johri, Gajendra K. Johri, and Rajendra P. Rishishwar	
<b>Spectral profiles of the ν<sub>1</sub> and ν<sub>3</sub> bands of pressurized methane.....</b>	<b>363</b>
Wang Weiguo	
<b>Dielectric spectral line shapes of some electrolytes in frequency range of 10 MHz to 10 GHz.....</b>	<b>365</b>
S. C. Mehrotra	

#### DIMERS AND EXCIMERS

<b>Infrared spectra of van der Waals molecules using long paths at low temperatures .....</b>	<b>369</b>
A. R. W. McKellar*	
<b>Electronic properties of rare gas dimers and trimers .....</b>	<b>384</b>
T. Möller* and M. C. Castex	
<b>Metal excimers .....</b>	<b>398</b>
G. Pichler*	

<b>On the transition moment between the <math>B^31</math> and <math>X^10^+</math> states of Hg-Ar, Hg-Kr, and Hg-Xe van der Waals molecules .....</b>	<b>411</b>
M. Findeisen, T. Grycuk, and J. Staby	
<b>An absorption spectrum of He<sub>2</sub> in the VUV.....</b>	<b>413</b>
V. Guzielski, M. C. Castex, J. Wörmer, and T. Möller	
<b>CARS spectra of the Na(3p)H<sub>2</sub> exciplex .....</b>	<b>415</b>
R. de Vivie-Riedle, P. Hering, K. L. Kompa, R. R. B. Correia, S. L. Cunha, and G. Pichler	
<b>Potential curves and transition moments of Hg-Zn .....</b>	<b>417</b>
J. E. Sienkiewicz, G. Chambaud, and W. E. Baylis	

## COLLISION-INDUCED ABSORPTION

<b>Collisional interference in the infrared absorption spectrum of HD .....</b>	<b>421</b>
G. C. Tabisz*, Lorenzo Ulivi, P. Drakopoulos, and Z. Lu	
<b>Virial expansion of correlation functions for collision induced spectroscopies .....</b>	<b>438</b>
M. Moraldi*	
<b>Line shapes in dense fluids: The problem, some answers, future directions.....</b>	<b>453</b>
Bertrand Guillot*	
<b>Infrared and Raman spectroscopy of the solid hydrogens.....</b>	<b>473</b>
J. D. Poll*	
<b>Absorption of collisional H-He pairs in the infrared.....</b>	<b>485</b>
Nathan G. Hardee, Lothar Frommhold, and Wilfried Meyer	
<b>The collision-induced rotovibrational absorption bands of hydrogen and hydrogen-helium mixtures—New results .....</b>	<b>487</b>
Aleksandra Borysow, Lothar Frommhold, and Wilfried Meyer	
<b>On the problem of model line shapes in collision-induced rotovibrational bands .....</b>	<b>489</b>
Aleksandra Borysow and George Birnbaum	
<b>Water vapor continuum in the millimeter spectral region.....</b>	<b>491</b>
Q. Ma and R. H. Tipping	
<b>Theory of the high-frequency wing in interaction-induced spectra .....</b>	<b>493</b>
J. Yang, L. Lolle, J. Poll, B. Nickel, and C. Gray	
<b>Application of the Kramers-Kronig relation to the comparison of infrared absorption, dielectric constant and refractive index of CCl<sub>4</sub> and CS<sub>2</sub> in the liquid phase .....</b>	<b>494</b>
Ph. Marteau, J. Obriot, T. K. Bose, and J. M. St Arnaud	
<b>Simulation of the collision-induced absorption spectrum of gaseous rare gas mixtures including ternary contributions .....</b>	<b>496</b>
Shmuel Weiss	
<b>Three-body components of collision-induced absorption in the infrared .....</b>	<b>498</b>
Massimo Moraldi and Lothar Frommhold	
<b>Determination of a multiple property fit of the interaction potential of H<sub>2</sub>-H<sub>2</sub> in order to obtain improved theoretical collision-induced absorption spectra .....</b>	<b>500</b>
Joachim Schaefer	

## COLLISION-INDUCED LIGHT SCATTERING

<b>The modified Birnbaum–Cohen line shape description of the collision-induced light scattering by molecules .....</b>	<b>505</b>
S. M. El-Sheikh, G. C. Tabisz, F. Barocchi, A. Guasti, and M. Zoppi	
<b>Collision induced features of the depolarized light scattering spectrum of gaseous hydrogen at 50 K .....</b>	<b>507</b>
Ubaldo Bafile, Lorenzo Ulivi, Marco Zoppi, Fabrizio Barocchi, Massimo Moraldi, and Aleksandra Borysow	
<b>Rayleigh scattering of N<sub>2</sub> gas at low densities and several temperatures.....</b>	<b>509</b>
V. Teboul, Y. Le Duff, T. Bancewicz, W. Glaz, and S. Kielich	
<b>Collision-induced changes in polarizability and Raman scattering by atom-diatom pairs .....</b>	<b>511</b>
Ying Q. Liang, Srinivasan Sethuraman, and Katharine L. C. Hunt	
<b>Infrared and vibrational Raman band intensities: A new physical interpretation based on nonlocal polarizability densities .....</b>	<b>513</b>
Katharine L. C. Hunt	
<b>Computation of the bound-state contribution to the interaction-induced binary light scattering spectrum.....</b>	<b>515</b>
N. Meinander	
<b>A comparison of models for light scattering and nonlinear optical response in molecular fluids.....</b>	<b>517</b>
B. M. Ladanyi and L. C. Geiger	
<b>Three-body components of collision-induced light scattering by rare gases .....</b>	<b>519</b>
Daniel Coffman, Lothar Frommhold, and Massimo Moraldi	

## TERRESTRIAL AND ASTROPHYSICS

<b>Infrared spectroscopy as a tool to study the Earth's atmosphere.....</b>	<b>523</b>
J. M. Flaud*	
<b>Astrophysical aspects of neutral atom line broadening .....</b>	<b>541</b>
E. L. Lewis*	
<b>Spectroscopy in mega-Gauss fields: Theory .....</b>	<b>563</b>
Günter Wunner*	
<b>Zeeman and cyclotron lines from magnetic white dwarfs .....</b>	<b>574</b>
D. T. Wickramasinghe*	
<b>The Lyman <math>\alpha</math> line wing .....</b>	<b>604</b>
N. Allard and J. Kielkopf	
<b>Simple convergent formula for estimating Stark widths of neutral atom lines .....</b>	<b>605</b>
M. S. Dimitrijević and N. Ben Nessib	
<b>Hydrogen Stark profiles for astrophysics .....</b>	<b>607</b>
C. Stehlé	
<b>Stark parameter regularities along the periodic table .....</b>	<b>609</b>
J. Purić, M. Ćuk, S. Djeniže, and A. Lesage	
<b>Swan band pressure shifts in DQ white dwarfs .....</b>	<b>611</b>
Gordon L. Hammond	

<b>Author Index.....</b>	<b>613</b>
<b>Compound Index.....</b>	<b>617</b>
<b>Subject Index.....</b>	<b>621</b>
