

CONTENTS

L'Origine des Colloques E.J.-B. Loeuille	xvi
<u>Invited Papers</u>	
Atomic spectra and radiation processes H.G. Kuhn	3
The experimental determination of electron-transition strengths in diatomic molecules N.N. Sobolev	9
Recent advances in excitation of atomic spectra Marvin Margoshes	26
Some recent advances in atomic-absorption spectroscopy A. Walsh	43
The part played by impurities in the excitation of atomic spectral lines S.E. Frish	66
Recent advances in techniques and instrumentation for X-ray spectroscopy J.L. de Vries	81
New infra-red techniques and applications R. Robert Brattain	99
Recent advances in the mass spectrometric study of organic substances J.H. Beynon	114
Biophysical aspects of molecular electronic spectroscopy S.F. Mason	129
<u>Session A: Emission Spectroscopy of Non-Conductors</u>	
Die Untersuchung physikalisch-chemischer Reaktionen in metalloxidhaltigen Graphitelektroden bei Bogenanregung mit Hilfe radioaktiver Isotope und der Röntgenbeugung H. Nickel	145
Some analytical aspects of gaseous oxygen, hydrogen, and nitrogen in inert gas with d.c. arc excitation from 10 to 300 amperes E.L. Grove and W.A. Loseke	150

Die Anwendung eines Argonhochstrombogens für die Analyse von Gasen, Lösungen und Festsubstanzen W. Böggershausen, H. Krempl und H.R. van der Walt	152
Spektralanalyse nichtleitender Substanzen mit Hilfe zeitaufgelöster Spektroskopie H. Dunken, M. Rentsch, U. Rick und W. Mikkeleit	159
Standardization of direct-reading spectrographic determination of trace elements in biological media R. Gabriels and A. Cottenie	174

Session B: Sources with Arc or Plasma Excitation

An experimental study of particle distribution in d.c. carbon arcs with special reference to transport phenomena L. de Galan and P.W.J.M. Boumans	179
The effect of transport through the discharge on the absolute detection efficiency of emission spectrographic analysis V. Svoboda	184
Lichtbogen im Magnetfeld als spektrochemische Anregungsquelle V. Vukanović, V. Georgijević, N. Konjević und D. Vukanović	193
Lösungsspektralanalyse mit Hilfe eines aerosolbeschickten wandstabilisierten Lichtbogens Manfred Riemann	199
Das Verhalten stromführender und stromfreier Plasmen bei der Zufuhr von Aerosolen im Hinblick auf die Spektralanalyse H. Kaiser, K. Laqua und H. Schirrmeister	205
The determination of charged particle densities in low-temperature plasma M.A. Elyashevich, L.I. Greshikhin, and L.I. Kisselevsky	208

Session C: Ultra-Violet and Visible Absorption Spectroscopy

The influence of solvents on the electronic absorption spectra of substituted aromatics Fl. Bărbulescu, V.E. Sahini, and A. Greff	217
Spectrophotometric determination of traces of peroxides in ethers T.R. Griffiths	226
Etudes sur le comportement spectrochimique et photochimique des anthocyanols et des anthocyanosides Slobodan Ristić et Jelisaveta Baranac	230

A comparative spectrophotometric study of the complexes formed by ammonia S. Jacobs	242
On the temperature behaviour of the absorption of additively coloured strontium fluoride crystals P. Görlich, H. Karras, and A. Koch	252
Optical spectra of crystals containing the ions of the iron group S.V. Grum-Grzhimailo	264

Session D: Atomic Absorption and Flame Spectroscopy

The simultaneous estimation of Na, K, Ca, and Mg by emission and absorption flame photometry using an automatic high-speed scanning spectrophotometer J.B. Dawson and D.J. Ellis	271
Spurenanalyse mittels Atomabsorption mit Mehrfachhohlkathoden und einem Mehrkanalspektrometer H. Massmann	275
Multi-channel atomic-absorption analyser J.A. Norris	279
Evaluation of spectral continua as primary light sources in atomic-absorption spectroscopy V.A. Fassel, V.G. Mossotti, W.E.L. Grossman, and R.N. Kniseley	281
Atomic-absorption analysis with volatilization by laser W.-D. Hagenah, K. Laqua, and V. Mossotti	282
The determination of gold in mine solutions by atomic-absorption spectroscopy L.R.P. Butler, A. Strasheim, and F.W.E. Strelow	284
Quasi-continuous background radiation in flames P.J.Th. Zeegers and C.Th.J. Alkamade	290

Session E: Sources with Spark and Laser Excitation

The characteristics and performance of the accurately timed spark when used as a spectrochemical light source A. Strasheim, F.R. Maritz, and I.K.A. Kovacs	299
Internal voltage stabilized spark source W.W. Schroeder, H. van der Piepen, and L. Krauss	311

Foliar analysis by a.c. spark excitation C.S. Joyce	316
Ueber die Eigenschaften von verdampfenden und nicht verdampfenden Entladungsformen bei Funkenanregung in Edelgasen W.-D. Hagenah, K. Hirokawa und K. Laqua	333
Characteristics of the laser probe for spectrochemical analysis Stanley D. Rasberry, Bourdon F. Scribner, and Marvin Margoshes	336
Spektrochemische Analyse mit Laser-Impulsen hoher Folgefrequenz A. Felske, W.-D. Hagenah und K. Laqua	340
Le laser, source d'excitation des spectres: applications aux dosages de chrome et de nickel dans des aciers et a l'analyse qualitative de matieres diverses J. Vilnat, N. Liodec et J. Debras-Guedon	343
The use of a laser in quantitative spectral analysis A.V. Karyakin, M.V. Akhmanov, and V.A. Kaigorodov	353
<u>Session F: Techniques in Molecular Spectroscopy</u>	
Advances in the design of infra-red gas analysers D.W. Hill, T. Powell, and H.A.H. Boot	361
The application of multireflection gas cells to infra-red trace analysis L.C. Thomas	370
Advances in interferometric spectrometers for general use A.E. Martin	383
Source utilisant une decharge de Lyman pilotee par une etincelle glissante pour la spectroscopie dans l'U.V. lointain S. Robin et M. Morlais	387
Etudes comparees des qualites des recepteurs photoelectriques et photographiques employes en spectroscopie Raman Michel Bridoux et Michel Delhaye	395
A peak height digitizer for mass spectrometers J.M.B. Bakker, A. Quayle, and L.V. Ashcroft	402
On exact and approximate natural coordinates in the theory of vibration of polyatomic molecules M.A. Elyashevich and L.A. Gribov	409

Session F: Molecular Mass Spectroscopy

- Some observations of meta-stable ions in double-focusing mass spectrometers 419
J.H. Beynon, R.A. Saunders, and A.E. Williams
- Ueber ein System zur Ordnung massenspektrometrischer Daten von isomeren Verbindungen 424
W. Reerink, W. Riepe und G. Rolle

Session G: X-ray Fluorescence Spectroscopy

- New X-ray fluorescence analytical techniques and material-handling methods using high-speed multi-channel instruments 431
A.H. Smallbone
- On-stream X-ray fluorescence analysis of ore slurries with a radio-isotope X-ray source 438
K.G. Carr-Brion and J.R. Rhodes
- Effects of surface finish in the X-ray fluorescence analysis of bulk metals 444
R. Jenkins and P.W. Hurley
- On-stream X-ray analysis 451
B.G. Greensides
- The use of direct electron excitation in a conventional X-ray fluorescence spectrometer 456
J.G.M. Fox
- Electron microprobes for research and industrial control 460
E. Davidson, W.E. Fowler, H. Neuhaus, and W.G. Shequen
- Preliminary electron-probe measurements of the effect of oxygen and nitrogen on diffusion in the niobium-titanium system 472
L.S. Birks and D.J. Nagel

Session H: Emission Spectroscopy of Conductors

- A system for direct-reading spectrochemical analysis of aluminium alloys 477
P.E. Lemieux and R.H. Black
- Verfahren zur spektrochemischen Qualitätsüberwachung von Stählen und Nichteisenmetallen 484
S. Eckhard

The analysis of pelleted steel samples with the vacuum direct reader W. Ramsden and D.F. Sermin	489
Automatic high-precision uranium isotopic analysis by emission spectroscopy R. Franklin and G.R. Steele	498
Effects of solid-solution formation in the spectrochemical analysis of uranium Slobodan Marinković and Milutin Mirjanić	505
 <u>Session I: Infra-Red Absorption Spectroscopy</u>	
A study of hydrogen bonds in some addition compounds of glycine E.R. Lippincott and R.K. Khanna	513
A study of the infra-red absorption bands of phosphine ligands in metal co-ordination compounds R.C.J. Miller	523
Etudes des spectres I.R. et de R.M.N. de quelques diphenyl-1, alcanols-1 André Jung, Mathilde Brini, Fernand Hemmert, et Noël Perol	540
Interpretation of the infra-red spectra of some polyphenyl and polyphenylbenzyl ethers Janis M. Hume	545
Infrarot-spektren von Einkristallen und Kristallpulvern mit der ATR-Technik K. Gottlieb und B. Schrader	557
Conformational change in myosin B under ATP-contraction N.A. Gabelova and V.V. Kobayakov	559
 <u>Session J: Emission Spectroscopy, General</u>	
The variation with the temperature of the distance of the disturbing particle from the emitter in a transient discharge A. Bardócz and T. Vörös	569
Die Eigenschaften und Anwendungen eines neuentwickelten Plasmabrenners für spektroskopische Zwecke Erich Kranz	574
A high-voltage source with electronic trigger J.B. Baird	578

Spectral analysis of isotopic compositions A.N. Zaidel, A.G. Zhiglinsky, and A.A. Petrov	588
The investigation of the photometric properties of U.V.-type plates in the vacuum ultra-violet region of the spectrum A.N. Rhyabtsov and N.K. Sukhodref	601
On the increase in sensitivity of direct spectrochemical analysis Yu.I. Belyaev, L.M. Ivantsov, B.I. Kostin, and V.V. Shemet	606
Methods of increasing the sensitivity of spectral analysis N.I. Kaliteevsky and Z.G. Phratkin	615
 <u>Session K: Spark-Source Mass Spectroscopy</u>	
Quantitative impurity analysis of solids by mass spectrometry R.M. Elliott and P. Swift	623
Dosage de traces non-metalliques dans les metaux par spectrometrie de masse a etincelles R. Stefani, R. Bourguillot, et A. Cornu	627
Commentary on the spark-source mass spectrograph G.G. Cookson, W. Fletcher, and R. Tushingham	636
Direct recording of isotope beams in spark-source mass spectroscopy A. Argyle and R.A. Bingham	641
Some remarks concerning inorganic spark-source mass spectrometric analysis N.W.H. Addink, H.W. Werner, and A.W. Witmer	651
 <u>Session L: Evaluation of Spectra</u>	
The impact of digital computers on spectrochemical analysis W.E. Fowler, P.J. Breckheimer, and A.J. Hartwick	659
Calculations concerning limits of spectrographic detection D.J. Hobbs and D.M. Smith	666
The interpretation of the infra-red spectra of organo- phosphorus compounds L.C. Thomas	672
Computer analysis of linear density transforms used in emission spectroscopy Arno Arrak	686
