

Table of Contents

1. Absorption and Emission from Atoms and Simple Molecules	
1.1. Far Ultraviolet Astrophysical Spectroscopy <i>W. R. S. Garton</i>	1
1.2. Construction of Perturbed Rydberg Series of Ionized Atoms along Isoelectronic Sequences by a Graphic Method <i>K. T. Lu</i>	23
1.3. Rydberg States. II. A Correlation Algorithm <i>P. Hochmann and S. P. McGlynn</i>	26
1.4. Energy Losses of keV Electrons in Ne, Kr, and Xe and Comparison with the Fano-Lu Theory <i>J. Geiger</i>	28
1.5. The Absorption Spectra of Xe_2 and Xe-Rare Gas Mixtures in the Vacuum Ultraviolet Region (1150–1500 Å) <i>M. C. Castex, N. Damany and B. Vodar</i>	31
1.6. VUV-Emission Spectra of He, Ne, Ar, and Kr Excited by Heavy Particle Impact (100 keV to 1000 keV) <i>R. Hippler and K.-H. Schartner</i>	35
1.7. Collisional Quenching of Resonance States of Rare Gases <i>O. Cheshnovsky, B. Raz and J. Jortner</i>	37
1.8. Atomic Extravalence Excitations Perturbed by High Pressure Rare Gas Atoms <i>I. Messing, B. Raz and J. Jortner</i>	40
1.9. Ion Lasers for the Vacuum-UV Region <i>R. C. Elton</i>	43
1.10. Vacuum UV Stimulated Emission in 5 to 15 Bars Xenon using E. Beam Excitation <i>F. Lagarde and M. Novaro</i>	45
1.11. Ion-Excited VUV Radiation from Solid Targets <i>D. J. Nagel, A. R. Knudson and P. G. Burkhalter</i>	47
1.12. Interaction between Extreme UV Radiation and Highly Charged Ions in Dense Laser Plasmas; Evidence for a Negative Absorption <i>A. Carillon, G. Jamelot, P. Jaeglé and A. Sureau</i>	50
1.13. New High Resolution Emission Spectra of H_2 and D_2 near 800 Å <i>J.-Y. Roncin and H. Damany</i>	52
1.14. Photodissociation of Molecular Hydrogen and the Excitation Spectra of the Balmer α , β and γ Emissions from Excited H and D Atoms <i>P. Borrell, P. M. Guyon and M. Glass-Maujean</i>	54
1.15. Rotational Line Intensity Perturbations and Variation of Electronic Transition Moment in the Lyman Band System of H_2 <i>H. Schmoranzer</i>	56
1.16. Vacuum UV Spectroscopy with Plasma Arcs <i>G. L. Weissler</i>	59
1.17. The Rydberg Series of the NO Molecule Converging to the First Ionization Limit 1340 Å <i>E. Miescher</i>	61
1.18. Static and Dynamic Interactions in the High Resolution Electronic Spectrum of NO Trapped in Matrices <i>E. Boursey and J.-Y. Roncin</i>	64

1.19.	Pressure Effect on the Electronic Spectrum of NO. Relationship with Matrix Isolated Spectrum <i>J.-Y. Roncin, M. Miladi, H. Damany and B. Vodar</i>	67
1.20.	Dissociative Excitation and Ionization of Diatomic Molecules by VUV Radiation <i>H. Hertz, H.-W. Jochims, H. Schenk and W. Sroka</i>	68
1.21.	Vacuum Ultraviolet Absorption Spectra of Ice <i>M. Watanabe, H. Kitamura and Y. Nakai</i>	70
1.22.	Electronic Excitation Spectra of Simple Aromatic Hydrocarbons <i>C. B. Duke, N. O. Lipari, L. Pietronero, W. R. Salaneck and H. R. Thomas</i>	73
1.23.	Absorption Spectra of Gaseous Benzene, Perdeuterobenzene, Pyridine and Fluorinated Benzenes in the VUV <i>E. E. Koch, A. Otto, V. Saile and N. Schwentner</i>	77
1.24.	Circular Dichroism of Alcohols in the Vacuum Ultraviolet <i>P. A. Snyder and W. C. Johnson, Jr.</i>	81
Inner Shell Absorption:		
1.25.	Toward a Theory of Inner Shell Photoabsorption in Crystals <i>U. Fano</i>	84
1.26.	Interpretation Schemes for an Chemical Application of Molecular Core Electron Excitation Spectra <i>W. H. E. Schwarz</i>	86
1.27.	Photoionization in the M_{II} M_{III} Thresholds Region for some Neutral Atoms and Positive Ions <i>F. Combet Farnoux and M. Lamoureux</i>	89
1.28.	K-Absorption Structure of Nitrogen Atom in Nitric Oxide Molecule <i>Y. Morioka, M. Nakamura, E. Ishiguro and M. Sasanuma</i>	92
1.29.	Photoionization of Molecular Oxygen near the K-Absorption Limit <i>S. Bodeur, C. Senemaud, C. Bonnelle and J. P. Connerade</i>	94
1.30.	Absorption Spectra of MgI, MgII, and MgIII in the Region 100–250 Å <i>J. M. Esteva, G. Mehlman and J. Romand</i>	96
1.31.	The Zn I 3s and K I 2p Absorption Spectra <i>J. P. Connerade, M. W. D. Mansfield, K. Thimm and D. H. Tracy</i>	99
1.32.	Photoionization Cross Sections of Uranium and Iridium in the Soft X-Ray Region <i>M. Cukier, P. Dhez, F. Wuilleumier, P. Jaeglé, M. Lamoureux and F. Combet Farnoux</i>	102
1.33.	VUV Excitations of Molecular Alkali-Halides <i>K. Radler, B. Sonntag and R. Haensel</i>	104
2.	Photoelectron-, Photoion- and Electron Impact Spectroscopy of Atoms and Molecules	
2.1.	Photoelectron and Photoion Spectroscopy of Molecules <i>J. Berkowitz</i>	107
2.2.	Coincidence Measurements with Electron Impact Excitation <i>C. Backx and N. J. van der Wiel</i>	137
2.3.	Excitations Accompanying Ionization in C_3O_2 <i>L. S. Cederbaum</i>	155

2.4.	Ionization Processes in Molecules <i>J. A. R. Samson, G. N. Haddad and J. L. Gardner</i>	157
2.5.	Measurements Made on the Total Photo-Ionization Cross-Sections of Atoms at the NINA Synchrotron <i>J. B. West, G. V. Marr, J. Hamley and K. Codling</i>	158
2.6.	Effect of Spin-Orbit Coupling on the Wavelength Dependence of Atomic Branching Ratios <i>J. Berkowitz and J. L. Dehmer</i>	160
2.7.	Photoelectron Spectra and Electronic Structure of the Chlorides, Bromides and Iodides of Na, K, Rb and Cs <i>A. W. Potts, T. A. Williams and W. C. Price</i>	162
2.8.	Photoelectron Angular Distributions for Open-Shell Atoms: A Probe of Anisotropic Electron-Ion Interactions <i>D. Dill, A. F. Starace and S. T. Manson</i>	165
2.9.	Some Factors Affecting the Angular Distributions of Photoelectrons <i>G. V. Marr</i>	168
2.10.	Angular Distributions of 304 Å Photoelectrons from Atoms and Molecules <i>M. Nakamura and Y. Iida</i>	170
2.11.	Photo-Electron Spectroscopy at the NINA Synchrotron <i>R. G. Houlgate, J. B. West, K. Codling and G. V. Marr</i>	173
2.12.	Optical Constants of Solid CO, N ₂ , and O ₂ and Vapours Derived from Electron Energy Losses <i>H.-J. Hinz</i>	176
2.13.	Analysis of Intensity Distributions in Energy-Loss Spectra of N ₂ in the 12.5–13.5 eV Region <i>K. Dressler and M. Leoni</i>	179
2.14.	Apparent Oscillator Strength Distributions Derived from Electron Energy-Loss Measurements: Methane and <i>n</i> -Hexane <i>R. H. Huebner, C. H. Ferguson, R. J. Celotta and S. R. Mielczarek</i>	181
2.15.	New Determinations of the Oscillator Strength Distribution and the Photo-ionization Yields for Methane and <i>n</i> -Hexane <i>J. C. Person and P. P. Nicole</i>	184
2.16.	K-Shell Energy Loss Spectra of 2.5 keV Electrons in Methane, Ammonia and Water <i>G. R. Wight and C. E. Brion</i>	185
2.17.	New Results from Photoelectron-Photoion Coincidence Spectroscopy <i>J. H. D. Eland, C. S. Cant and C. J. Danby</i>	188
2.18.	Predisociation and Autoionization of Photoexcited Rydberg States of N ₂ O <i>H. Hertz, H.-W. Jochims and W. Sroka</i>	190
2.19.	Enthalpy of Formation of Methyl and Methylene Radicals by Photoionization Studies of Methane and Ketene <i>V. H. Dibeler and K. E. McCulloh</i>	191
2.20.	Threshold Energies for Formation of OH ⁺ and NH ₂ ⁺ by Dissociative Photo-ionization of Water and Ammonia <i>K. E. McCulloh</i>	195
2.21.	Photoionization Mass Spectrometry Using Supersonic Molecular Beam Sampling and Synchrotron Radiation <i>J. W. Taylor, C. R. Parr and G. G. Jones</i>	197

2.22.	Dissociative Photoionization of Propene and Cyclopropane <i>R. Krässig, D. Reinke and H. Baumgärtel</i>	198
-------	--	-----

3. Collective Response in Matter

3.1.	Manifestations of Collective Behaviour of Electron Shells in the Process of Photoionization <i>M. Ya. Amusia</i>	205
3.2.	Effects of Localized Excitations on the Dynamic Response of Atoms and Solids <i>G. Wendum</i>	225
3.3.	Correlation Effects in the Photoabsorption on Lightest Atoms <i>M. Ya. Amusia, N. A. Cherepkov, Dj. Zivanovic and V. Radojevic</i>	241
3.4.	Collective Excitation in the Ba I Absorption Spectrum <i>J. P. Connerade, M. W. D. Mansfield, K. Thimm and D. Tracy</i>	243
3.5.	Photoabsorption from the 4d and 5p Shells of Barium <i>D. L. Ederer, T. B. Lucatorto and E. B. Saloman</i>	245
3.6.	Photoabsorption of Metallic and Atomic Barium between 80 eV and 160 eV <i>P. Rabe, K. Radler and H.-W. Wolff</i>	247
3.7.	Electron and Photon Excited Appearance Potential Spectra of Barium <i>P. O. Nilsson and J. Kanski</i>	249
3.8.	Localized Excitations in Appearance Potential Spectra in Barium <i>G. Wendum</i>	252
3.9.	Appearance Potential Spectra of La and Ce <i>M. Piacentini, R. J. Smith and D. W. Lynch</i>	255
3.10.	Rare Earth 4d Spectra in Rare Earth Trifluorides <i>D. W. Lynch and C. G. Olson</i>	258

4. Excitons and Band States in Molecular Crystals and Large Band Gap Materials

4.1.	Excitations in Molecular Crystals <i>J. Jortner</i>	263
4.2.	Exciton Lattice Interaction – Fluctuation, Relaxation and Defects Formation <i>Y. Toyozawa</i>	317
4.3.	Calculation of Optical Absorption Edges and Photo-Emission Edges in Solids <i>A. B. Kunz</i>	331

Solid Rare Gases:

4.4.	Fine Structure of the Reflectivity and Optical Constants of Solid Argon in the Excitonic Range between 10 and 14 eV <i>A. Harmsen, E. E. Koch, V. Saile, N. Schwentner and M. Skibowski</i>	339
------	--	-----

4.5.	Exciton Luminescence in Solid Rare Gases <i>J. Hanus, F. Coletti, A. M. Bonnot and J. M. Debever</i>	341
4.6.	Optically Excited VUV-Emission of Solid Rare Gases <i>R. Brodmann, R. Haensel, U. Hahn, U. Nielsen and G. Zimmerer</i>	344
4.7.	Photoemission and Photoconductivity Studies of Condensed Rare Gases <i>I. T. Steinberger, E. Pantos, I. H. Munro and U. Asaf</i>	347
4.8.	Exciton Enhanced Photoemission from Doped Solid Rare Gases <i>Z. Ophir, B. Raz and J. Jortner</i>	350
4.9.	Photoemission from Doped Solid Rare Gases <i>V. Saile, N. Schwentner, E. E. Koch, M. Skibowski, W. Steinmann, Z. Ophir, B. Raz and J. Jortner</i>	352
4.10.	Energy Distribution of Photoelectrons from the Valence Bands of Solid Xenon <i>N. Schwentner, F.-J. Himpel, E. E. Koch, V. Saile and M. Skibowski</i>	355
4.11.	Core Excitons in Solid Argon <i>M. Altarelli, W. Andreoni and F. Bassani</i>	357

Organic Molecular Crystals:

4.12.	Electron Energy Loss Measurements on Fluorene ($C_{13}H_{10}$) and p-Terphenyl ($C_{18}H_{14}$) Single Crystals and Vapours <i>H.-J. Hinz and H. Venghaus</i>	359
4.13.	Singlet Exciton Fission from Highly Excited States in Molecular Crystals <i>G. Klein and R. Voltz</i>	362
4.14.	Temperature Dependent Photoemission from TTF-TCNQ <i>B. H. Schechtman, S. F. Lin and W. E. Spicer</i>	365

Alkali Halides:

4.15.	Absorption Spectra of Alkali Halides in the VUV Region <i>C. Satoko and S. Sugano</i>	368
4.16.	The Absorption Spectra of Alkali Fluorides in the Extreme Ultraviolet <i>M. Watanabe, H. Nishida and A. Ejiri</i>	370
4.17.	Excitons and Continuum Transitions from the Rb^+4p Level in Rubidium Halides at Low Temperatures <i>W. Zierau, M. Skibowski and W. Steinmann</i>	375
4.18.	Experimental and Theoretical Absorption Coefficient of KCl <i>A. Balzarotti, A. Bianconi, E. Burattini and G. Strinati</i>	378
4.19.	An Adaptation of Photoemission Spectroscopy for Final-State Analysis of Valence Band Excitations in NaCl <i>G. J. Lapeyre, J. Anderson, J. A. Knapp and P. L. Gobby</i>	380
4.20.	Photoemission Studies of NaF and KF in the 12 to 23 eV Region <i>W. Pong and J. A. Smith</i>	383
4.21.	Electron-Hole Interactions and the X-Ray Absorption Spectra of Insulators <i>S. T. Pantelides, R. M. Martin and P. N. Sen</i>	387
4.22.	Manifestation of Exciton and Band Effects in K-Spectra of Li in Solids <i>M. Elango, A. Maiste and A. Saar</i>	390
4.23.	Yield Spectroscopy and EDC Spectra of LiF <i>W. Gudat and C. Kunz</i>	392

4.24.	Core Excitons in the Alkali Halides <i>W. Scheifley, F. C. Brown and S. T. Pantelides</i>	396
4.25.	Reflexion Measurements on Li- and Na-Compounds near the Li K- and the Na L _{2,3} -Absorption Edge, respectively <i>N. Kosuch, G. Wiech and A. Faessler</i>	398

Other Insulators:

4.26.	The Optical Properties and Luminescence of IIA-VIB Compounds <i>V. Mikhailin, E. E. Koch and M. Skibowski</i>	401
4.27.	VUV Photoemission Study of Cation Core-Conduction-Band Excitation in BaF ₂ and CaF ₂ <i>J. Anderson and G. J. Lapeyre</i>	404
4.28.	VUV Absorption Bands of Trivalent Lanthanides in LaF ₃ <i>W. S. Heaps, L. R. Elias and W. M. Yen</i>	407
4.29.	Optical Properties of Rare Earth Trifluorides <i>C. G. Olson, M. Piacentini and D. W. Lynch</i>	411
4.30.	Optical Absorption and Photoemission Spectra of Rare Earth (La, Ce) Halides <i>S. Sato, Y. Sakisaka and T. Matsukawa</i>	414

5. Band States in Metals and Semiconductors

5.1.	A Survey of Photoemission Measurements Using Synchrotron Radiation in the $5 \lesssim \hbar\omega \lesssim 100$ eV Range <i>D. E. Eastman</i>	417
------	--	-----

Metals:

5.2.	High Resolution XUV Photoelectron Spectra of the Valence Band Region of Cu, Ag, and Au <i>R. Melander, L. Petersson, S.-E. Karlsson, S. B. M. Hagström and I. Lindau</i>	451
5.3.	Thermoreflectivity Spectrum of Au from 6 to 35 eV <i>M. Piacentini, C. G. Olson and D. W. Lynch</i>	453
5.4.	Optical Constants of Metals in the Vacuum UV Spectral Region Determined by Energy Loss Analysis of Fast Electrons Scattered Around the Forward Direction <i>C. Wehenkel and B. Gauthé</i>	455
5.5.	Soft X-Ray Electronic Transitions from Al 2p Level <i>A. Balzarotti, A. Bianconi, E. Burattini, M. Grandolfo, R. Habel, M. Piacentini and G. Strinati</i>	458
5.6.	Optical Properties of Solid Gallium in the Vacuum UV <i>K. Kojima and A. Ejiri</i>	461
5.7.	Optical Properties and Electronic Structure of Zn <i>J. C. Lemonnier, M. Priol and Mme. S. Robin</i>	465
5.8.	Optical Properties of bcc and hcp Transition Metals <i>D. W. Lynch, C. G. Olson and J. H. Weaver</i>	469

5.9.	Lineshape of the 3p Excitation in the Electron Energy Loss Spectrum of Nickel Metal <i>R. E. Dietz, E. G. McRae, Y. Yafet and C. W. Caldwell</i>	472
5.10.	Coherent Pseudopotential Theory for Interacting Bands <i>V. Srivastava and S. K. Joshi</i>	475

Noble and Transition Metal Compounds:

5.11.	Optical and Photoelectrical Studies of Transition Metal Halides <i>T. Ishii, Y. Sakisaka and T. Sagawa</i>	477
5.12.	The Application of Far UV Sources for Determining the Valence Band Structure of Solids <i>W. Braun, A. Goldman, J. Tejeda, N. J. Shevchik and M. Cardona</i>	480
5.13.	Thermal Shifts of Binding Energies in Some Rubidium and Silver Halides Studied by ESCA <i>L. I. Johansson, C. Martinson, P.-E. Nilsson-Jatko, S.-E. Karlsson and S. B. M. Hagström</i>	483
5.14.	High Resolution Photoemission Measurement of Valence Bands in Cuprous Halides <i>T. Sagawa, S. Kono, S. Suzuki, I. Nagakura, T. Ishii, R. Kato, S. Sato and M. Watanabe</i>	486

Semiconductors:

5.15.	Optical Studies of PbS, PbSe and PbTe <i>R. Pinchaux, P. Thiry, Y. Petroff and M. Balkanski</i>	489
5.16.	Photoemission of PbSe <i>H. H. Landfermann</i>	491
5.17.	Optical Properties of PbI ₂ , PbF ₂ , and CdF ₂ <i>J. H. Beaumont, J. Bordas and A. J. Bourdillon</i>	493
5.18.	Monochromatized X-Ray and Far-UV Photoemission Studies of II ₃ -V ₂ Semiconductors <i>S. G. Bishop, N. J. Shevchik and M. Cardona</i>	497
5.19.	Valence Band Photoemission Measurement of Europium Chalcogenides and Cadmium Sulfide by the Use of Synchrotron Radiation <i>T. Sagawa, S. Suzuki, S. Kono, I. Nagakura, T. Ishii, R. Kato, M. Watanabe and S. Sato</i>	499
5.20.	Optical Properties of Crystalline and Amorphous Arsenic <i>C. Raisin, G. Leveque, J. Robin and S. Robin-Kandare</i>	502
5.21.	Germanium M _{2,3} Emission and Photoelectric Yield Spectra of Polymorphs of Germanium Dioxide <i>Y. Iguchi</i>	506
5.22.	Ultraviolet Photoemission Studies of the Band Structures of Layer Materials <i>F. R. Shepherd and P. M. Williams</i>	508
5.23.	Optical Properties and Collective Excitations in Some Layer-Type Compounds in the 2 to 80 eV Range <i>R. Mamy, L. Martin, G. Leveque and C. Raisin</i>	511

5.24.	Electron Energy Losses in Some Layered Crystals <i>D. Gramari, J. Perrin, P. Soukiassian and J. Cazaux</i>	514
5.25.	The π - and σ -Band of Graphite as Determined from Anisotropic X-Ray C K-Emission <i>Chr. Beyreuther and G. Wiech</i>	517
5.26.	The Reflectivity Spectra of Anisotropic Crystals In ₂ Se, In ₂ Te and InTe in the Range from 1 to 12 eV <i>V. I. Donetskikh, E. F. Zagainov, S. G. Kroitoru, Z. D. Kovalijuk, A. D. Orgorodnik and V. V. Sobolev</i>	520
5.27.	Variation of Transition Energies in ZnS _x Se _{1-x} and ZnSe _x Te _{1-x} Mixed Crystals <i>G. H. Heckelmann and T. S. Wagner</i>	522
5.28.	Photoemission (UPS) Studies of VB ₂ VIB ₃ Layered Semiconductors and of VB Group Semimetals ($6 \text{ eV} < h\nu < 40 \text{ eV}$) <i>Z. Hurých</i>	525
5.29.	Optical Properties of ZnTe Thin Films in the Vacuum Ultraviolet <i>R. C. Linton and M. E. Crandell</i>	529

6. Photoemission and Surface Properties

6.1.	Theories of Photoemission and their Links with Experiment <i>N. W. Ashcroft</i>	533
6.2.	Recent Photoemission Studies of Surface and Bulk States for $\hbar\omega < 12 \text{ eV}$ <i>W. E. Spicer</i>	545
6.3.	Some Polarization Effects in Photoemission from a Cubic Crystal <i>B. Feuerbacher and B. Fitton</i>	557
6.4.	An Explanation of a Surface Sensitive Structure in the Photoelectron Yield from W(100) <i>K. Sturm and R. Feder</i>	559
6.5.	Photoemission from Copper: Its Dependence on Energy, Angle of Emission, and Surface Orientation <i>H. Becker, E. Dietz and U. Gerhardt</i>	561
6.6.	UV Photoemission Energy Distributions from Single Crystal Au as a Function of Electron Emission Angle <i>P. O. Nilsson and L. Iiver</i>	564
6.7.	Ultraviolet Photoemission Studies of the Electronic Structure of Clean Nickel and Chromium Surfaces <i>P. J. Page and P. M. Williams</i>	566
6.8.	Photoemission and Energy Loss Spectroscopy of Oxide Formation on Si and Ge Surfaces <i>J. E. Rowe</i>	569
6.9.	The Optical Properties and Auger Characteristics of Magnesium Single Crystals and Magnesium Oxide and Magnesium Nitride Surface Films <i>J. Carden, F. Ferrandino, J. Larsen, W. Wall and J. R. Stevenson</i>	572
6.10.	Scattering Effects in Photoemission <i>W. L. Schaich</i>	574
6.11.	Nonlocal Effects in Photoemission Studies with Nonnormally Incident Light <i>K. L. Kliewer</i>	575

6.12.	Determination of the Escape Depth of Photoelectrons in the Vacuum Ultraviolet <i>J. P. Goudonnet, G. Charbrier and P. J. Vernier</i>	577
6.13.	Electron Attenuation Lengths in Carbon Films <i>E. T. Arakawa, A. J. Braundmeier, M. W. Williams, R. N. Hamm and R. D. Birkhoff</i>	580
6.14.	High Energy Excited States in Solids Studied by Secondary-Electron-Emission Spectroscopy <i>R. F. Willis</i>	582
6.15.	UPS Measurements on Liquid Silver and Copper <i>G. P. Williams and C. Norris</i>	585
6.16.	Photoemission Experiments on Liquid Li and Al <i>H. Petersen and C. Kunz</i>	587
7. Electron Energy Loss and Momentum Spectroscopy		
7.1.	Recent Development in Electron Energy Loss Spectroscopy <i>H. Raether</i>	591
7.2.	Plasmons in Al <i>H. J. Höhberger, A. Otto and E. Petri</i>	607
7.3.	Non Vertical Interband and Intraband Transitions in Al <i>H. J. Höhberger, A. Otto and E. Petri</i>	610
7.4.	Inelastic Electron Scattering Measurements of Soft X-Ray Thresholds and Plasmons <i>P. C. Gibbons, S. E. Schnatterly and J. J. Ritsko</i>	614
7.5.	Extrinsic and Intrinsic Electron Energy Losses in Metal X-Ray Photo-Electron Spectra <i>J. C. Fuggle, L. M. Watson and D. J. Fabian</i>	616
7.6.	Mean Free Path for Plasmon and Inner Shell Excitations by Electrons in the Range from 60 to 1200 keV <i>J. Sevely, J. Ph. Perez, Y. Kihn and B. Jouffrey</i>	618
7.7.	Energy Loss Spectra and Optical Constants of Rare Earth Metals, Hydrides and Oxides between 5 and 200 eV <i>B. Brousseau, C. Collieux, J. Frandon, M. Gasgnier and P. Trebbia</i>	622
7.8.	Plasmon Effects in Electron Spectroscopy of Graphite <i>A. M. Bradshaw, L. S. Cederbaum, W. Domcke and U. Krause</i>	625
7.9.	Study of the Surface Plasmon in a Thin Copper Film by an Electron Energy Analyser with High Resolution <i>T. Takigawa and F. Fujimoto</i>	629
7.10.	Microscopic Mechanism of Coherent Surface Bremsstrahlung <i>M. S. Tomaš and M. Šunjić</i>	632
8. The Edge Shape in Simple Metals		
8.1.	Edge Singularities in X-Ray Spectra <i>G. D. Mahan</i>	635
8.2.	X-Ray Edges: Broadening Mechanisms, Selection Rules, Sum Rules, Compatibility Relationships, and Orthogonality Catastrophes <i>J. D. Dow</i>	649
8.3.	Auger Effect and Core Broadening in Low Z Atoms, Ions, and Metals <i>D. R. Franceschetti</i>	663

8.4.	The X-Ray Edge Singularities of Magnesium and Aluminum: Evidence for Compatibility Relationships <i>H. Neddermeyer</i>	665
------	--	-----

9. Instrumentation

9.1.	Holographic Structures for Applications in the Vacuum Ultraviolet and Soft X-Ray Region <i>G. Schmahl</i>	667
9.2.	Some Reflections on the Use of Conventional and Holographic Diffraction Gratings in the Vacuum Ultraviolet Spectral Region <i>W. R. Hunter</i>	683
9.3.	Design and Performance of Soft X-Ray Reflection Gratings Formed Holographically <i>R. J. Speer and D. Rudolph</i>	709
9.4.	Blazed Interference (Holographic)Diffraction Gratings for the Ultraviolet <i>M. C. Hutley</i>	713
9.5.	Resolution Comparison between a Conventional and a Holographic 150 mm Wide Concave Grating in a 3 m Vacuum-UV Eagle Mount Spectrometer <i>K. Grütmacher and B. Wende</i>	715
9.6.	A Unique Spectrometer for the Study of Reflection Grating Characteristics in the Vacuum Ultraviolet <i>J. J. Cowan</i>	717
9.7.	Recent Improvements in Sources and Detectors for the Vacuum Ultaviolet at C.N.R.S.-Bellevue <i>H. Damany, G. Mehlman and J. Romand</i>	720
9.8.	Aging Characteristics of the Spectral Radiance of VUV Radiometric Transfer Standards (Deuterium-Lamps) <i>D. Stuck and B. Wende</i>	722
9.9.	Absolute Photon Flux Measurements of Monochromatized Light in the Energy Range 20–160 eV <i>W. Gudat, C. Kunz and W. Lenth</i>	725
9.10.	Vacuum Ultraviolet Monochromator Developments at C.N.R.S.-Bellevue <i>M. Pouey</i>	728
9.11.	Simple Rotational Monochromators: New Focussing Properties with Asymmetrical Concave Gratings <i>M. Lavollée</i>	730
9.12.	Ray-Tracing in a Seya-Namioka Monochromator <i>A. Johannin-Gilles</i>	735
9.13.	An Asymmetric Spectro-Reflectometer for the Measurement of Optical Constants in the Extreme Ultraviolet <i>J. Cl. Buriez and M. Montel</i>	738
9.14.	Interferometry in the Vacuum Ultraviolet <i>G. H. C. Freeman</i>	742
9.15.	Recent Research in Ultraviolet Fabry-Perot Interferometry <i>R. Abjean, A. Mehú-Bideau, Y. Guern and A. Johannin-Gilles</i>	745
9.16.	Far UV-Filters <i>A. Malherbe and J. Guerain</i>	748

10. Synchrotron Radiation

10.1.	Perspectives of Synchrotron Radiation (Report on a Panel Discussion) <i>C. Kunz</i>	753
10.2.	Synchrotron Radiation and Some Applications <i>A. A. Sokolov and I. M. Ternov</i>	773
10.3.	SURF-II, A New Synchrotron Ultraviolet Radiation Facility at the NBS <i>R. P. Madden and D. L. Ederer</i>	774
10.4.	The Stanford Synchrotron Radiation Project (SSRP) <i>H. Winick</i>	776
10.5.	Design of the Ultraviolet Synchrotron Radiation Beam Line at SPEAR <i>V. Rehn, A. D. Baer, J. L. Stanford, D. S. Kyser and V. O. Jones</i>	780
10.6.	Low-Scatter Metal Mirrors for High-Intensity Synchrotron Radiation at SPEAR <i>J. L. Stanford, V. Rehn, D. S. Kyser, V. O. Jones and A. Klugman</i>	783
10.7.	An Ultrahigh Vacuum Monochromator for Synchrotron Radiation <i>F. C. Brown, R. Z. Bachrach, S. B. M. Hagström, N. Lien and C. H. Pruett</i>	785
10.8.	A New Two-Grating Grazing Incidence Spectro-Monochromator for Use with LURE Synchrotron Radiation <i>P. Jaeglé, P. Dhez and F. Wuilleumier</i>	788
10.9.	Simple Grazing Incidence Monochromator of Modified Rowland Mounting Type for Synchrotron Radiation <i>H. Sugawara and T. Sagawa</i>	790
10.10.	A System for Combined Photoemission and Reflection Measurements with Synchrotron Radiation at Liquid-He Temperatures <i>N. Schwentner, A. Harmsen, E. E. Koch, V. Saile and M. Skibowski</i>	792
10.11.	Time of Flight Angularly Resolved Photoelectron Energy Spectroscopy Using Synchrotron Radiation <i>R. Z. Bachrach, S. B. M. Hagström and F. C. Brown</i>	795
10.12.	Radiometry in the EUV Spectral Region: Standard Source and Detectors <i>E. B. Saloman, D. L. Ederer and R. P. Madden</i>	798
10.13.	Synchrotron Radiation in Soft X-Ray Emission Spectroscopy <i>A. Faessler</i>	801
10.14.	Multiple Bragg Reflection Monochromators for Synchrotron X-Radiation <i>J. H. Beaumont and M. Hart</i>	803
10.15.	X-Ray Photoemission Spectroscopy with Use of Synchrotron Radiation <i>I. Lindau, P. Pianetta, S. Doniach and W. E. Spicer</i>	805
10.16.	EXAFS-Measurements at SPEAR <i>P. Eisenberger, B. Kincaid, S. Hunter, D. Sayers, E. A. Stern and F. Lytle</i>	806

11. Applications in Biology

11.1.	Application of Synchrotron Radiation in Biology <i>K. C. Holmes</i>	809
11.2.	Optical Properties of Nucleic Acid and Protein in the Extreme Ultraviolet <i>T. Inagaki, R. N. Hamm, E. T. Arakawa and L. R. Painter</i>	823
11.3.	Optical Properties of Chloroplasts and Red Blood Cells in the Vacuum UV <i>M. W. Williams, E. T. Arakawa, R. D. Birkhoff, R. N. Hamm, H. C. Schweinler and R. A. McRae</i>	825
11.4.	Characteristic Energy Loss of Electrons in Biological Materials <i>M. Isaacson</i>	826
