

Contents

CHAPTER 1:

***History of Spectroscopy.* 1**

- 1.1. Early Ideas on Color 1
- 1.2. The Work of Newton 2
- 1.3. Early Nineteenth-Century Developments 3
- 1.4. Fraunhofer's Discoveries 4
- 1.5. Characteristic Spectra 6
- 1.6. Kirchhoff and Spectrum Analysis 8
- 1.7. Standard Wave Lengths 10
- 1.8. The Ultraviolet and the Infrared 12
- 1.9. Recent Developments 14

CHAPTER 2:

***Light Sources* 18**

- 2.1. Continuous Sources 18
- 2.2. Line Sources 20
- 2.3. Electric Arcs 21
- 2.4. The Electric Spark 23
- 2.5. Gaseous Discharges 26
- 2.6. The Choice of a Light Source 29

CHAPTER 3:

***Spectroscopic Apparatus—General Principles* 30**

- 3.1. General Theory: Definitions 30
- 3.2. Resolving Power 31
- 3.3. Brightness of Image 35
- 3.4. The Illumination of the Spectrograph Slit 37
- 3.5. The Use of a Condensing Lens 39
- 3.6. The Conditions for Maximum Illumination and Maximum Intrinsic Energy of a Spectrum 42
- 3.7. Illumination by a Point Source 43
- 3.8. Illumination by Sources of Finite Depth 45
- 3.9. Types of Slit Illumination 46
- 3.10. Photographic Speed of Spectrographs 48

CHAPTER 4:

***Prism Spectroscopes and Spectrographs: Theory and Construction.* . 50**

- 4.1. The Slit 50
- 4.2. The Collimator Lens 53

- 4.3. Prisms 58
- 4.4. Dispersion of a Prism 59
- 4.5. Resolving Power of a Prism 62
- 4.6. Curvature of Lines in Prismatic Spectra 64
- 4.7. Magnification by a Prism 65
- 4.8. Size of Prism Faces 66
- 4.9. Prism Materials 67
- 4.10. Prism Types and Systems 74
- 4.11. The Camera Lens 79
- 4.12. Resolving Power of Prism Spectrographs 85
- 4.13. The Use of Mirrors in Spectrographs 86

CHAPTER 5:

Prism Spectroscopes and Spectrographs: Types and Use. 89

- 5.1. Types of Prism Instruments 89
- 5.2. The Adjustment of Spectroscopic Instruments 100
- 5.3. The Testing of Spectroscopic Instruments 106
- 5.4. Influence of Slit Width and Mode of Illumination on Line Form and Intensity 111
- 5.5. Light Losses in Spectrographs 114
- 5.6. Stray Light in Spectrographs 121
- 5.7. The Effect of Temperature and Pressure on Prism Spectrographs 124

CHAPTER 6:

The Diffraction Grating: Theory and Production. 127

- 6.1. The Plane Grating 127
- 6.2. Dispersion of a Grating 129
- 6.3. Resolving Power of a Grating 130
- 6.4. The Concave Grating 132
- 6.5. The Astigmatism of the Concave Grating 134
- 6.6. The Wadsworth Arrangement of the Concave Grating 136
- 6.7. The Dispersion of Grating Spectrographs 138
- 6.8. The Production of Gratings 146
- 6.9. The Grating Blank 147
- 6.10. The Ruling of Gratings 149
- 6.11. Replica Gratings 150

CHAPTER 7:

The Diffraction Grating: Mountings and Use. 152

- 7.1. Concave Grating Mountings 152
- 7.2. The Paschen-Runge Mounting 152
- 7.3. The Rowland Mounting 155
- 7.4. The Abney Mounting 157
- 7.5. The Eagle Mounting 158
- 7.6. The Radius Mounting 161
- 7.7. The Wadsworth Mounting 164

- 7.8. The Adjustment of the Concave Grating 165
- 7.9. The Optics of Small Displacements of the Grating 165
- 7.10. The Optics of Small Displacements of the Slit 174
- 7.11. Applications of the Plane Grating 178
- 7.12. Ruling Errors and Ghosts 180
- 7.13. The Testing of Gratings 183
- 7.14. Cleaning and Care of Gratings 185
- 7.15. Sensitivity of Grating Spectrographs to Disturbances 185
- 7.16. Light Losses and Stray Light in Grating Spectrographs 189
- 7.17. Light Distribution in Grating Spectra 190
- 7.18. The Ebert Mounting of the Plane Grating 191

CHAPTER 8:

The Photographic Process 192

- 8.1. The Photographic Emulsion and the Latent Image 192
- 8.2. Properties of the Emulsion—The Characteristic Curve 193
- 8.3. Contrast 195
- 8.4. Emulsion-speed Rating Systems 196
- 8.5. Emulsion Latitude 199
- 8.6. Emulsion Graininess 200
- 8.7. Spectral Behavior of Emulsions 200
- 8.8. Resolving Power of Emulsions 202
- 8.9. The Reciprocity Law 203
- 8.10. The Processing of Photographic Emulsions 205
- 8.11. Available Photographic Emulsions 210

CHAPTER 9:

The Determination of Wave Length 215

- 9.1. Standards of Wave Length 215
- 9.2. Spectroscopic Charts and Tables 221
- 9.3. Comparators and Measuring Microscopes 229
- 9.4. Notes on the Use and Testing of Comparators 232
- 9.5. Reduction of Prism Spectrograms 236
- 9.6. The Hartmann Dispersion Formula 240
- 9.7. Wave-Number Determination 245
- 9.8. Reduction of Grating Spectrograms 246
- 9.9. Identification of Lines and Bands 250
- 9.10. Use of Digital Computers 253

CHAPTER 10:

The Determination of Spectral Intensity 254

- 10.1. Visual Photometric Methods 254
- 10.2. Objective Photometric Methods 257
- 10.3. Types of Microphotometers 259
- 10.4. Homochromatic Photometry 267
- 10.5. Methods of Recording Emulsion-Calibration Marks 267
- 10.6. The Determination and Use of Characteristic Curves 273
- 10.7. Heterochromatic Photometry 276
- 10.8. Notes on Photographic-Microphotometric Practice 277
- 10.9. Errors in Photographic Photometry 285

CHAPTER 11:

Apparatus and Methods of Infrared Spectroscopy 288

- 11.1. Infrared Methods 288
- 11.2. Prism Spectrometers 289
- 11.3. Grating Spectrometers 291
- 11.4. Spectrometer Adjustment and Calibration 293
- 11.5. Infrared Detectors 294
- 11.6. Elimination of Extraneous Radiation 296
- 11.7. Infrared Recorders 297
- 11.8. Applications of Infrared Spectroscopy 301

CHAPTER 12:

The Spectroscopy of the Vacuum Ultraviolet. 306

- 12.1. The Work of Victor Schumann 306
- 12.2. Lyman and the Vacuum Grating Spectrograph 308
- 12.3. The Grating at Grazing Incidence 310
- 12.4. Gratings and Technique for the Ultraviolet 314
- 12.5. Ultraviolet Light Sources 315
- 12.6. Applications of Ultraviolet Spectroscopy 316

CHAPTER 13:

Spectrochemical Analysis 318

- 13.1. Qualitative Spectrochemical Analysis 318
- 13.2. Trace Detection 322
- 13.3. Quantitative Spectrochemical Analysis 324
- 13.4. The Internal-Standard Principle 326
- 13.5. Choice of Light Sources 328
- 13.6. Sample Form and Standard Samples 333
- 13.7. Selection of Spectrograph 335
- 13.8. Photographic Emulsion Requirements 335
- 13.9. Photometric Procedure 336
- 13.10. Magnitude of Errors 338
- 13.11. Speed of Analysis 339
- 13.12. Direct-Reading Spectrochemical Methods 340
