

Contents

1	Introduction	1
1.1	Preliminary—purpose and scope of book	1
1.1.1	The ICP as a spectroscopic source	1
1.1.2	Applications of the ICP	3
1.1.3	Simplicity of the ICP technique	3
1.1.4	The literature of ICP–AES	4
1.2	Historic development of ICP spectrometry	5
1.3	Background to quantitative ICP analysis	7
1.3.1	Sample introduction (nebulization)	8
1.3.2	Sample excitation system	9
1.3.3	Analysis and quantification of emission spectrum	12
1.4	Range of determinable elements in geological materials	14
2	Analytical characteristics	16
2.1	Introduction	16
2.2	Simultaneous analysis	19
2.2.1	Compromise operating conditions	19
2.3	Sequential analysis ICP system	23
2.4	Detection limits	24
2.5	Calibration range of ICP–AES	25
2.6	Interferences	26
2.6.1	Spectral overlaps	27
2.6.2	Stray light interference	29
2.6.3	Matrix effect	30
2.7	Precision and accuracy	32
2.7.1	Chemometric improvements to data quality	34
2.8	Experimental considerations	37
2.8.1	Solution volumes and sample weights	37
2.8.2	Number of elements determined in liquid samples	38
2.8.3	Number of elements determined in solid samples	39
2.9	The injection of organic liquids into an ICP	40
3	Instrumentation for ICP–AES	43
3.1	Introduction	43
3.2	Spectrometers	45
3.2.1	General requirements	45
3.2.2	Simultaneous spectrometers	47
3.2.3	Sequential spectrometers	55
3.2.4	Combined simultaneous/sequential spectrometers	59
3.3	Plasma torches	59
3.3.1	Nomenclature	59
3.3.2	The Greenfield torch	60
3.3.3	The Fassel torch	60
3.3.4	The Minitorch™	64
3.3.5	Torch maintenance	65
3.4	Nebulizer systems	66
3.4.1	Introduction	66
3.4.2	Concentric pneumatic nebulizers	66

3.4.3	Cross-flow nebulizers	72
3.4.4	Babington-type nebulizers	74
3.4.5	Frit-type nebulizers	75
3.4.6	Ultrasonic nebulizers	76
3.4.7	Direct nebulization	77
3.4.8	Spray chambers	77
3.5	Radiofrequency generators and source	80
3.6	Electronics, computers and software	81
3.6.1	Software requirements	82
3.6.2	Trends	83
3.7	Fourier transform spectrometers	83
3.8	ICP-atomic fluorescence spectrometry	85
3.9	Direct current plasmas (DCP)	86
3.10	Microwave plasmas (MIP)	88
3.11	Choice of an ICP system	88
3.11.1	ICP-AES in relation to AAS	88
3.11.2	ICP-AES and X-ray fluorescence	89
3.11.3	ICP-AES and DCP emission spectrometry	90
3.11.4	ICP-AES and ICP-mass spectrometry	90
3.11.5	ICP-AES and other excitation methods	91
3.11.6	Evaluation of an ICP-AES system	92
4	Silicate rock analysis	93
4.1	Dissolution methods for silicates	93
4.1.1	Introduction	93
4.1.2	Fusion dissolution methods	93
4.1.3	Hydrofluoric acid dissolution methods—open evaporation	95
4.1.4	Hydrofluoric acid dissolution methods—closed digestion	96
4.2	Instrument calibration	99
4.3	Major element determinations	100
4.4	Trace element analysis	105
4.5	Rare earth element determinations	120
4.5.1	Introduction	120
4.5.2	Dissolution procedure	122
4.5.3	REE separation	124
4.5.4	REE spectral lines	125
4.5.5	Evaluation of results	127
5	Multielement applications of ICPS in applied geochemistry	130
5.1	The nature and evolution of applied geochemistry	130
5.1.1	Introduction	130
5.2	General aspects of applied geochemical analysis	131
5.2.1	Analytical requirements in applied geochemistry	131
5.2.2	Analytical quality control procedures	133
5.3	ICP instrumentation in relation to the requirements of applied geochemistry	137
5.3.1	Introduction	137
5.3.2	Translational interference effects	138
5.3.3	Rotational interference effects	141
5.3.4	Other instrumental constraints in multielement analysis	145
5.4	Decomposition procedures in applied geochemical analysis	147
5.4.1	Introduction	147
5.4.2	General aspects of large-batch analysis	150
5.4.3	Decomposition with nitric acid and perchloric acid	155
5.4.4	Decomposition with hydrofluoric acid, nitric acid and perchloric acid (test tube version)	156

6 Gas phase sample injection	161
6.1 The development of gas phase injection methods	161
6.2 Methodology of the hydride injection system	164
6.2.1 Equipment	164
6.2.2 Operating conditions	166
6.2.3 Performance of the hydride generation/ICP system	167
6.2.4 Interference effects and their avoidance	170
6.2.5 Arsenic speciation methods	173
6.3 Applications of the hydride injection system	173
6.3.1 General introduction	173
6.3.2 Traces of arsenic, antimony and bismuth in soils and sediments	174
6.3.3 Traces of arsenic, antimony and bismuth in plant materials	176
6.3.4 Trace concentrations of selenium in soils and sediments	177
6.3.5 The determination of trace concentrations of arsenic, antimony, bismuth, selenium and tellurium in waters	178
6.3.6 The determination of tin in rock, soils and sediments	180
7 Injection methods for solid samples	183
7.1 Introduction to solid sample injection methods	183
7.2 Sample injection following electrothermal vaporization	184
7.3 Direct sample injection from a graphite rod	187
7.4 Discrete sample injection by means of laser ablation	188
7.4.1 General introduction	188
7.4.2 The Lasertrace system	190
7.4.3 The LMA10 laser-ICP microprobe system	191
7.5 Nebulization of slurries	199
8 Water analysis by ICP–AES	201
8.1 Introduction	201
8.2 General aspects of water analysis	203
8.2.1 Sampling	203
8.2.2 Filtration	203
8.2.3 Storage	204
8.2.4 Stabilization	204
8.2.5 Avoidance of contamination	204
8.3 Direct water analysis by ICP–AES	205
8.3.1 Pneumatic nebulizers	205
8.3.2 Alternative nebulizers	207
8.3.3 Gas phase injection	208
8.3.4 Electrothermal vaporization and other discrete methods	208
8.4 Water analysis with preconcentration	209
8.4.1 Evaporation methods	209
8.4.2 Mixed-bed ion exchange method	210
8.4.3 Selective ion exchange methods	210
8.4.4 Solvent extraction methods	210
8.4.5 A chelation—solvent extraction procedure	211
8.4.6 Coprecipitation methods	213
9 The analysis of environmental materials by ICP–AES	215
9.1 Introduction	215
9.2 Air analysis	216
9.2.1 Volatile contaminants	216
9.2.2 Particle contaminants	217
9.3 Sewage sludge	219

9.4	Domestic dust, road dust and industrial dust	220
9.4.1	Domestic dusts	220
9.4.2	Road dusts	220
9.4.3	Industrial dusts	223
9.5	Domestic and industrial refuse	223
9.6	The analysis of animal and plant tissues	224
9.6.1	General introduction	224
9.6.2	Sample decomposition of biological materials	227
9.6.3	Destruction of organic matter in plant and animal tissue with perchloric acid–nitric acid mixtures	230
10	The analysis of archaeological materials by ICP-AES	232
10.1	Introduction	232
10.2	Archaeological materials	233
10.2.1	Analysis of flints	233
10.2.2	Pottery and clay analysis	235
10.2.3	Analysis of bricks, tiles, glazes, etc.	236
10.2.4	Analysis of metals	236
10.2.5	Analysis of slags and ores	237
11	Inductively coupled plasma mass spectrometry	238
11.1	Instrumentation	238
11.2	Optimization	242
11.3	Interferences	243
11.3.1	Spectral interferences	243
11.3.2	Non-spectral interferences	246
11.4	Calibration strategies	247
11.4.1	External	248
11.4.2	Isotope dilution	249
11.4.3	Standard additions	251
11.5	Applications of ICP–MS with sample introduction by nebulization	251
11.5.1	Elemental analysis of solubilized geological samples	252
11.5.2	Isotope ratio measurements	257
11.5.3	Analysis of waters	260
11.6	Other modes of sample introduction	262
11.6.1	Electrothermal vaporization (ETV)	262
11.6.2	Direct sample insertion device (DSID)	265
11.6.3	Laser ablation of solids	265
11.6.4	Arc nebulization (solid sampling)	267
11.6.5	Slurry nebulization (solid sampling)	267
11.7	Future directions	268
12	Analysis of metals by ICP-AES	270
12.1	Introduction	271
12.1.1	Instrument calibration	272
12.1.2	Internal standards	272
12.1.3	Sample preparation and dissolution	273
12.2	Analysis of iron and steel	274
12.2.1	Spectral lines	274
12.2.2	Sample dissolution	274
12.3	Analysis of other metals	276
12.3.1	Virgin aluminium program	277
12.3.2	Titanium–boron–aluminium program	278
12.3.3	Zirconium–aluminium program	279
12.3.4	Chromium program	280
12.3.5	Chrome carbon program	281

	CONTENTS	xi
12.3.6	Nickel-cobalt alloy program	281
12.3.7	Ferro-boron program	281
12.3.8	Nickel-boron program	283
12.3.9	Copper base program	283
12.3.10	Stellite program	284
12.3.11	Manganese tablet program	285
12.3.12	Ferro-aluminium program	285
Appendix 1	Safety	287
Appendix 2	Manufacturers of ICP systems and accessories	291
