

# CONTENTS

**Preface/vii**

## **1. Introduction/1**

- 1.1 Historical Perspective/1
- 1.2 Semiconductor Materials/5
- 1.3 Operating Principles/9
  - 1.3.1 p-n Junction/9*
  - 1.3.2 Dielectric Waveguide/12*
  - 1.3.3 Recombination Mechanisms/13*
  - 1.3.4 Laser Threshold/14*
- 1.4 Optical Fiber Communications/15
- 1.5 Overview/18
  - References/20*

## **2. Basic Concepts/23**

- 2.1 Introduction/23
- 2.2 Maxwell's Equations/24
- 2.3 Threshold Condition and Longitudinal Modes/28
- 2.4 Gain and Stimulated Emission/33
- 2.5 Waveguide Modes/37
  - 2.5.1 Effective Index Approximation/39*
  - 2.5.2 Transverse Modes/41*
  - 2.5.3 Lateral Modes/47*
- 2.6 Emission Characteristics/53
  - 2.6.1 Light-Current Characteristics/53*
  - 2.6.2 Spatial-Mode Characteristics/60*
  - 2.6.3 Spectral Characteristics/64*
  - 2.6.4 Dynamic Characteristics/66*
  - References/67*

## **3. Recombination Mechanisms in Semiconductors/70**

- 3.1 Introduction/70
- 3.2 Radiative Recombination/71
  - 3.2.1 Absorption and Emission Rates for Discrete Levels/74*

**x LONG-WAVELENGTH SEMICONDUCTOR LASERS**

- 3.2.2 *Absorption and Emission Rates in Semiconductors/77*
- 3.2.3 *Absorption Coefficient and Optical Gain/84*
- 3.3 Nonradiative Recombination/94
  - 3.3.1 *Band-to-Band Auger Processes/95*
  - 3.3.2 *Phonon-Assisted Auger Processes/108*
  - 3.3.3 *Defect and Surface Recombination/113*
- 3.4 Experimental Results/116
- 3.5 Threshold Current Density/122
  - 3.5.1 *Carrier Leakage over the Heterojunctions/123*
- 3.6 Temperature Dependence of Threshold Current/128
  - 3.6.1 *Carrier-Lifetime Measurements/130*
  - 3.6.2 *Optical Gain Measurements/132*
  - 3.6.3 *External Differential Quantum Efficiency/132*
  - 3.6.4 *Discussion/135*
- References/138*

**4. Epitaxy and Material Parameters of InGaAsP/142**

- 4.1 Introduction/142
- 4.2 Liquid-Phase Epitaxy/143
  - 4.2.1 *LPE Apparatus/143*
  - 4.2.2 *Growth Methods/145*
  - 4.2.3 *LPE of InGaAsP/147*
- 4.3 Vapor-Phase Epitaxy/151
- 4.4 Metal-Organic Vapor-Phase Epitaxy/153
- 4.5 Molecular-Beam Epitaxy/154
- 4.6 Lattice-Mismatch Effects/157
- 4.7 Material Parameters/160
  - 4.7.1 *Band-Structure Parameters/161*
  - 4.7.2 *Mobility/165*
  - 4.7.3 *Refractive Index/166*
- References/169*

**5. Laser Structures and Their Performance/172**

- 5.1 Introduction/172
- 5.2 Broad-Area Lasers/173
- 5.3 Gain-Guided Lasers/177
- 5.4 Weakly Index Guided Lasers/188
- 5.5 Strongly Index Guided Lasers/193
- 5.6 Leakage Current/205
- 5.7 Laser Arrays/211
- 5.8 Surface-Emitting Lasers/214
- References/216*

- 6. Rate Equations and Operating Characteristics/220**
  - 6.1 Introduction/220
  - 6.2 Rate Equations/221
  - 6.3 Steady-State Characteristics/227
    - 6.3.1 *Light-Current Curve/228*
    - 6.3.2 *Longitudinal-Mode Spectrum/231*
  - 6.4 Transient Response/239
    - 6.4.1 *Dynamic Longitudinal-Mode Spectrum/239*
    - 6.4.2 *Turn-On Delay/240*
    - 6.4.3 *Relaxation Oscillations/244*
  - 6.5 Noise Characteristics/247
    - 6.5.1 *Langevin Formulation/247*
    - 6.5.2 *Intensity Noise/250*
    - 6.5.3 *Phase Noise and Line Width/253*
  - 6.6 Modulation Response/256
    - 6.6.1 *Small-Signal Analysis/257*
    - 6.6.2 *Intensity Modulation/259*
    - 6.6.3 *Frequency Chirping/263*
    - 6.6.4 *Large-Signal Modulation/269*
  - 6.7 External Optical Feedback/271
    - 6.7.1 *Modified Rate Equations/271*
    - 6.7.2 *Steady-State Behavior/274*
    - 6.7.3 *Dynamic Behavior/277*
    - 6.7.4 *Noise Characteristics/280*
    - References/282*
  
- 7. Distributed-Feedback Semiconductor Lasers/287**
  - 7.1 Introduction/287
  - 7.2 DFB Laser Structures/289
  - 7.3 Theory/292
    - 7.3.1 *Coupled-Wave Equations/292*
    - 7.3.2 *Longitudinal Modes and Threshold Gain/297*
    - 7.3.3 *Coupling Coefficient/304*
    - 7.3.4 *Threshold Behavior/308*
    - 7.3.5 *Light-Current Characteristics/312*
  - 7.4 Performance/313
    - 7.4.1 *CW Operation/314*
    - 7.4.2 *Modulation Performance/318*
  - 7.5 DBR Lasers/321
  - 7.6 Transmission Experiments/326
  - 7.7 Concluding Remarks/329
    - References/329*

**8. Coupled-Cavity Semiconductor Lasers/333**

- 8.1 Introduction/333
- 8.2 Coupled-Cavity Schemes/335
- 8.3 Theory/338
  - 8.3.1 *Coupling Constant/339*
  - 8.3.2 *Longitudinal Modes and Threshold Gain/342*
  - 8.3.3 *Side-Mode Suppression/346*
  - 8.3.4 *Modulation Response/347*
- 8.4 Operating Characteristics/350
  - 8.4.1 *Longitudinal-Mode Control/351*
  - 8.4.2 *Optimum Biasing for Direct Modulation/354*
  - 8.4.3 *Frequency Chirp/356*
  - 8.4.4 *Transmission Experiments/358*
  - 8.4.5 *External-Cavity Semiconductor Lasers/361*
- 8.5 Diverse Applications/363
  - References/369*

**9. Quantum-Well Semiconductor Lasers/372**

- 9.1 Energy Levels/372
- 9.2 Density of States/376
- 9.3 Experimental Observation of Confined States/378
- 9.4 Radiative Recombination/380
- 9.5 Auger Recombination/389
- 9.6 Single-Quantum-Well and Multiquantum-Well Lasers/396
- 9.7 Experimental Results/401
- 9.8 Modulation and Noise Characteristics/407
  - References/408*

**10. Degradation and Reliability/410**

- 10.1 Introduction/410
- 10.2 Defect Formation in the Active Region/411
  - 10.2.1 *Experimental Techniques/412*
  - 10.2.2 *Electroluminescence/412*
  - 10.2.3 *Photoluminescence/414*
  - 10.2.4 *Cathodoluminescence/416*
  - 10.2.5 *Dark Defects under Accelerated Aging/418*
- 10.3 Catastrophic Degradation/420
- 10.4 Degradation of Current Confining Junctions/422
- 10.5 Reliability Assurance/423
  - 10.5.1 *Stress Aging/424*
  - 10.5.2 *Activation Energy/425*
  - References/430*

<b>11. Lead-Salt Semiconductor Lasers/432</b>
11.1 Introduction/432
11.2 Materials and Physical Properties/432
11.3 Band Structure/435
11.4 Optical Gain/439
11.5 Auger Recombination/442
11.6 Laser Diode Fabrication/447
11.7 Laser Properties/448
11.8 Tuning Characteristics/454
11.9 Other Material Systems/458
<i>References/458</i>
<b>Epilogue/461</b>
<b>Index/465</b>
