

Contents

1. Introduction	1
1.1 Experimental Aspects	2
1.2 Outline	4
2. Absorption of Laser Light	6
2.1 Fundamental Optical Properties	7
2.1.1 Plane-Wave Propagation	7
2.1.2 Macroscopic Material Properties	10
2.1.3 Nonmetals	11
2.1.4 Metals	15
2.2 Modified Optical Properties	18
2.2.1 Self-Focusing	19
2.2.2 Free-Carrier Effects	24
2.2.3 Semiconductors	25
2.2.4 Insulators	34
2.2.5 Reflection by Hot Metals	39
2.3 Phase Transitions and Shape Effects	41
2.3.1 Surface Corrugation	41
2.3.2 Hole Drilling	45
2.3.3 Evaporation and Plasma Effects	46
3. Heating by Laser Light	49
3.1 Temperature Distributions	50
3.1.1 Thermalization and Heat Transport	50
3.1.2 Solution of the Heat-Flow Equation	53
3.1.3 Cooling	57
3.1.4 Moving Sources	58
3.1.5 Variable Parameters	59
3.1.6 Impact of Absorption Phenomena on Temperature	62
3.2 Heat Treatment Processes	65
3.2.1 Annealing with Laser Beams	65
3.2.2 Thermal Stress	69
3.2.3 Crystallization of Amorphous Semiconductor Layers	71
3.2.4 Compound Synthesis	76
3.2.5 Transformation Hardening	80
4. Melting and Solidification	83
4.1 Fundamentals	85
4.1.1 Regimes of Laser Remelting	85

4.1.2 Heat Flow and Latent Heat	88
4.1.3 Thermodynamics	95
4.1.4 Interface Kinetics	99
4.1.5 Nucleation	102
4.2 Regrowth of Ion-Implanted Substrates	105
4.2.1 Semiconductor Substrates	105
4.2.2 Segregation and Trapping	110
4.2.3 Metallic Substrates	116
4.3 Surface Alloying	120
4.3.1 Semiconductor Substrates	120
4.3.2 Constitutional Supercooling	122
4.3.3 Metallic Substrates	130
4.4 Melt Quenching	135
4.4.1 Glass Formation	136
4.4.2 Silicon-Based Systems	143
4.4.3 Metal-Based Systems	144
5. Evaporation and Plasma Formation	146
5.1 Fundamentals	147
5.1.1 Thermodynamics and Kinetics of Evaporation ..	147
5.1.2 Hydrodynamics	154
5.1.3 Ionization of the Vapor	155
5.1.4 Gas Breakdown	157
5.2 Evaporation at Moderate Irradiance	158
5.2.1 Beam Heating and Evaporation	159
5.2.2 Vapor Expansion and Recoil	163
5.2.3 Drilling, Welding, Cutting	166
Hole Drilling	167
Penetration Welding	171
Cutting	173
5.3 Absorption Waves	174
5.3.1 Laser-Supported Combustion Waves	175
5.3.2 Plasma-Enhanced Coupling	181
5.3.3 Laser-Supported Detonation Waves	185
5.3.4 Effects of LSDWs on the Beam-Material Interac- tion	188
5.4 Phenomena at Very High Irradiance	191
5.4.1 The Self-Regulating Plasma	193
5.4.2 Laser-Driven Deflagration Wave	197
5.4.3 Inertial Confinement	198
5.4.4 Absorption at the Cutoff Density	200
A. Appendix	201
A.1 Selected Material Data	201
A.2 Green's Functions for Solving the Heat-Flow Equation	206
A.3 Numerical Solution of the Heat-Flow Equation	209
A.4 Units and Symbols	211
A.4.1 Constants	211
A.4.2 Variables	211
A.4.3 Subscripts	214
References	215
Subject Index	231
