	Preface	ix
	Acknowledgments	xi
CHAPTER I	INTRODUCTION	1
CHAPTER II	ELEMENTARY PHYSICS	5
	2.1 Energy Levels and Population Inversion	5
	2.2 Why Does a Population Inversion Make a Laser Work?	8
	2.3 Definition and Calculation of Small-Signal Gain	9
CHAPTER III	THERMODYNAMICS AND VIBRATIONAL KINETICS OF THE CO₂-N₂-H₂O OR He GASDYNAMIC LASER	15
	3.1 Molecular Properties of CO ₂ and N ₂	15
	3.2 Vibrational Energy and Population Distribution	17
	3.3 Vibrational Kinetics	20
	3.4 Vibrational Rate Equations	21
CHAPTER IV	CALCULATION OF GASDYNAMIC LASER PERFORMANCE	34
	4.1 Analysis of the Flow Field	35
	4.2 Vibrational Model	39
	4.3 Results	44
		v

	4.4 Comparison with Basov	47
	4.5 Coupled and Uncoupled Flows	48
	4.6 Recapitulation	52
	4.7 Power Extraction	53
CHAPTER V	COMPARISON BETWEEN THEORY AND EXPERIMENT	62
	5.1 Kinetic Rate Data	62
	5.2 Nonequilibrium Gasdynamics	63
	5.3 Small-Signal Gain	63
	5.4 NOL 3-MW Arc Tunnel	64
	5.5 NOL 12.7-cm Shock Tunnel	68
	5.6 Arc Tunnel Experiments	72
	5.7 Shock Tunnel Experiments	76
	5.8 Other Experiments	77
CHAPTER VI	INVERSIONS BEHIND NORMAL SHOCK WAVES	83
CHAPTER VII	CO₂-N₂ GASDYNAMIC LASERS: STATE-OF-THE-ART	88
	7.1 Introduction	88
	7.2 Increased H ₂ O Content	89
	7.3 Increased Temperature	94
	7.4 Binary Scaling	97
	7.5 Fuels for Gasdynamic Lasers	101
CHAPTER VIII	THE CARBON MONOXIDE GASDYNAMIC LASER	112
	8.1 Introduction	112
	8.2 The Physical Process	113
	8.3 Results	120
	8.4 Disadvantage	123
CHAPTER IX	DOWNSTREAM MIXING GASDYNAMIC LASERS	125
	9.1 Introduction	125
	9.2 Problems	128
	9.3 Results	129
CHAPTER X	OPTICAL CAVITY CONSIDERATIONS FOR GASDYNAMIC LASERS	133
	10.1 Introduction	133
	10.2 Cavity Types	134
	10.3 Causes of Beam Distortion in Gasdynamic Lasers	139

CHAPTER XI	AERODYNAMIC WINDOWS	145
	11.1 Introduction	145
	11.2 Concepts	146
	11.3 Results	148
	11.4 Summary	152
 CHAPTER XII	 DIFFUSERS	 153
	12.1 Introduction	153
	12.2 Purpose of the Diffuser	154
	12.3 Diffuser Flow Field	155
	12.4 Normal Shock Recovery	156
	12.5 Area Ratio	158
	12.6 Drop-Out Pressure	159
	12.7 Summary	161
 APPENDIX A	 EFFECT OF UNCERTAINTIES IN THE KINETIC RATES	 162
 APPENDIX B	 VIBRATIONAL RELAXATION TIMES FOR THE CO₂-N₂-H₂O OR He SYSTEM	 170
 APPENDIX C	 THE TEARE EFFECT	 171
	References	173
	Index	177
