

## CONTENTS

### COHERENCE PHENOMENA

Laser Pulse Shaping for State-Selective Excitation. . . . .	1
W.S. Warren, M. Haner	
Quantitative Measurement of the Role of Phase Fluctuations in Nonlinear Optical Absorption Processes . . . . .	11
S.J. Smith, D.S. Elliott	
Multiphoton Atomic and Molecular Coherent Excitations with Ultrashort Pulse Sequences . . . . .	21
J.C. Diels	
Temporal Coherence in One-Photon Excitation of a Molecular Quasicontinuum . . . . .	33
I. Schek, J. Jortner	
Interferometry in the Nonlinear Spectroscopy of Gases . . . . .	39
P.M. Felker, G.V. Hartland, L.L. Connell, T.C. Corcoran and B.F. Henson	
Effects of Excited State Absorption on Optical Pulse Propagation . . . . .	49
Y.B. Band	
Propagation of Ultrashort Laser Pulses in an N-Level Medium . . . . .	57
S. Chelkowski, A.D. Bandrauk	
High Spectral Brightness Dye Lasers . . . . .	67
O.L. Bourne	
Light-Induced Collisional Energy Transfer Revisited . . . . .	75
P.R. Berman	
Theory of Laser-Pulse-Induced Molecular Dynamics: Gas-Phase Molecular Collisions and Adbond Dynamics . . . . .	87
H.W. Lee, S. Van Smaalen, T.F. George	
Rydberg States in Laser Fields . . . . .	97
G. Alber, P. Zoller	
Wave Packets in Vibrational Motion of Sodium Dimer . . . . .	107
C. Radzewicz, M.G. Raymer	

Fast Fourier Transform Techniques in Numerical Simulations of Intense Pulse-Molecule Interactions . . . . .	113
P.L. DeVries	
Interference in Two-Photon Absorption at High-Field Crossings . . . . .	119
G.J. Diebold, R.B. Stewart	
Time-Resolved Electronic Raman Scattering of the Nanosecond Time Scale . . . . .	125
J.A. Koningstein	
Density Measurements of Hg $^2P_{0,1,2}$ Excited States in a Discharge Using Saturated Laser Absorption . . . . .	129
L. Bigio	
HIGH INTENSITY MULTIPHOTON PROCESSES	
Above Threshold Ionization in Strong Fields and Classical Behavior of Electrons in Short Light Pulses . . . . .	135
P. Agostini, G. Petite	
Above-Threshold Ionization and the Quantum Mechanics of Wiggling Electrons . . . . .	145
P.H. Bucksbaum	
Ultrashort Pulse Multiphoton Ionization of Xenon at moderate Pressures . . . . .	157
P.B. Corkum, C. Rolland	
Discussion of Limiting Deposition Power Densities in Laser Target Materials . . . . .	165
A. McPherson, K. Boyer, H. Jara, T.S. Luk, I.A. McIntyre, R. Rosman, J.C. Solem, C.K. Rhodes	
Above Threshold Ionization in Xe with a CO <sub>2</sub> Laser . . . . .	173
F. Yergeau, W. Xiong, S.L. Chin, P. Lavigne	
Multiphoton Multielectron Excitation and Ionization of H <sub>2</sub> . . .	177
M.H. Nayfeh, J. Mazumder, D. Humm, T. Sherlock, K. Ng	
Resonance Ionization Processes in Small Molecules . . . . .	187
P.M. Johnson	
Third Harmonic Generation and Multiphoton Ionization Spectroscopy . . . . .	195
C. Fotakis, J.A.D. Stockdale, M.J. Proctor	
Experimental Investigation of Multiphoton Free-Free Transitions . . . . .	201
A. Weingartshofer, B. Wallbank	
Theory of Multiphoton Ionization . . . . .	207
A. Szűke	
Electron Energy Spectrum after Multiphoton Ionization . . . . .	219
M. Crance	
All-Order Above Threshold Ionization and Related Problems . . . . .	227
Y. Gontier, M. Trahin	

Numerical Simulations of Multiphoton Processes in Many Electron Atoms . . . . .	235
K.C. Kulander, C. Cerjan	
Numerical ATI Wave Functions and their Implications . . . . .	243
J. Javanaien, Q.C. Su, J.H. Eberly	
Ionization of One-Dimensional Hydrogen Atoms with Intense Microwave and Laser Pulses . . . . .	253
R.V. Jensen, S.M. Susskind	
Above Threshold Photodissociation with Intense IR Lasers - A Coupled Equations Study . . . . .	263
A.D. Bandrauk, N. G�elinas	
Laser Energy Absorption due to Local Plasmon Excitation in Complex Atoms . . . . .	273
F.H.M. Faisal	
Atomic Hydrogen in Intense, High-Frequency Laser Fields . . . . .	285
M. Gavrilu, M. Pont	
A Contribution Towards the Theory of Multichannel Multi- photon Ionization of Atoms . . . . .	297
R. Burlon, C. Leone, G. Ferrante	
H <sub>2</sub> <sup>+</sup> in Intense Fields - A Coupled Equations Study . . . . .	309
O. Atabek, X. He	
Intense-Field Radiative Processes in the Coulomb Continuum . . . . .	317
A. Maquet, V. V�enard	
Adiabatic Separability of Dressed Molecular Systems . . . . .	323
T.T. Nguyen-Dang	
LASER CHEMISTRY	
The Interaction of Intense Picosecond Infrared Pulses with Isolated Molecules . . . . .	329
E. Mazur	
Intramolecular Vibrational Relaxation and the Dynamics of the High-Power Two-Photon Excitation of NO <sub>2</sub> . . . . .	337
L. Bigio, E.R. Grant	
Coherent Excitation of Polyatomic Molecules by Ultrashort Laser Pulses - A Model Calculation . . . . .	347
H.S. Kowk, P. Mukherjee	
Picosecond Dynamics of Intramolecular Vibrational Redis- tribution in Jet-Cooled Molecules . . . . .	353
G.W. Leach, D.R. Demmer, J.W. Hager, G.A. Bickel, S.C. Wallace	
Subpicosecond UV/IR Absorption Spectroscopy . . . . .	359
J.H. Glowonia, J. Misewich, P.P. Sorokin	
Vibrational Predissociation Dynamics of the Nitric Oxide Dimer . . . . .	367
M.P. Casassa, J.C. Stephenson, D.S. King	

Multiphoton Absorption Fragmentation Mechanism of CH <sub>3</sub> I by Picosecond and Nanosecond Laser Mass Spectrometry . . . .	371
D.M. Szaflarski, M.A. El-Sayed	
Laser Catalysis and Control of Chemical Reactions . . . . .	377
M. Shapiro	
Making Molecules Dance: Optimal Control of Molecular Motion . . . . .	389
H. Rabitz	
Quantum Dynamics of Short Pulse Vibrational Overtone Spectroscopy and Photochemistry . . . . .	397
J.S. Hutchinson, K.T. Marshall	
IR Laser Excitation in Molecules: Chaos and Diffusive Energy Growth . . . . .	407
J.R. Ackerhalt, P.W. Milonni	
Rotational Coherences in the IR Excitation of Molecular Rotations at High Intensities . . . . .	417
A.D. Bandrauk, L. Claveau	
Chaotic Dynamics, Polyatomic Molecules, Multiphoton Dissociation and All That . . . . .	431
A. Ferretti, N.K. Rahman	
Theoretical Study on the Possibility of Local Mode (LM) Excitation in Polyatomics by Frequency-Modulated (FM) Pulse Lasers . . . . .	441
B.M. Xie, J.Q. Ding	
Multiphoton Excitation of Bond Modes . . . . .	447
M.L. Sage	
Temporal and Steady State Transition Probabilities for Molecules Interacting with Oscillating and Static Electric Fields and Surfaces . . . . .	453
W.J. Meath, R.A. Thuraisingham	
Some Theoretical Aspects of Infrared Molecular Lasers Pumped by Electronic-to-Vibrational Energy Transfer . . . . .	461
J. Campos-Martinez, O. Roncero, S. Miret-Artés, P. Villarreal, G. Delgado-Barrio	
Some Intense Field Laser-Molecule Thoretical Techniques . . .	467
J.O. Hirschfelder	
Author Index . . . . .	477
Subject Index . . . . .	480
