Introduction	3
THE FORMATION OF THE SPACE-TIME STRUCTURE	
OF LIGHTWAVES BY STIMULATED SCATTERING IN HYPERSOUND	11
N.G. Basov, V.F. Efimkov, I.G. Zubarev,	
S.I. Mikhaylov	
·	
Introduction	11
Chapter 1: A Theoretical Consideration of Self-Conjugation	12
1. Fundamental Equations	12
2. Phase Conjugation (Wavefront Reversal)	16
3. Zero-Threshold Reflection with Phase	
Conjugation (Wavefront Reversal) by	
Stimulated Brillouin Scattering	22
4. Stimulated Scattering and Phase Conjugation	
(Wavefront Reversal) of Depolarized Emission	26
5. The Influence of Stimulated Brillouin	
Scattering Lag on Zero-Threshold Reflection	
of Narrow Light Pulses	32
6. Four-Wave Parametric Wave Mixing with	
Different Polarizations at a Brillouin	
Nonlinearity	38
7. The Formation of Excitation Emission-	50
Correlated Fields by Stimulated Brillouin	
Scattering	44
8. Phase Conjugation of Emission with a	
Spatially-Inhomogeneous Distribution of	
	50
Average Intensity	50
9. Stimulated Scattering and Phase Conjugation	57
of Composite Light Beams 10. The Influence of Saturation on Phase	57
Conjugation Quality by Stimulated Scattering	60
of Spatially Inhomogeneous Pump Emission	68
11. The Stimulated Scattering of Spatially Non-	-,
coherent Optical Emission	74
Chapter 2: Experimental Investigation of Phase Conjugation	87
1. Phase Conjugation of Weak Signals by Zero-	
Threshold Stimulated Brillouin Scattering	87
2. The Gain Increments of Stokes Fields by	
Stimulated Scattering of Spatially-	
Inhomogeneous Emission	90

	3. Phase Conjugation of Depolarized Emission	93
	4. Stimulated Scattering with Phase	
	Conjugation of Short Light Pulses	98
	5. Stimulated Brillouin Scattering of	
	Spatially Inhomogeneous Pump Emission with	
	Few Angular Modes	103
	6. A Laser Interferometer with Phase-	
	Conjugation Mirrors	106
	7. An Investigation of Fluctuations in	
	Stokes Emission from Stimulated Brillouin	
	Scattering	114
Chapter 3.	0	123
Chapter 3:	Practical Phase Conjugation Schemes 1. An Investigation for Schemes for Obtaining	125
	High-Power Short Light Pulses with Phase	
	Conjugation in a Stimulated Brillouin	1 2 2
	Scattering Mirror	123
	2. Polarization Methods of Improving the	
	Energy Characteristics of Phase Conjugation	400
	Mirrors	130
	3. Phase Conjugation Mirrors in the "Phase-	
	Conjugation-Oscillator"/"Phase-Conjugation-	
	Amplifier" State	133
	4. A Single-Mode Phase-Conjugate Intermittently-	
	Pulsed Oscillator/Amplifier System	136
	Conclusion	139
	Conclusion Bibliography	139 140

Chapter 3:	Reflection by Four-Wave Mixing in Semiconductor	
	and Resonant Gases	172
	1. Reflection by Four-Wave Mixing in Germanium	172
	2. Contribution of the Thermal Nonlinearity	
	Mechanism to Reflection by Four-Wave	
	Mixing in Semiconductors	173
	3. Reflection Efficiency in Four-Wave Mixing	
	in Narrowband Semiconductors	178
	4. Third Order Nonlinear Susceptibility in	
	InAs and InSb	189
	5. Reflection by Four-Wave Mixing in BC1 ₃ and	
	SF ₆ Resonant Molecular Gases	192
Chapter 4:	The Properties of Reflection in Four-Wave Mixing	203
-	1. The Dynamic Reflection Range	203
	2. Reflection of Multifrequency Emission	207
	3. Polarization Properties	212
	4. Phase Conjugation Quality	215
	Conclusion	223
	Bibliography	225
