

Contents

| | | |
|---------------------|--|-----|
| <i>Introduction</i> | | vii |
| <i>Chapter 1</i> | FUNDAMENTALS OF LASERS | |
| 1.1 | The Nature of Light | 1 |
| 1.2 | Emission and Absorption | 7 |
| 1.3 | Population Inversion | 9 |
| 1.4 | The Ammonia Maser | 10 |
| 1.5 | The Three-Level Maser | 13 |
| 1.6 | The Ruby Laser | 15 |
| 1.7 | The Helium-Neon Laser | 18 |
| <i>Chapter 2</i> | COHERENCE | |
| 2.1 | Conditions for Coherence | 20 |
| 2.2 | Time Coherence | 20 |
| 2.3 | Space Coherence | 24 |
| 2.4 | The Michelson Interferometer | 25 |
| 2.5 | Young's Two-Slit Experiment | 26 |
| 2.6 | Coherent Waves from Incoherent Sources | 28 |
| <i>Chapter 3</i> | SOME LASER THEORY | |
| 3.1 | Black-Body Radiation | 32 |
| 3.2 | The Einstein Coefficients | 36 |
| 3.3 | The Threshold Condition | 38 |
| 3.4 | Minimum Pumping Power | 43 |
| <i>Chapter 4</i> | RESONATORS, MIRRORS AND MODES | |
| 4.1 | Resonators | 46 |
| 4.2 | Laser Mirrors | 46 |
| 4.3 | Alignment of Laser Mirrors | 49 |
| 4.4 | Transverse Modes | 51 |
| 4.5 | The Uniphase or TEM ₀₀ Mode | 52 |
| 4.6 | Choice of Mirrors | 54 |
| 4.7 | Axial Modes | 64 |

| | | |
|------------------|---|-----------|
| <i>Chapter 5</i> | THE LASER OUTPUT | |
| 5.1 | The Electro-Optic Effect | 71 |
| | 5.1.1 The Kerr Effect | 71 |
| | 5.1.2 The Pockels Effect | 73 |
| | 5.1.3 The Faraday Effect | 76 |
| 5.2 | Q-Switching | 77 |
| | 5.2.1 The Rotating-Mirror Q-Switch | 78 |
| | 5.2.2 The Electro-Optic Q-Switch | 80 |
| | 5.2.3 The Photochemical Q-Switch | 82 |
| | 5.2.4 The Exploding-Film Q-Switch | 82 |
| 5.3 | Modulation of the Laser Output | 83 |
| | 5.3.1 Internal Modulation | 83 |
| | 5.3.2 Mechanical Modulation | 83 |
| | 5.3.3 Acoustic Modulation | 84 |
| | 5.3.4 Absorption Modulation | 85 |
| | 5.3.5 Electro-Optic Modulation | 86 |
| 5.4 | Deflection of the Laser Output | 88 |
| | 5.4.1 Electro-Optic Deflection | 89 |
| | 5.4.2 Acoustic Deflection | 90 |
| 5.5 | Frequency Doubling | 90 |
| | Illustration. Fig. 5.20. | Facing 92 |
| 5.6 | Frequency Stabilization of the Laser Output | 92 |
| 5.7 | Cavity Dumping | 93 |
| 5.8 | Mode Locking | 94 |
| | | |
| <i>Chapter 6</i> | SOLID STATE LASERS | |
| 6.1 | The Ruby Laser | 96 |
| 6.2 | The Neodymium Laser | 99 |
| 6.3 | The Semiconductor Laser | 100 |
| | | |
| <i>Chapter 7</i> | GAS LASERS | |
| 7.1 | The Helium-Neon Laser | 108 |
| 7.2 | The Helium-Cadmium Laser | 113 |
| 7.3 | The Argon Laser | 114 |

| | | |
|-------------------|---------------------------------------|-----|
| 7.4 | The Krypton Laser | 116 |
| 7.5 | The Carbon Dioxide Laser | 118 |
| <i>Chapter 8</i> | THE LASER AS A SPECTRAL SOURCE | |
| 8.1 | Standard of Length | 127 |
| 8.2 | Raman Spectroscopy | 127 |
| 8.3 | Stimulated Raman Scattering | 131 |
| 8.4 | Tunable Lasers | 132 |
| | 8.4.1 Parametric Oscillation | 132 |
| | 8.4.2 Liquid Lasers | 135 |
| <i>Chapter 9</i> | MEASUREMENT WITH A LASER | |
| 9.1 | Alignment | 140 |
| 9.2 | Measurement of Distance | 143 |
| | 9.2.1 Interferometric Methods | 143 |
| | 9.2.2 Beam Modulation | 147 |
| | 9.3.3 Pulse Echo | 150 |
| 9.3 | Measurement of Velocity | 153 |
| 9.4 | Measurement of Rotation | 154 |
| 9.5 | Military Applications of the Laser | 160 |
| <i>Chapter 10</i> | LASER COMMUNICATIONS | |
| 10.1 | The Source | 169 |
| 10.2 | Modulation | 171 |
| | 10.2.1 Amplitude Modulation | 171 |
| | 10.2.2 Frequency Modulation | 172 |
| | 10.2.3 Pulse Code Modulation | 172 |
| 10.3 | Transmission | 174 |
| | 10.3.1 Light Pipes | 175 |
| | 10.3.2 Fibre Guides | 177 |
| | 10.3.3 Amplification | 177 |
| 10.4 | Detection and Demodulation | 177 |
| | 10.4.1 Direct Detection | 177 |
| | 10.4.2 Heterodyne Detection | 178 |
| <i>Chapter 11</i> | THE LASER AS A HEAT SOURCE | |
| 11.1 | Welding | 182 |

| | | |
|-------------------|--|-----|
| 11.2 | Ablation | 183 |
| 11.3 | Cutting | 187 |
| 11.4 | Eye Surgery | 189 |
| 11.5 | Laser Safety | 191 |
| 11.6 | Laser Fusion | 193 |
| | | |
| <i>Chapter 12</i> | HOLOGRAPHY | |
| 12.1 | Diffuse Object Illumination | 200 |
| 12.2 | Speckle Pattern | 201 |
| 12.3 | Simple Mathematical Analysis of Holography | 201 |
| 12.4 | Image Magnification | 203 |
| 12.5 | Fourier Transform Holography | 204 |
| 12.6 | Resolution in Holography | 205 |
| 12.7 | Aberrations in Holography | 208 |
| 12.8 | Thick Holograms and Coloured Reconstructions | 208 |
| 12.9 | The Efficiency of Holograms | 210 |
| 12.10 | Practical Holography | 210 |
| | 12.10.1 Lasers for Holography | 211 |
| | 12.10.2 Fringe Stability | 211 |
| | 12.10.3 A Typical Holographic System | 212 |
| | 12.10.4 Recording Materials | 214 |
| | 12.10.5 Processing of Agfa and Kodak Materials | 215 |
| 12.11 | Applications of Holography | 216 |
| | 12.11.1 Holographic Interferometry | 217 |
| | 12.11.2 Particle Analysis | 223 |
| | 12.11.3 Character Recognition | 224 |
| | 12.11.4 Holographic Microscopy | 224 |
| | 12.11.5 High Resolution Holography | 227 |
| | 12.11.6 Holographic Diffraction Gratings | 228 |
| | 12.11.7 Acoustic Holography | 228 |
| | 12.11.8 Data Storage by Holography | 231 |
| | | |
