

CONTENTS

| Chapter | Title | Page |
|-----------|--|------|
| | Preface | vii |
| 1 | Introduction | 1 |
| 2 | Principles of optics | 13 |
| 3 | Scattering phenomena and optical systems | 57 |
| 4 | Basic principles of laser-Doppler anemometry | 96 |
| 5 | Components of optical systems | 133 |
| 6 | Introduction to signal processing | 156 |
| 7 | Signal processing by frequency analysis | 179 |
| 8 | Signal processing by frequency-tracking demodulation | 212 |
| 9 | Signal processing by counting | 239 |
| 10 | Scattering particles: specification | 272 |
| 11 | Scattering particles: generation and measurement | 295 |
| 12 | Laser-Doppler anemometers for specific requirements | 317 |
| 13 | Appraisal of laser-Doppler anemometry | 351 |
| | References | 381 |
| | Nomenclature | 394 |
| | Subject index | 400 |
