

CONTENTS

1	What Is a Chemical Laser? An Introduction	1
	G. C. PIMENTEL, University of California, Berkeley, California K. L. KOMPA, Max-Planck-Institut für Plasmaphysik, Garching, Germany	
2	Kinetics of Hydrogen-Halide Chemical Lasers	33
	N. COHEN and J. F. BOTT, The Aerospace Corporation, El Segundo, California	
3	Optical Aspects of Chemical Lasers	95
	A. N. CHESTER, Hughes Research Laboratories, Malibu, Cali- fornia R. A. CHODZKO, The Aerospace Corporation, Los Angeles, California	
4	Continuous-Wave Hydrogen-Halide Lasers	205
	R. W. F. GROSS and D. J. SPENCER, The Aerospace Corporation, El Segundo, California	
5	Gas Dynamics of Supersonic Mixing Lasers	263
	G. GROHS and G. EMANUEL, TRW Systems Group, Redondo Beach, California	
6	Pulsed Hydrogen-Halide Chemical Lasers	389
	S. N. SUCHARD, The Aerospace Corporation, El Segundo, California J. R. AIREY, Naval Research Laboratory, Washington, D.C.	

7	Transfer Chemical Lasers	431
	T. A. COOL, Cornell University, Ithaca, New York	
8	Numerical Modeling of Chemical Lasers	469
	G. EMANUEL, TRW Systems Group, Redondo Beach, California	
9	Classical Dynamics of Bimolecular Reactions	551
	R. L. WILKINS, The Aerospace Corporation, El Segundo, California	
10	Statistical and Dynamical Models of Population Inversion	579
	A. BEN-SHAUL and G. L. HOFACKER, Technische Universität München, München, Germany	
11	The CO Chemical Laser	619
	B. R. BRONFIN, United Technologies Research Center, East Hartford, Connecticut	
	W. Q. JEFFERS, McDonnell Douglas Research Laboratories, St. Louis, Missouri	
12	The Photochemical Iodine Laser	667
	K. HOHLA and K. L. KOMPA, Max-Planck-Institut für Plasmaphysik, Euratom Association, Garching, Germany	
13	Metal-Atom Oxidation Lasers	703
	R. J. JENSEN, Los Alamos Scientific Laboratory, Los Alamos, New Mexico	
	Index	733
