List of Contributors	vii
Preface	ix

1 PHOTOACOUSTICS: SPECTROSCOPY AND OTHER APPLICATIONS

ANDREW C. TAM

I. Introduction	2
II. PA Spectroscopy in Gases	3
III. PA Spectroscopy in Condensed Matter	25
IV. PA Monitoring of Deexcitations	60
V. PA Probing of Physical Properties	72
VI. Phenomena Closely Related to the PA Effect	86
VII. Conclusions	91
References	98

2 ONE-PHOTON AND TWO-PHOTON EXCITATION SPECTROSCOPY

ROBERT R. BIRGE

I. Introduction	109
II. Excitation Spectroscopy	114
III. Recent Applications	167
References	171

3 THE THERMAL LENS IN ABSORPTION SPECTROSCOPY

HOWARD L. FANG AND ROBERT L.
SWOFFORD

I. Introduction	176
II. The Photothermal Lens	181
III. The Extracavity Thermal Lens Technique of Hu and Whinnery	191
IV. The Dual-Beam Thermal Lens Technique	203
V. Creation of a Thermal Lens by a Pulsed Laser	219
VI. Conclusion	229
References	230

4	LASER IONIZATION SPECTROSCOPY AND MASS SPECTROMETRY	
	DAVID H. PARKER	
	I. Introduction	234
	II. Experimental Considerations	243
	III. Dynamics of Resonant Multiphoton Ionization	257
	IV. Spectroscopic Applications	267
	V. Laser Ionization–Fragmentation Mechanisms	284
	VI. Experimental Analysis of Laser Ionization–Fragmentation Mechanisms	291
	VII. Laser Ionization as an Analytical Tool	300
	VIII. Concluding Remarks	305
	References	306
5	OPTICAL-PHASE-SHIFT METHODS FOR ABSORPTION SPECTROSCOPY	
	DONALD M. FRIEDRICH	
	I. Introduction	311
	II. Sources of Phase Shift	314
	III. Effect of Index and Absorption Changes	320
	IV. Detection Limits	322
	V. Experimental Methods	327
	VI. Effects of Thermal Gradients	339
	VII. Conclusion	341
	References	341
6	LASER INTRACAVITY-ENHANCED SPECTROSCOPY	
	T. D. HARRIS	
	I. Introduction	343
	II. Experimental Methods	349
	III. Conclusions	365
	References	366
7	ANALYTICAL APPLICATIONS OF LASER ABSORPTION AND EMISSION SPECTROSCOPY	
	T. D. HARRIS AND F. E. LYTLE	
	I. Introduction	369
	II. Absorption Spectroscopy	370
	III. Fluorescence Spectroscopy	383
	References	428
	Index	435
